

Numina Rules 2026

Introduction

This rulebook provides the rules for the Numina LARP. For context about the world of Numina, the people who live there and the dangers they face, see the Numina Campaign book. In this book you will find information on how to build and play a character at the Numina LARP.

All Numina rules are based on the Accelerant Core rules.

The rules now include hyperlinks for easier navigation. After clicking a link, use Back or Alt + Left Arrow to return to your previous location. This makes looking up rules and creating characters more convenient.

Accelerant Core Rules

Welcome

You are preparing to enter a game world using the Accelerant system. The system is designed to be simple in concept and execution yet have a rich and varied set of skills and abilities with which to develop characters and stories. To do this we have created a set of Core Rules that defines all the effects of the game and presents them to you within the first chapter of the rule book. All skills and special abilities refer to these Core Rules, so once you have learned the Core Rules you know how to react to effects from any Accelerant game, even though the skills or abilities that allow a character to use those effects may be very different.

Rules of Etiquette

In an activity as fluid and full of unexpected circumstances as live action games, it is important that each player attempts to follow the spirit as well as the letter of the rules. Although we have tried to create a set of rules that is as cut and dry as possible, there are certain rules that are difficult or impossible to quantify that are necessary to promote atmosphere or safety. These rules are marked as [Rules of Etiquette](#). These rules are difficult or impossible to quantify. We know this, and if players abuse them or become less than graceful when using them the game will suffer. We trust the player to follow the intent of the rules, and to be particularly careful to be graceful when dealing with [Rules of Etiquette](#).

Rule of Etiquette

The first rule of etiquette is that abusive language or actions are not tolerated, whether they are in-game or not. Language or actions that are derogatory or that are deemed to be harassment are not allowed. References to explicit sexual behavior or concepts, particularly violent ones, are not allowed. In-game threats should be worded so they are clearly in-game.

Game Actions

The system is designed to keep the game running as smoothly and fluidly as possible. The game takes place in a site full of props, buildings, and other players. The rules define how you interact with the environment and other players. The game has removed actions and effects that players cannot actually perform from the gameplay. There are no creatures stepping through solid walls, no flying creatures, and no activities that cannot be played without interrupting the flow of the game. Characters that step into rifts and turn to spirit, or characters that die and rise as spirits are still visible as they walk off. You cannot attempt actions such as chopping up bodies or breaking down doors that cannot be performed for logistical or safety reasons.

Always In Game

Players stay in-game and in character from the start of the event to its end. There is no "out-of-game" except during emergencies. There are no out-of-game indicators such as white headbands, and no people should be wandering about unless they are in the actual game. The idea is to keep the game flowing so players can stay in character and be immersed in the story. If you have a question, attempt to word it and ask it in-game. If you feel you must leave game, walk to the edge of the game area in character and leave the game for a time. You should never interrupt the flow of the game.

The system is also designed to minimize the times where you cannot act on what you see, hear and feel. You are always in-game, even if your character is unconscious, dead, or affected by a game condition that incapacitates you. Your spirit still remains with you, and it can experience the game world around you. You do not need to pretend you did not experience the game even under these conditions. If your eyes are closed then you might not see what is going on, but you will remember everything you hear, smell, and feel. Your character will also realize this and knows that sometimes dead men do tell tales.

There is no information that is out-of-game. If you don't want other players to know something in-game, don't talk about it out-of-game. Keep your in-game secrets to yourself, and if you talk out-of-game about something other players can decide they learned that information in-game if they feel that the conversation unfairly inflicts knowledge upon them they did not want to know. If you want in-game secrets, keep out-of-game secrets.

The only caveat is that sometimes players experienced with a game play different characters altogether. Perhaps you have lost a previous character to death and are playing a new character. Perhaps, as a change of pace, you are participating as a non-player character or you are playing a plot character for a time. If you play a different character, creature, or plot role within the same game world we ask you do not transfer anything you learn to other characters.

To keep the game flowing as smoothly as possible, we have defined the following ways to deal with problems and interruptions.

Caution

This phrase indicates some condition that may threaten the health of a player. A caution should never last more than 10 seconds. It indicates that those people who are close to or involved in that problem should pause so someone can get clear, get up, or move away from a threat. Only those people nearby need pause until the problem resolves. Everyone involved in a caution is still responsible to the game, and should still be cautious of in-game threats. They may move away from the Caution or pause until the person has dealt with the problem.

Clarification

This phrase works like Caution, but it indicates that someone needs a quick explanation of what happened. People directly involved pause for up to three seconds while someone repeats a verbal or quickly indicates a condition or result of something. This should be used infrequently, if ever. It is present for new players who may be overwhelmed and confused during their first game or two.

Let Me Clarify

This phrase, which can only be used by plot approved non-player characters, indicates that any encounter information that follows should be considered true. There are times when your character may not trust another character. This phrase indicates that the information that the character, trustworthy or not, will impart is important and true information about how some specific encounter works. This phrase cannot be used unless the player has plot approval for that specific encounter, and the information imparted must be a clarification of some specific game effect or encounter.

Emergency

This phrase should come up rarely. This means that there is some medical emergency that needs attention. The game play stops, and everyone who hears the emergency should drop to a knee to indicate that a real problem exists. Emergency should only be called if there is a real problem and someone could be hurt.

Safety Restrictions

There are a number of basic safety restrictions in the Accelerant system to ensure the safety, comfort, and enjoyment of all.

No Physical Contact

You have no reason to touch another player in the Accelerant system. Physical contact is not allowed. You may contact another player with a boffer [weapon](#) in a legal attack area and you may contact another player by touching a [packet](#) to their arm or shoulder to deliver a "touch cast" effect. Violators will be asked to leave the game.

Searching a Character

Because the game does not allow physical contact, you may not physically search someone else. Instead you approach within searching distance, role play the searching motion with both hands held out above their body, and tell them in a low voice "I am searching you." You may have items in your off hand during this process, but

you may not block with [weapons](#). The player reveals items you have found. The player may make a pouch available for you to reach into and take items.

Search For...

Some skills can give you the ability to use a special searching effect on a dead or helpless creature after you have finished your normal search. This searching attempt is represented by the verbal "Search for <Item Type>" where the item type is specified in the skill. You cannot use this effect unless you have a skill or ability that allows you to do so. Using a skill with this Search effect might reveal additional items, or it might trigger a response effect targeted on you. The Search effect is the name for the special search attempt, and the Search response is a resulting effect the targeted character calls out when you search them.

Example:

As an example, after you search an elemental you might have a skill that allows you to call out "With elemental harvesting, Search for True Elements." That NPC might give up additional items, they might reply "You find nothing," or they might even use a counter effect such as ["Refresh 1 Fire."](#) If searching some creatures is dangerous, the creature might even reply with a detrimental search response.

It is also possible for games to create skills that let you use a defense against some or all search responses.

Carrying a Character

Because the game does not allow physical contact, you may not physically carry or drag another person. Instead you simply tell the person you are picking them up and role play carrying them along. They must get up and walk with you while you pretend to hold their shoulders. You cannot move faster than a walk while carrying someone else. If you are unable to move while being carried you walk with your head bowed and arms at your sides.

If you are carrying a character and that character is struck by an effect from a [melee](#), [missile](#), or [packet](#) attack that is not beneficial, you will also take that effect unless you "drop" the character immediately. If you are being carried and someone "drops" you then you role play falling to the ground. If you are being carried, you must role play an effect with a moan or grunt even if you are paralyzed or dead to indicate you have been struck. If you are carrying someone who role plays an effect, and you do not know what the effect was, you must drop them. You may pick up a body after dropping it as soon as that body stops moving.

Rule of Etiquette

Whenever you are required to role play an effect you must always do so in a safe manner. If you must adjust your role play or position slightly to make the game safer for you or another player we ask you to do so. You should take care before moving in crowded areas even if you must play out the effect in a slightly different manner. You are encouraged to take the extra step or two when playing out an effect if it removes you from an area that is detrimental to your health such as a puddle or an area with too many other players.

No Alcohol or Drugs

You cannot consume alcohol or drugs on the premises of the game unless the drugs are for medical use. You cannot be under the influence of these while on the premises of the game. Violators will be asked to leave the game. If any drug or substance appears to inhibit a player's judgement a staff reserves the right to ask that player to rest, away from the action, or to leave the game.

Rules Restrictions

As you play the game and wander around the world, there is a lot you can do to affect the game environment around you. Conversely, there are lots of effects that can change how you play the game, for both good and

bad. Other characters may attempt to inflict unpleasant fates upon you, and you might attempt to do the same to them.

There are three restrictions on your activities:

1. **Environmental Restriction** - When you come across props that represent certain environments, such as tarp walls representing solid walls, you must play as if that condition was real.
 - You cannot move tarp walls
 - You cannot walk across black pits
- You cannot enter areas marked out-of-game
2. **Effect Restriction** - If an effect has been inflicted upon you, you must abide by the restriction of that effect until it is removed.
 - If you have a [Slow](#) effect you cannot run
 - If you have the [Maim](#) effect you cannot use the maimed limb
 - Effects can be inflicted upon you in a variety of ways
3. **Skill Restriction** - If there is a skill that specifically allows you to manipulate a prop or perform some action, you cannot attempt to perform that action or manipulate that prop unless you have that skill.
 - You cannot pick up [weapons](#) and try to fight unless you have the skill to do so
 - You cannot manipulate traps unless you have the skill to do, although you can attempt to avoid them

Prop Restrictions

1. **Forbidden Props** - You are not allowed to bring to an event any prop that resembles or could be mistaken for common or unique game items provided by plot without the express permission of the game staff.
 - You cannot attempt to duplicate or forge game money, item props, tags, or logistical documents such as character or monster cards
 - Any attempt to use in-game means to create fakes of any items must be approved by the plot committee
2. **No Destruction** - You are not allowed to break, destroy, or take apart any prop.
 - If a prop is attached to a wall by a chain, for example, you cannot attempt to break or detach that chain in any way
 - The [Destroy](#) effect does not change the basic structure of a prop; it just makes the item unusable for any game related purpose
3. **Non-Game Props** - Most props have no in-game worth.
 - Costuming, jewelry, [weapons](#), and area props cannot be moved from the area they are placed in except by the owner
 - These props provide no in-game benefit and disallowing their removal ensures these props are not broken or lost
 - Props may be handled but must be put back where they are found unless they have a sticker
4. **Sticker Meanings** - Small circular stickers indicate special rules about handling an item.
 - **Red Circle** - Cannot be moved at all. It cannot be picked up or touched. It will not move.
 - **Yellow Sticker** - Seems valuable. The prop may be taken but it must be turned in at checkout.
 - **Green Sticker** - Seems valuable. You can take the prop and hold on to it.
 - **Red Sticker with Rune/Number** - Characters may not pick up or touch the item unless they have a skill or ability that allows them to manipulate objects marked by that symbol or number.
5. **Ribbon Markers** - Items may also be marked by attaching a short green, yellow, or red ribbon to indicate the item's in-game status.
 - These ribbons replace the sticker and have the same meaning
 - A ribbon can be used to mark small items that don't have room for a sticker, such as rings
 - May also be used on items where plot feels that a ribbon would look better or be more evident to the players
 - This ribbon may have codes or markings on it in the same manner that stickers can have markings for players with specific skills to recognize
6. **Effect Stickers** - Some game effects will enhance an object such as a [weapon](#) or a piece of [armor](#).
 - When an item has been enhanced by a game effect, an effect sticker will be placed upon it so long as the enhancement is in place
 - Items with effect stickers are treated as though they were yellow sticker items

- If you have an effect sticker upon your [weapon](#), that prop can be stolen from you
- You should bring back up props if you want to use item enhancements

Game Environment

Games take place at a site, usually a campground. This site defines the boundaries of the game. During game play, a player may attempt to enter any area within the game boundaries unless the area is marked with a yellow information sign. Areas marked with information signs are either special areas with additional rules described by the sign or they are out-of-game and impassable.

Out of Game Areas

Areas that are out-of-game are marked by the yellow or hazard orange signs with text marking it Out of Game. You may not enter these areas. The text of the sign indicates why, in-game, this area cannot be entered. Some areas might be described as collapsed and ruined piles of rubble that have no real interior. Other areas might be marked as impassable swamp.

Special Areas

Areas with special restrictions or rules will be marked by the yellow or hazard orange signs with game information printed on it. This sign will have game information written upon it that will describe the circumstances that make the area special.

Gates

Portals ringed with strings of decorative light are magical portals. These portals lead to other places. Some lead to other places in this world, some lead to places beyond this world. If a portal is ringed with lights and they are not lit then you cannot go through that portal.

The areas beyond gates are often marked with yellow information signs, so you should always look around after going through a gate. Gates have a disorienting effect to compensate for the time it takes to spot and read a yellow sign.

White gates are open portals. If the lights are on, anyone may step through the gate. White gates will always appear in ruined areas.

Colored gates are special. Only special staff characters that control the gate may bring you through a gate with colored lights. If there is no guide you cannot enter the gate. Some colored gates are free standing, with no actual area on the other side. If you enter such a gate at the request of a staff character then you will become a spirit. You will not be affected by any attacks and you must reply "[Spirit](#)" to any attack that strikes you. You cannot use any game skills or converse with any one else. You are visible to others, but you cannot converse with them and you can only enter an area indicated by the spirit guide who leads you. You must follow the spirit guide until you exit through another gate and your guide indicates you have assumed your normal form.

Turn Back Markers

Some games have locations in a game site, that are normally accessible to players, but are sometimes closed for specific encounters or modules. While this is usually handled with yellow information signs, it is often difficult to spot and read information signs without entering the encounter area to read them, especially at night. To make this easier, areas can be marked with circular information signs (rather than the usual octagonal signs) and at night these signs are lit with circular rings created with looped glow bracelets. If you spot these Turn Back Markers hanging in the area, it means that the area is inaccessible and you should stay away unless you are led to the area by a spirit, a scout, or a similar guide.

It is often left to the player to explain why they cannot proceed when they spot Turn Back Markers. One common reason is that the area ahead is an impassable swamp. Another, is that a mist has risen and players cannot find their way through the area. Sometimes players simply state that the area ahead looks uninteresting

and turn back. It is left to you and your companions to come up with a plausible reason that you cannot proceed when you spot a Turn Back Marker.

Combat

During the course of the game, you can be the subject of a wide variety of attacks. Each attack will attempt to inflict an effect upon you. Some effects can benefit you, and some will deliver unpleasant effects upon you. Each attack has a verbal that describes what the attack does and a delivery that determines how the attack is used against the target.

Verbals

A verbal is a short phrase that is called out when an ability is used to explain the effect of that attack. Each verbal can have an effect and a trait for that attack. The trait indicates the flavor of the attack so you may role play the effects and perhaps use a defense to negate the attack if it strikes you. The effect indicates what the attack does to you.

A verbal is an out-of-game phrase. You must call your verbal even if you are affected by [Silence](#). If you hear the beginning of a verbal you must listen to the phrase and play out the effect.

Verbals for [melee](#) attacks are called out as you swing your [weapon](#). Verbals for [missile](#) and [packet](#) attacks are called out before you release the projectile from your hand. You call out a phrase that takes the form of [\[Effect\]](#) by [Trait](#). For example, a poison that freezes you in place would use the verbal “[Paralyze](#) by [Poison](#)” and a bolt of fire that causes 5 points of damage would use “5 [Damage](#) by [Fire](#)” as the verbal.

If you hear a verbal, your character knows what happened. The verbal not only tells you the effect out-of-game, but it represents the sight, sound and feel of the attack in-game. You never have to play it dumb. The verbal “4 [Damage](#) by [Fire](#)” might represent a roar of flame. The verbal “[Maim](#) by [Lightning](#)” might represent a flash of light. The verbal “[Paralyze](#) by [Fear](#)” might represent the hairs rising on the back of your neck. However you imagine it, the verbal tells you what happened both in-game and out-of-game.

Verbals should not be confused with incantations. Incantations are magical words that are used to cast a spell. These are in-game magical phrases that are required for all but the most powerful mages to cast magic. Spells usually have incantations, but they also end with a verbal. Remember that there are two rules that apply to all called attacks:

1. **Timing** - You must finish the Verbal for a called attack **BEFORE** launching a [packet](#) or [missile](#) attack. You call out the Verbal as you swing a [melee](#) attack. If there is an incantation, which is an in-game phrase associated with an attack, then that must be clearly spoken before the Verbal. This is true for [melee](#), [missile](#) and [packet](#) attacks.
2. **Acknowledgement** - All called hits must be acknowledged with role play. Many skills are consumed only if the recipient calls out a defense or role-plays the effects of the attack. If you don't role play the effect, the attacker may assume that you were not struck and the skill not used.

Traits

A trait is a label that is given to a character, an attack, a defense, or an item. Traits help describe the flavor of game effects and define how abilities interact with each other. There are four types of traits. A character trait is any trait that is somehow given to a character. An attack trait is added to an attack verbal and defines the flavor of that attack. A defense trait is added to a defense call. An item trait is added to a tagged item and gives that trait to anyone carrying that item.

An attack trait tells you which defenses can be used against that attack. A character or item trait can be used to

determine if certain effects worked against you. If you had the 'Undead' trait, for example, then an attack that caused "5 [Damage](#) to Undead" would be effective against you. A defense trait is generally used for flavor, but it is possible to have skills or abilities that can be used only if a defense with an appropriate trait is used.

A character's race is always considered a trait. Characters with no explicit race have the Human trait. If you have a sub-race then both your sub-race and your general race will be considered to be traits. So a Wood Elf has the Elf trait as well as the Wood Elf trait.

Deliveries

Each ability must be delivered to its target in some way. These deliveries are the physical action needed to determine whether an ability has been successfully used on an opponent.

There are several different ways to deliver game effects, but there are three basic attack deliveries that are used most often in combat. [Melee](#) attacks are delivered with a successful strike with a hand held [weapon](#). [Packet](#) attacks are delivered by throwing a bean bag like projectile and striking an opponent. [Missile](#) attacks are delivered by throwing or firing a special foam [weapon](#) prop, although some games use [packet](#) based arrows and bolts that are firing by aiming a [missile](#) weapon prop at an enemy and then throwing a [packet](#) prop and striking that opponent with the projectile.

It is always up to the defender to make the final decision whether an ability has struck or affected them, and thus whether the ability has been delivered. It is important that players do not abuse this honor system. If a player does not count legal hits, the game breaks down. Individuals that are reported for not counting hits will be reviewed and if necessary asked to leave the game.

Melee Attacks

Melee attacks require special hand held padded [weapons](#) to deliver an attack. Melee [weapons](#) cannot be thrown. You must have both hands on a two handed [weapon](#) in order to use it in combat unless some game ability specifically states otherwise. These padded [weapons](#) have a strict [set of creation rules](#) and must pass a safety inspection at each and every event where you intend to use them.

To add to the atmosphere of role playing, we expect our players to role play in combat. Although we allow light [weapons](#) for safety and comfort, we ask that players keep the pace of their swings in line with what a heavier [weapon](#) might require. Melee swings that are entirely generated by snapping or rotating the wrist or forearm are discouraged. Although you are expected to role play full [weapon](#) swings where the [weapon](#) moves at least 45 degrees, the actual contact cannot be too hard. A tap from a [weapon](#) is sufficient to deliver an attack. Melee attacks that are blocked by another [weapon](#) or [shield](#) wielded by a character with the appropriate skill to do so are not counted. Attacks to the head and neck, the hands, or the groin are illegal and are not counted.

If you are unskilled with a melee [weapon](#) you cannot make attacks with that [weapon](#). If someone strikes that [weapon](#) or you try to parry with that [weapon](#), you must either take the blow or the [weapon](#) is ripped from your hand. If you do not take the blow, you must drop the [weapon](#) as if you had been affected by the [Disarm](#) effect.

You may hold only one [weapon](#) or [shield](#) in your hand during combat. If you are holding more than one item in a hand, and a melee attack strikes one of those items, then you will take the blow or be disarmed of both items as if you were unskilled in their use.

A melee attack that has no verbal causes 1 point of damage. These are known as "uncalled attacks." If an uncalled attack removes your last point of Vitality you will fall unconscious but you will remain stable as described in the Vitality section below. A melee attack with a verbal is known as a 'called attack.' A successful attack delivers the effect in the verbal to the recipient.

Skills and abilities that allow you to use called melee attacks are only used up, as a default, if the attack strikes a legal target area and the recipient acknowledges the hit by role playing the effect or calling out a defense to negate the attack. The melee attack is not used up if the attack misses or the target blocks the attack with a [weapon](#) or a [shield](#).

Some skills work only on limb hits. A limb hit is a strike to the arm or leg. A torso hit includes the chest from the belt up to the top of the chest. Any hit to the leg or buttock is a leg hit. Any hit to the arm or to the outer shoulder is an arm hit. Hits that come down on the shoulder or that come down between the shoulder and the neck are also arm hits.

The Flurry Rule

A flurry is a series of [melee](#) swings delivered at an enemy in combat with little or no pause. You can make no more than three consecutive attacks against a particular enemy where your [weapon](#) contacts an opponent or their [weapons](#), including their [shield](#), before you must reset. To reset your flurry you must step out of [weapon](#) range between you and your opponent and stop all attacks on your previous target for at least a second.

Players pursuing enemies need not interrupt pursuit by stepping back to reset their Flurry. The pursuer needs only to pause for a second while at a distance just within their maximum [weapon](#) range.

That's all you need to remember, everything else are clarifications and answers for specific questions:

1. **What Counts as a Flurry Swing** - Blocked swings that contact a [weapon](#) or [shield](#) and successful hits that contact the body are counted as flurry swings. Feints and swings that do not make contact against [weapons](#), [shield](#), or body do not count as a flurry swing. You must reset your flurry after you have made three swings with contact before resuming attacks on that opponent.
2. **Resetting While Being Pursued** - An opponent can't try to prevent you from resetting your flurry by advancing. If you have retreated in an attempt to get out of [weapon](#) range but your opponent's advance has prevented you from doing so then you may reset your flurry after a full second pause.
3. **Incidental Contact** - Incidental [weapon](#) contact and aggressively engaging an opponent's [weapon](#) with beat attacks or offensive parries can make flurry determination confusing. We realize it is difficult to determine if these types of [weapon](#) maneuvers count as a strike in a flurry. As a [Rule of Etiquette](#), if both your elbow and the [weapon](#) tip move forward and contact an opponent's [weapon](#) then count that as one of your flurry strikes even if it was not your intention to launch an attack. This might mean that both combatants use up a Flurry swing during incidental [weapon](#) contact.

The Proximity Rule

You must maintain a safe distance from any active opponent. If you can reach out and touch the torso of an opponent with your hand then you are too close and you must back away. If there is a significant difference in the reach of two opponents, the opponent with the shorter reach may approach close enough so that they can strike their opponent with their [weapon](#) so long as they cannot touch the torso of the opponent.

Claws and Natural Weaponry

Some characters have the ability to use claws or natural weaponry instead of, or in addition to, weapons. These [weapon](#) props are red, though some plot creatures may have props that are constructed to appear to be part of that creature.

Claws are considered to be [melee weapons](#) and can be used to block [melee](#) attacks. Claws are not affected by [Disarm](#). [Destroy](#) effects delivered to such weaponry will cause a [Maim](#) effect to the limb using the [weapon](#).

Claws and natural weaponry are not bladed weapons, and cannot be used with skills or effects that require bladed weapons. If you are holding a claw that is struck by a [melee](#) or [missile](#) attack, and you cannot legally block with the claw due to some game effect, you will be affected by the attack since you cannot drop the claw

in response to the strike.

Packet Attacks

A packet is a small bean bag filled with bird seed that represents some sort of mystical, psychic, or supernatural ranged attack form. Packets have strict construction guidelines. You call a verbal and throw a packet at a target to deliver the attack. If the packet hits the target, or any direct possession of the target, then the effect is delivered to the target. You cannot throw packets too hard. If you are winding up to throw the packet, then you are throwing too hard.

Packets are not solid objects and cannot be affected by [Disarm](#) or [Destroy](#), but they are a visible, in-game effect. If someone is carrying packets and you see the packets, you can assume they have some sort of aura that makes you realize they are capable of something special. Because of this, you cannot carry or throw packets unless you have the power to use them for something.

If a packet clearly strikes a target and they do not acknowledge the hit with role play or by negating it with a defense, the [attributes](#) or their equivalent are not exhausted. If the packet misses, or you cannot tell whether the packet hit, then [attributes](#) or resources are exhausted normally.

To deliver a packet attack, the arm that is delivering the packet must be free and the hand empty except for the packet itself. A free arm cannot have props tucked under it or tied to it other than [armor](#). You cannot deliver packet attacks if you cannot use game skills, or with an arm that is affected by something that prevents its use such as a [Maim](#) effect or shackles. Some packet based skills have additional requirements as well.

Packet attacks cannot be used while you are being hit. Successful [melee](#) attacks interrupt your ability to throw packet attacks, forcing you to wait for one full second before attempting to throw again. It is impossible to get off packet attacks during the Flurry pause. [missile](#) and packet attacks will also interrupt your verbal if they land while you are speaking it, but you may begin a new verbal immediately and do not have to wait for one second in these cases. An interrupted ability is not used up and [attributes](#) or their equivalent are not wasted, but you must begin the verbal again.

Like [melee](#) attacks, any packet attack that has no verbal causes 1 point of damage. Packet attacks with no verbal are "uncalled strikes" and cause someone to fall unconscious but stable when they reduce [Vitality](#) to zero. Packet attacks that use called damage effects cause enemies to become unstable when they fall unconscious just like called [melee](#) attacks.

Rule of Etiquette

In order to encourage the use of good costuming and add a little more realism, we have the Costume Rule. If a packet attack clearly misses a target and passes by the body, yet that packet hits a cloak or costuming piece after it has gone past, the defender can call out "costume." This rule cannot be used if the costuming is in front of the defender or if the packet has not already passed the body. The rule is in place to encourage cloaks, back banners, and some directed character costuming such as wings without adding an unacceptable disadvantage to the character in combat.

Concentrate

Concentrate is a special plot verbal that indicates the caster who called it can throw [packet](#) attacks while being hit. The caster calls out Concentrate and can throw a number of follow up [packet](#) attacks, including spells, while being hit by incoming attacks. You do not have to call Concentrate before every spell; one call covers a number of attacks. Each skill or special ability that allows the use of Concentrate requires you to call out "Concentrate" when you use it.

Rule of Etiquette

If a character using Concentrate is in a swirling fight where new combatants are coming into fighting range, then the caster should call out "Concentrate" each time they willingly switch targets so everyone in the fight knows what is going on.

Missile Attacks (Packet)

For many games, missile attacks typically use [packets](#) that represent arrows or crossbow bolts. To differentiate missile attacks from normal [packet](#) attacks, the attacker has two additional requirements when attacking. First, you must have a prop in your free hand that is aimed at the target. Second, you must go through a firing motion for each missile attack. Bows require you make a drawing motion, and bring the [packet](#) to your cheek before throwing. Crossbows require that you pull the [packet](#) along the stock of the crossbow and pull it up to aim. After your motion you throw the attack while still pointing at the target with your free hand.

Although this system is typically used for bows and crossbows, games can use this system for [thrown](#) weapons, wands, or other ranged attacks that can be, in that setting, blocked with [weapons](#) or [shields](#).

Like [melee](#) attacks, any missile attack that has no verbal causes 1 point of damage. Missile attacks with no verbal are "uncalled strikes" and cause someone to fall unconscious but stable when they reduce [Vitality](#) to zero. [Missile weapons](#) that use called damage effects cause enemies to become unstable when they fall unconscious just like called [melee](#) attacks.

Like [packet](#) attacks, [missile weapons](#) cannot be used while you are being hit by a [melee weapon](#) unless you have the ability to use the Concentrate ability as described above.

Some skills that allow you to use a [weapon](#) or [shield](#) to block [melee](#) attacks also allow that defender to block missile attacks.

Missile Attacks (Props)

Some games require special props for missile attacks. Foam balls for arrows and bolts, foam [thrown](#) weapons, nerf arrows, and other non-[packet](#) systems are possible in Accelerant games. Foam balls used as arrows or bolts require the attacker to point the launcher or implement at the target as described when using missile attacks with [packets](#). Foam [thrown](#) weapons only need to be thrown at the target. Other missile props such as nerf bows, are aimed and fired when they are used.

Foam [weapons](#) are always blockable by those skilled with [weapons](#) or [shields](#) in a manner similar to [melee](#) attacks. Like [melee](#) attacks, any foam missile attack that has no verbal causes 1 point of damage. Missile attacks with no verbal are "uncalled strikes" and cause someone to fall unconscious but stable when they reduce [Vitality](#) to zero. [Missile weapons](#) that use called damage effects cause enemies to become unstable when they fall unconscious just like called [melee](#) attacks.

Touch Delivery

If a skill or ability is delivered with a touch, then the effect is delivered by touching a [packet](#) to the shoulder or arm of a willing or helpless recipient.

Special Attacks

Special attacks are delivered in unusual ways rather than using the regular [melee](#), missile, and [packet](#) combat system. They represent large scale effects and atmospheric conditions. Special attacks always begin with the

person or area that the attack affects and that is followed by a verbal. If you have a defense that works against the verbal of a special attack you can use it to negate that attack. Once the verbal of these attacks has begun the effect is already delivered. You cannot, for example, retroactively turn to a spirit during the verbal to negate it. The individual types are detailed below.

Affliction

Someone delivers an effect to your immobile or unconscious form by touching a [weapon](#) or [packet](#) to your torso and stating "Affliction One, Affliction Two, Affliction Three" clearly and slowly followed by a verbal. This works like a [Death Strike](#) and can be interrupted in the same manner as a [Death Strike](#). The verbal may be a standard effect, or it may deliver an [Inflict](#) effect in which case the player will give you an effect card.

Gaze

Someone who has met your gaze for a full three seconds calls out or whispers "By My Gaze" followed by a verbal. A vampire might whisper "By My Gaze, [Paralyze](#) by [Will](#)." Other creatures might cause [fear](#) or other effects.

Gesture

Someone points at you with a hand or a [weapon](#) and calls out 'By My Gesture' followed by a verbal. If the effect has a duration that is not instantaneous, then instead of the normal duration, the effect lasts so long as they point at you.

Name

Someone calls out "By Your Name," states your name, part of your name, or some pseudonym that you have used and calls out a verbal. The attack is delivered to you if you recognize that name as a name you have used or a name that person might use to refer to you. Basically if you know they are talking about you then you take the effect.

Room

Someone calls out "In This Room" and an effect and everyone in that room will be affected by it. Doorways and gates act as room dividers. This delivery is commonly used for traps and performances. The attack only works in an enclosed room with normal doorways and corridors leaving it. The attack will affect you if any part of you is within the room when the verbal is called.

Search Response

Someone calls out an effect after you search them or use a special Search effect upon them. If multiple people are currently searching a creature (for some reason) then all searching characters take the effect.

Voice

Someone calls out "By My Voice" and an effect and everyone who hears it will be affected by it. You cannot defend against Voice attacks by intentionally obscuring the sound of the verbal with loud noise or by plugging your ears.

Vitality

Vitality is a count of how much damage you can take before you collapse. As you take damage, your Vitality points are exhausted. These points can never drop below zero. Healing refreshes Vitality, and these points are also refreshed at the beginning of each event. If your Vitality ever reaches zero you will collapse and become unconscious. [Unconscious](#) characters that are taken down by uncalled [melee](#) or [missile](#) hits are stable. Characters taken down by any other kind of damage, from called [melee](#) or [missile](#) hits, from firearms, from traps, from [packets](#), or from anything with a verbal become unstable.

If you fall unconscious but you are stable, you will remain unconscious for five minutes. After that time you will wake up with 1 point of Vitality. If someone hits you with an attack for called damage while you are unconscious and stable you will become unstable and begin your 1 minute count. Other effects can be inflicted upon you while you are unconscious and stable and those effects will still be active when you wake up. If healing raises your Vitality above 0 then you will become conscious. A death strike successfully delivered to your torso will kill you.

If you are unconscious and you are unstable you are dying from blood loss and shock. You will linger for one minute before dying. A [Stabilize](#) effect will change your condition to stable and you will begin your 5 minute count. Other effects can be inflicted upon you while you are unstable and those effects will still be active if you wake up. If healing raises your Vitality above 0 then you will become conscious. A death strike successfully delivered to your torso will kill you. If someone begins to use First Aid on you, your count will be suspended until they stop the First Aid. If they call [Stabilize](#) you become stable and start your five minute count. If they do not finish the First Aid, your one minute death count will continue where it was before they started using the skill.

When you die, all active effects on your person end unless an [Imbue](#) or [Inflict](#) effect specifically says otherwise on the effect card. Your remains will linger for five minutes before you change to a spirit of the dead and begin to walk to the gate of death. Only effects with "to [Spirit](#)" or with "to Dead" traits will affect a spirit of the dead.

Unconscious

You are incapacitated and must collapse to the ground. You must close your eyes and you cannot move or speak while you are unconscious. You cannot use game skills unless a skill explicitly explains that it can be used while unconscious.

Rule of Etiquette

Players who are unconscious close to combat may open their eyes to watch for out-of-game danger if the battle moves too close. It is important for players to be able to protect themselves during these times. If you open your eyes for safety reasons then we ask that anything you see during that time remain outside the normal knowledge of the game.

Death

There are four ways you can die in this game:

1. **Bleeding Out** - You can be knocked unconscious and unstable and remain that way for a full minute. This is referred to as "bleeding out" and is described above.
2. **Death Strike** - You can be killed if someone delivers a successful [Death Strike](#) to your torso.
3. **Death Effect** - You will be killed by an attack with a Death effect that you cannot negate.
4. **Mishaps** - Special areas might cause your death if you have a mishap.

Death Strike

A death strike is used to kill an unconscious or immobile victim. You must touch a [weapon](#) to the torso of the victim while saying "Death strike one, death strike two, death strike three". This verbal must be spoken clearly and at a normal speaking pace. You do not need to have skill with the [weapon](#) to inflict a death strike.

To inflict a death strike, the victim must be unmoving. The victim can be unconscious or unmoving because of a game effect, but you cannot inflict a death strike on a body until it comes to rest after an attack, nor can you inflict a death strike on a helpless but struggling victim. If the victim can move, the victim can prevent a death strike. First you must render the victim unconscious or unmoving, and then you may inflict a death strike.

To interrupt a death strike, you must strike the person attempting to deliver the death strike with a [melee](#), [missile](#) or [packet](#) attack. You may also interrupt the death strike by striking the [weapon](#) used to perform the death strike with a [weapon](#) of your own. You do not have to force the [weapon](#) away. A death strike that is interrupted is canceled and has no effect.

The “Death” Effect

Any effect that successfully inflicts a Death effect kills you immediately. Of all the various game effects, only the Death effect will kill you outright. The Death effect may be nullified by an appropriate defense.

Mishaps

There might be large scale traps, challenges, and mishaps in special areas that can cause you to perish if you are unfortunate enough to stumble into them. Closing walls, deep pits, and other deadly traps might kill you outright. These areas will be marked or made clear to you during the course of the game.

Spirits Of The Dead

After 5 minutes of death, a dead character becomes a spirit of the dead. Your spirit and everything you still carry is drawn to a special area of the game marked as a Death area. Your spirit will even pick up your own [weapons](#) if they are within reach unless someone else possesses them. When you rise as a spirit you must proceed directly to the Death area. You must walk with your head bowed and your arms at your side. You cannot interact with any other character unless they use an ability that allows you to do so. You cannot drop items. You cannot use any game ability. If someone tries to interact with you, reply “[Spirit](#)” and continue on your way.

While you are a spirit of the dead, there are very few effects that will work on you. The only effects that will work are effects with “to [Spirit](#)” or “to Dead” in the verbal. These are [Bane](#) effects specifically designed to affect spirits. The most common is a “[Speak](#) to Dead” effect. This type of “[Speak](#)” effect will allow you to converse quietly with the character who used the effect. You cannot stray from your path or use any game skill while talking. You are not compelled to communicate, but you may do so. Other effects might include “[Imbue to Spirit](#)” and “[Inflict to Spirit](#).” If the description on the effect card states that it works on a spirit of the dead then you must follow the instructions given therein. You may use [Resist](#) and [Purge](#) defenses while you are a spirit of the dead if they are appropriate for an attack that strikes or affects you.

Final Death

If the spirit cannot return from the Death area then the character passes beyond this world and is said to have taken a final death. Final death means that you can no longer play the character in question, and adds an air of danger to the game by threatening your in-game persona.

Attack Effects

The effect of an attack describes how that attack benefits or impairs you. The effect is the first part of any verbal. Some effects target items rather than characters. Each effect has a duration, but curing or removing that effect will end it.

Game Time

As the game progresses during an event, players generally spend time interacting with other characters, moving from place to place, and engaging in combat and other game activities. Some skills or game effects require a specific passage of time as a requirement of their use or removal. Players are expected to count out this time. This counted time is spent either to [Rest](#) or to [Focus](#).

Time spent to rest or focus is interrupted if you use a game skill. This includes making an attack or blocking an

attack with a [weapon](#) or [shield](#). Spending time to rest or focus must be obvious to those observing you; you cannot spend time, for example, to rest or focus if you are standing in a combat stance or otherwise appear to be participating in active combat.

When spending time as a requirement of using game skills, interruptions require you to begin the process at the start but these interruptions don't generally exhaust the costs of using the skill or ability unless that ability explicitly says otherwise in its description. If you begin, for example, to [Focus](#) for one minute to use a skill which can only be used once per event, or which uses an [attribute](#) point, the skill or [attribute](#) is not generally used up if you are interrupted while trying to use the skill.

Many games have a set of skills or [attributes](#) that can be refreshed when you have a chance to rest. Some games also define skills or resets that require you to be within a safe zone, workshop, haven, or sanctuary while you focus or rest. This prevents you from using these resets or skills while you are out in the field or away from these areas.

Rest

Resting involves spending time out of action where you have a chance to regain your energy and composure. Rest requires you to be sitting, lying, or kneeling. It must be obvious that you are resting. You cannot walk or run. You can interact with those nearby while resting. You are resting if you are dead, paralyzed, stunned, or unconscious. Paralyzed characters are resting even if they are standing or in some other paralyzed position.

Resting is not generally interrupted by game effects, regardless of delivery. Although you cannot use optional defenses without interrupting your rest, calling out mandatory defenses does not interrupt rest. Calling out "[Spirit](#)," "[No Effect](#)," "[Guard](#)," "[Elude](#)," or "[Shield](#)," for example, would not interrupt rest unless the specifics of the skill or ability you were using somehow made the call optional.

Rule of Etiquette

Players with bad knees or physical impairments may be given plot permission to stand with their arms raised and their hands behind their head to indicate they are resting on the field.

Effects which require rest can overlap; what this means is that a single rest time can be used for multiple effects. If you had a game skill that allowed you to reset some kind of magical defense after a minute of rest, and you were affected by a [Root](#) effect, and you were affected by a [Weakness](#) effect you could rest for five minutes and apply the time to all three benefits. The [Root](#) would end, the [Weakness](#) would end, and the skill could be used to reset the defense.

Game skills will instruct you by saying "Rest for," followed by a time period, followed by the results of the rest.

"Rest for one minute to end this effect."

"Rest for ten seconds and call out "[Heal](#) 2 to [Self](#)" to use this skill.

You Are Well Rested

If you are in the process of resting, particularly when resetting skills or [attributes](#), and a game character tells you "You Are Well Rested" then your rest time is considered completed. Effects that end with rest are removed, and [attributes](#) and skills that require rest are refreshed. This will not end [Imbue](#) or [Inflict](#) effects, or effects that last for an entire event or more. If a reset has, in addition to the rest time, costs associated with it then you are still responsible for paying those costs to gain the benefit of the rest.

Focus

Focusing represents some task that requires your concentration. Focusing might be required to repair [armor](#), mend wounds, or meditate to remove an effect. You must spend the time role playing in a manner appropriate for the skill or ability you are using. You may talk with others during this role play time if you wish so long as the

skill or ability description does not have additional restrictions which prevent this. Focusing requires that you stay in one area as you role play the activity. You cannot walk or run. Using other game skills, using called attacks, or using called defenses interrupts your focus time. Skills and abilities which require Focus do not overlap; what this means is that if you have two different skills with a Focus requirement the Focus time spent on one ability cannot be applied to any other activity. You have to role play each Focus time separately to use the associated ability. Effects that prevent you from using game skills also prevent you from spending time to Focus to use or refresh abilities. You cannot [Rest](#) while you Focus; the times do not overlap.

Game skills will instruct you by saying "Focus for," followed by a time period, followed by the role play needed to act out the skill, followed by the result of the Focus.

"Focus for one minute, repairing your [armor](#) at a forge, to refresh your [armor points](#)."

"Focus for one minute, binding the limb of the wounded character" and call "[Cure Maim](#)" to tend to the broken limb.

"Focus for three seconds, shaking off your fear, to purge one [Fear](#) effect."

Focusing is interrupted if any game effect that is not beneficial affects you regardless of the delivery. While you do not exhaust any costs associated with the skill or ability (unless the description explicitly states otherwise) you must start the entire process from the beginning. This means that calling any defense, optional or otherwise, interrupts your focus.

Travis and Gerard, for example, each have a skill that provides [armor points](#). Travis has a skill that requires [Rest](#) for one minute to refresh his [armor points](#). Gerard has a skill that requires Focus for one minute, where he role plays repairing his [armor](#), to refresh his [armor points](#). Both sit down to rest off a [Weakness](#) effect. During that time, Travis may also refresh his [armor points](#). Gerard would still have to focus for one minute to refresh his [armor](#).

Beneficial Effects

Effects that are intended to aid, bolster, or benefit a character are marked as Beneficial effects. If, for some reason, the recipient does not want to receive the benefit of one of these effects they may say 'Refuse' to negate the attack or delivery.

Effect Listing

Agony

You are wracked with pain. You cannot attack or use most game skills. You may run, defend yourself by blocking with [weapon](#) skills and can use called [defenses](#). Agony lasts for 10 seconds.

Cure, Remove...

Beneficial Effect (Cure only)

Cure removes one effect on the target. A Cure [Effect] will remove one instance of the specified effect. A Cure [Trait](#) will remove one effect with the appropriate trait except [Imbue](#) and [Inflict](#) unless the [Imbue](#) or [Inflict](#) card specifically says otherwise. If the Cure verbal is followed by 'All' then all appropriate effects end. If you have more than one appropriate effect, you may choose which will end when a Cure effect is applied to you. Cure will never restore [Vitality](#). Cure is a beneficial effect.

Step-by-step Example:

- Travis has been affected by the following attacks:
 - Slow by Disease
 - Slow by Will
 - Drain by Will
- If Travis receives a **Cure Slow** effect:
 - He can choose to remove either:
 - The Slow by Disease, **or**
 - The Slow by Will
- If Travis receives a **Cure Will** effect:
 - He can choose to remove either:
 - The Slow by Will, **or**
 - The Drain by Will
 - (since both have the Will trait)
- If Travis receives a **Cure All Slow** effect:
 - Both Slow effects are removed:
 - Slow by Disease
 - Slow by Will

Special Cure Cases:

If a "Cure Maim" effect references a specific limb, the effect will only remove Maim effects on that limb. If the Cure Maim effect does not specify a limb, it will cure one Maim effect active upon the target. If an ability or skill allows you to use the "Cure Maim" effect on a specific limb, you touch a packet to the specified limb to indicate which limb. A 'Cure All Maims' effect will remove all Maim effects upon you regardless of limb.

A "Cure Death" effect will restore a dead target to life and leave them with 1 Vitality unless that target has transformed to a Spirit of the dead.

Once a character has transformed to a Spirit of the dead, only the rare "Cure Death to Spirit" effect can restore them to life, and only if it is used before the Spirit reaches its destination.

A "Cure [Trait Name] Trait" effect will remove a trait given to you by an Inflict, Imbue, or other effect that is temporary. It has no effect on a permanent trait granted by race, skill, or the like.

Remove vs Cure:

Remove is used to simulate dispels or forced removal of effects. Remove works just like Cure except it is not a beneficial effect. This has several side effects. Where Cure can be touch cast, Remove cannot be touch cast. Where Cure can be refused because it is beneficial, Remove cannot be refused. Where Cure will not interrupt Focus, Remove will interrupt Focus. Where Cure is not negated by and does not consume Shield, Elude and Guard defenses, Remove will be stopped by and consume Shield, Elude, and Guard. Otherwise Remove works like Cure.

Damage

This effect removes Vitality points as described in the section on Vitality. Unlike typical effects, Damage is instantaneous. It removes Vitality points and then the effect ends. You cannot remove or dispel damage. Vitality points must be restored through healing.

Death

An attack with this effect kills you. You fall down dead, as if you had been struck with a death strike. All temporary effects upon you end when you are killed except for [Imbue](#) and [Inflict](#) effects that are not specifically removed by death. Death lasts for 5 minutes, after which you will rise as a spirit and travel to the Death area. This process is described in greater detail in the Spirits of the Dead section.

[Cure](#) Death and certain special abilities can affect you while you are dead. Some strengthen your spirit so it is not weakened by the presence of Death. Some might even restore you to life. Others might cause unpleasant effects. All of these will be handled using an [Imbue](#) or [Inflict](#) effect. In these cases you will be given an effect card that explains the results of the [Imbue](#) or [Inflict](#) effect.

Destroy...

An item is destroyed and cannot be used for any game skill or effect until it is repaired. For most [melee](#) delivered effects, the verbal is simply 'Destroy' and the strike will destroy the [weapon](#) it hits. For [missile](#) and [packet](#) attacks the verbal will include the name of the item and any strike will destroy that named item. A [melee](#) attack that strikes your [shield](#) and uses the 'Destroy [Shield](#)' verbal will render your [shield](#) unusable. The effect is permanent until the item is restored with a [Repair](#) effect. Some items may be truly destroyed if no [Repair](#) effect exists in the game to restore them. The item does not crumble away or disappear; the prop represents the broken item.

An attack that uses the 'Destroy [Armor](#)' verbal will exhaust all of your [armor points](#). The [armor points](#) can be refreshed or repaired normally as if they had been removed by damage. [Melee](#) attacks must successfully strike you to deliver a Destroy [Armor](#) effect. Some creatures might take some kind of detrimental effect when struck by this attack. If you want to attempt to harm a construct directly with this effect you would call out 'Destroy Form' as the verbal.

Items without tags or safety stickers (such as clothing, belts, pouches, and the like) cannot be affected by Destroy.

Diagnose

Diagnose

This effect is used to determine if the recipient is inflicted with a specific effect, trait, or game condition.

Key points:

- Skills with the Diagnose effect allow you to use Diagnose to determine the presence of specific effects or traits, **except** for [Imbue](#) or [Inflict](#) effects.
- A skill might also allow you to use Diagnose to determine if the recipient is currently **Stable, Unstable, Dead, or Damage**.
- To use Diagnose:
 - Touch the recipient with a [packet](#).
 - Say "Diagnose" followed by an effect, trait, or game condition.
 - The recipient says **"Yes"** if they are afflicted with the named effect, an effect with the named trait, or if they suffer the game condition. Otherwise, they say **"No."**

Example:

Travis is lying on the ground unstable and has been inflicted by a [Slow](#) by [Disease](#) and a [Paralyze](#) by [Magic](#). Another player approaches and tries to help:

Player: "Diagnose Stable." **Travis:** "No."

Player: "Diagnose Unstable." **Travis:** "Yes."

She uses a [Heal](#) effect on Travis, but he still doesn't move. Puzzled, she continues:

Player: "Diagnose [Stun](#)." **Travis:** "No."

Player: "Diagnose [Paralyze](#)." **Travis:** "Yes."

She has the ability to [Cure Poison](#), so she checks:

Player: "Diagnose [Poison](#)." **Travis:** "No."

She decides to wait until the [Paralyze](#) wears off.

Special Note:

- If someone uses "**Diagnose [Damage](#)**" on you, you may choose, for the sake of expediency, to include in your reply the current number of [Vitality](#) points that have been removed by [Damage](#).
 - For example, if you have taken two damage that has not been healed and someone uses "Diagnose [Damage](#)" on you, you may reply with a simple "**Yes**" or you may reply with "**Yes, two.**"
 - The choice of how to respond is up to you.

Disarm...

You must drop everything in the hand indicated by the verbal. You can pick up items immediately after they have come to rest. You may pick up an item as soon as it stops moving. The verbal will contain either "Disarm right hand" or "Disarm left hand." If you are holding a fragile or breakable prop, including an air gun, you may put it down rather than drop it, but in this case you cannot pick it up for a full five seconds.

Delivering this effect with a [melee](#) attack requires you to strike that [weapon](#) while calling the Disarm effect. You do not need to specify a hand. The hand that is holding the [weapon](#) will be affected. A [melee](#) delivered Disarm will not affect a [shield](#) unless the "Disarm [Shield](#)" verbal is used. You cannot disarm a [shield](#) unless a skill or ability specifically allows the use of "Disarm [Shield](#)."

Rule of Etiquette

Delivering a Disarm effect against a [weapon](#) requires an attack against the opponent's [weapon](#). You must finish the verbal and move your [weapon](#) forward, attacking with the legal striking surface. You cannot call Disarm if you are simply blocking your opponent's attack, you must be making an effort to strike at the [weapon](#).

Disengage

To initiate this ability either take a step back or plant your feet for 3 seconds. [Gesture](#) at any number of opponents with your weapons. You cannot move towards any target. Everyone who is attacking you and everyone indicated by the gesture of your [weapon](#) must move back out of [weapon](#) range so that you cannot cross extended weapons. Targets that are rooted or cannot move back may cross their arms and lean away from the effect instead of backing up. Once the distance has been increased and the space indicated by the Disengage has been cleared by all targets (or everyone has crossed their arms and leaned away) the effect ends. Disengage will not force a target into a dangerous area. A target may choose to cross arms and lean back rather than stepping back into an area that will cause them some detrimental effect. Disengage is not a [melee](#) delivered attack and cannot be negated by defenses that stop [melee](#) attacks.

Drain

For a simple Drain effect, you cannot run or use any game skill, including [weapon](#) and [shield](#) skills. If the verbal is followed by a skill or ability name then you cannot use that particular skill. Drain can also be used to prevent entire skill headers. If a header is drained, you cannot use any skill that falls under that header. Drain can be used in this manner to suppress racial abilities and empowered named items. If an item is named after a Drain effect then no abilities from that item can be used until the Drain ends. Only simple Drain effects prevent you from running. The Drain effect will last until you rest for five minutes.

Expose...

The Expose effect is followed by one trait. If you have that trait and are subjected to this effect, you must cry out, revealing the fact that you have the trait and revealing your position. You must cry out as loudly as the Expose effect was called.

Although you may cry out softly if the Expose was called softly, you still must make every effort to ensure that you are revealed to the person who called the effect. The Expose effect is audible and you must cry out even if you are unconscious or under the effects of a [Silence](#), [Stun](#), [Paralyze](#), or other disabling effect.

You are not affected if you are Dead or have the [Spirit](#) defense unless the Expose effect targets those specific traits. This effect is one of the few that will commonly be delivered by voice.

Frenzy

This effect causes you to attack the closest creature to you, regardless of recognition or consequence. You may attack with any standard skill that is not beneficial, though you are not forced to use consumable skills in this attack. If you are affected by a [Repel](#) effect, or if you are not affecting the creature in question, or if you cannot find a way to reach the creature for 10 seconds you will move on to the next closest creature. If someone else attacks you and that creature is more convenient than your current target then that creature will become your new target. The effect ends when you are rendered dead or unconscious.

Grant...

Beneficial Effect

You receive a boon, blessing, or magical buff that enhances you in some way. There are a number of specific Grant effects, each with their own benefit. All Grant effects end if you die, and when the event ends.

Grant effects have some restrictions:

- As a default you can have no more than three Grant effects at one time.
- Each type of Grant listed below also has its own additional restriction.

Grant effects are negated with the [Remove](#) effect. A "[Remove](#) Grant" effect will negate one Grant effect of your choice, while a "[Remove](#) All Grants" will remove all existing Grant effects. [Remove](#) effects can also specify a type, such as "[Remove](#) [Armor](#) Grant" or "[Remove](#) All Defense Grants." In addition, a [Remove](#) <[Trait](#)> effect will negate any Grant effect that also used that trait.

There are five types of Grant effects.

... [Armor](#)

"Grant [Armor](#)"

"Grant 2 [Armor](#) by [Inspiration](#)"

This Grant adds additional [armor points](#) to either physical [armor](#) or [armor](#) from other abilities. These points are refreshed when your [armor points](#) are refreshed. If no number is indicated then this effect boosts your [armor points](#) by 1. The effect might indicate a higher number in the verbal such as "Grant 2 [Armor](#)" to indicate that a greater number of [armor points](#) have been granted.

You may only have one Grant [Armor](#) effect active.

... Attribute

*"Grant **Fortitude**"*

*"Grant 2 **Vitality** by **Magic**"*

*"Grant 2 **Insight** by **Inspiration**"*

This Grant adds to the total of one numeric **attribute**. Any points added with this effect are available immediately for use. Effects which refresh that **attribute** can also refresh these additional points. These extra points can be exhausted to fuel skills and abilities in the same manner as regular **attribute** points.

If the **attribute** indicated is **Vitality** then **Heal** effects will also restore these additional points. **Vitality** calculations and other secondary **attribute** calculations are not affected by points added by the Grant effect to another **attribute** used in that calculation.

No **attribute** can be modified by more than one Grant effect.

... Protection

*"Grant **Protection**"*

*"Grant 3 **Protection** by **Inspiration**"*

This Grant adds additional protection points that negate points of damage. These protection points work in a manner similar to **armor**, negating the indicated amount of damage regardless of the source. The number of points is indicated after the "Grant" in the verbal, and if no number is indicated then the ability grants a single protection point. Protection points are always lost after **armor points**. Protection points are not affected by **Waste Vitality** effects. Protection points cannot be refreshed or renewed. Once they are used to negate damage the effect ends.

You may only have one Grant Protection effect active.

... [Type] Defense

*"Grant **Poison** Defense, **Shield**"*

*"Grant **Defense** by **Inspiration**, **Elude** by **Blur**"*

*"Grant **Melee** Defense by **Magic**, **Parry**"*

*"Grant **Packet** or **Missile** Defense, **Avoid**"*

This Grant gives you a called defense that works against the **Trait** or **Effect** indicated in the [Type] portion of the verbal. The first half of the verbal is information about the Grant itself, and it can include a trait. The second half of the verbal tells you what to call when you use the defense. If no [Type] is specified then the defense can be used against any **melee**, **missile**, or **packet** attack.

Once this defense is used the Grant effect ends. Grant effects which give you **Elude**, **Guard** or **Shield** effects must be used against the first appropriate attack that strikes you. Grant effects which give you **Avoid**, **Parry** or **Resist** defenses can be used against any appropriate attack and you can choose whether or not you will use the defense. The **Purge** defense requires you to wait for three seconds and call **Purge** to end an appropriate effect. **Elude**, **Guard**, and **Shield** defenses that protect against **melee** attacks must be used against uncalled **melee** attacks that strike you.

Once you have a Grant that protects against a specific [Type] of attack you cannot have another Grant that also defends against the type. You must choose which one to keep. This restriction also applies to a Grant Defense call which has no specified type; you cannot only have one Grant Defense effect that is unspecified.

- A "Grant Defense by *Shadow*, *Avoid* by *Shadow*" would give you one defense against any *melee*, *missile*, or *packet* attack. You could choose to take an attack and save the defense for later. You would call out "*Avoid* by *Shadow*" when you used the ability.
- A "Grant *Poison* Defense, *Shield*" would give you one defense against any attack with the *Poison* trait. You would have to use this defense against the first *Poison* attack that strikes you. You would call out "*Shield*" when you used the ability.
- A "Grant *Missile* Defense by *Wind*, *Avoid* by *Air*" would give you one *Avoid* defense against a *missile* attack. You could choose to take the attack and save the defense for later. You would call out "*Avoid* by *Air*" when you used the ability.

Sylla has an active grant effect with the verbal "Grant *Poison* Defense, *Shield*" on her. She receives a new Grant effect with the verbal "Grant *Poison* Defense by Faerie, *Resist*." Sylla cannot have two Grant Defense effects with the same type, so she must choose one and decides to take the resist and let the *shield* end. Later, Sylla receives a new Grant effect with the verbal "Grant *Disease* Defense, *Resist*." Sylla can accept that Grant effect since her current Grant works against *Poison* and the new Grant effect works against *Disease*.

Travis has an active Grant effect with the verbal "Grant Defense, *Avoid*." He knows he can call out "*Avoid*" to negate one *melee*, *missile* or *packet* attack because the type isn't specified. Travis receives a "Grant Defense, *Shield*" but decides to keep the avoid and the new Grant effect is lost. Later, Travis receives a "Grant *Packet* Defense, *Avoid*." He can keep that defense and his previous Grant because the type in the Grant verbal is not the same as one is unspecified and thus defaults to "*Melee*, *Missile* and *Packet*" and the other is specified as a "*Packet*" defense.

... [Delivery] Attack

"Grant *Melee* Attack, 2 *Damage*"

"Grant *Missile* Attack by *Venom*, *Agony* by *Poison*"

"Grant *Packet* Attack by *Magic*, *Stun* by *Fear*"

"Grant *Attack* by *Arcane*, 5 *Damage* by *Fire*"

'Grant Touch *Attack*, *Heal* 2'

This Grant gives you one called attack that uses the appropriate delivery. If the delivery is omitted the recipient may choose *melee*, *missile* or *packet* for the delivery when they receive the effect. You may use a *melee* or *missile* attack only if you have a skill that allows you to make such attacks and the props on hand to make an attack with the specified delivery. You may use a *packet* attack only if you have a *packet* on hand to make the attack. For *melee* and *missile* attacks, the attack is exhausted and the Grant effect ends only if the strike lands and the opponent acknowledges it with role play or negates it with a defense. For *packet* attacks the Grant effect ends when you use the attack whether it hit or missed. If the attack is a beneficial effect the delivery can also be specified as 'Touch.'

As a default you can have no more than one Grant *Attack* effect.

- A "Grant *Melee* Attack by *Shadow*, *Weakness* by *Shadow*" would give you one *melee* attack with the *Weakness* by *Shadow* effect. You would call out "*Weakness* by *Shadow*" when you used the ability.
- A "Grant *Packet* Attack, 2 *Damage* by *Fire*" would give you one *packet* attack and you would call out "2 *Damage* by *Fire*" when you used the ability.
- A "Grant *Attack*, *Paralyze* by *Will*" would allow you to choose *melee*, *missile*, or *packet* as the delivery and you would gain one attack of that type with "*Paralyze* by *Will*" as the verbal.
- 'Grant Touch *Attack* by *Divine*, *Cure Poison*' would allow you to touch a *packet* to a willing subject to cure a *poison* effect. Like any beneficial effect, the recipient could refuse the effect.

Grant Extra...

Grant effects that begin with "Grant Extra" can overcome stacking in the following ways:

- An [attribute](#) modified by a Grant effect can also have one "Grant Extra" effect that stacks.
- [Armor](#) modified by a Grant effect can also have one "Grant Extra" effect that stacks.
- You can have both a "Grant ... [Protection](#)" and one "Grant Extra ... [Protection](#)" effect and the effects stack.
- You can have both a "Grant ... [Defense](#)" and one "Grant Extra ... [Defense](#)" at the same time.
- You can have both a "Grant ... [Attack](#)" and one "Grant Extra ... [Attack](#)" at the same time.
- Grant Extra effects do not count towards your three Grant effects.

If you already have an active "Grant Extra" effect, you can accept one regular Grant effect; you need not receive the "Grant Extra" effect after a regular Grant effect to allow them to stack. You cannot accept two 'Grant Extra' effects, even if you have no Grant effect that did not include 'Extra' in the verbal.

Example:

Travis has a "Grant 2 [Armor](#)" effect that brings his [armor](#) total to 4. A servant of his divine patron visits him before a big battle and gives him a "Grant Extra [Armor](#)" effect on him. He now has an [armor](#) total of 5, but he could not have an addition "Grant [Armor](#)" nor another "Grant Extra [Armor](#)" active.

Sylla has only a "Grant Extra Magic Defense, [Resist](#)" upon her. A friendly wizard gives her a "Grant Magic Defense, [Shield](#)" to her. She can accept this effect because her other "Grant ... [Defense](#)" effect is an "Extra" Grant effect.

Double and Triple

Grant effects with the [Double](#) or [Triple](#) qualifier will provide multiple uses of the specified attack or defense but only count as a single Grant effect. In other words, you can have a "[Triple](#) Grant [Melee Attack](#) by Skill, 2 [Damage](#)" effect that grants you three [melee](#) attacks each which do "2 [Damage](#)" even though you are normally allowed only one Grant effect with the Skill trait. Since numeric effects do not stack this is only relevant for Grant [Attack](#) and Grant Defense effects.

Heal...

Beneficial Effect

This effect restores one point of [Vitality](#). If the effect is followed by a number, then it restores [Vitality](#) equal to the indicated number. If the effect is followed by the term 'All' then all of your [Vitality](#) is restored. Otherwise it restores one point. If you are unconscious with no [Vitality](#) then Heal will restore one or more [Vitality](#) points and you will wake immediately unless some other effect is preventing you from doing so.

Imbue...

Beneficial Effect

This effect can be used in one of two ways. An Imbue effect with the verbal 'Imbue [Trait Name] [Trait](#)' will give you the specified trait for the remainder of the event.

Otherwise, this effect is some enhancement or extra ability that is described on an effect card that is given to you after the effect is used upon you. An Imbue effect with no trait will not take effect until you have read the effect card. Imbue will usually give you some ability that can be used during the current event, although the effect card might describe some effect that lasts beyond the current event.

Imbue effect cards can have a wide variety of long term plot effects. Examples include granting a defense against certain types of attack, strengthening the spirit of a dead character, and similar exceptional abilities.

If a player can use an Imbue effect, that ability will always have some in-game action that must be accomplished before you can use the ability. You might need to gather and mix components. You might need to construct some item from strange parts. These actions earn you the effect card needed to use this effect. You can never use an Imbue ability without the appropriate effect card to represent the properly prepared components.

Inflict...

This effect can be used in one of two ways. An Inflict effect with the verbal 'Inflict [Trait Name] [Trait](#)' will give you the specified trait for the remainder of the event.

Otherwise, this effect is some affliction or detrimental effect that is described on an effect card that is given to you after the effect is used upon you. An Inflict effect with no trait will not take effect until you have read the effect card, so a character engaged in combat may not be affected by Inflict effects described on Inflict cards immediately; they have time to retrieve the effect card and read it when it is convenient and unobtrusive to do so. [Unconscious](#) or dead characters must read the card immediately. Inflict cards will give you some unusual detriment that will have an effect and a duration described on the effect card.

Inflict effect cards can have a wide variety of long term plot effects. Examples include causing death after a certain amount of time, causing you to transform into some type of creature, inflicting you with a disease that cannot be healed normally, weakening the spirit of a dead character, and similar exceptional abilities.

Defenses can be used to negate Inflict attacks if those defenses will stop an attack with the appropriate delivery or trait.

If a player can use an Inflict effect, that ability will always have some in-game action that must be accomplished before you can use it. You might need to gather and mix components. You might need to construct some item from strange parts. These actions earn you the effect card needed to use the ability. A player can never use an Inflict ability without an effect card to represent the properly prepared components.

Maim

One limb becomes useless. An arm must hang at your side and cannot be used for any game ability. A leg becomes unusable. You must go down on one knee - you cannot hop. You may crawl using your other limbs. A Maim effect will last for the duration of the event. If a Maim effect is delivered by a [melee](#) or [missile](#) attack, the limb struck will be affected. If a Maim effect delivered by a [melee](#) or [missile](#) attack strikes the torso then the Maim effect is ignored. If a Maim effect is delivered by a [packet](#), the attacker can include the limb in the verbal. For example, a caster might call out "Maim Right Leg by [Fire](#)." If the limb is not specified, then the subject may choose one limb that is not already affected by a Maim. Maim only works on arms and legs.

Paralyze

You must stand frozen. You cannot move, but you are aware of what is happening around you. If you are rendered unconscious, or if someone tries to change your pose, you will collapse to the ground. Paralyze will last until you rest for five minutes. You are resting while you are paralyzed even if you are standing.

Refresh...

Beneficial Effect

Refresh is always followed by either an [attribute](#) or a skill that has a limited number of uses. You recover one or more uses of the named skill or one or more points of the named [attribute](#). If you do not have the named skill or [attribute](#) then the Refresh has no effect. As a default, Refresh restores one point or use of a skill. If a number is placed before the [attribute](#) or skill name then you will restore more [attribute](#) points or uses of a skill. Skills that require [attributes](#) cannot be restored directly and are unaffected by a Refresh effect. Refresh will never raise you above your maximum [attribute](#) or give you more uses of a skill than you would have at the start of an event.

Refresh can also be used to restore abilities of an empowered item. If the item has a unique name and Refresh is followed by that name then the abilities of the item are restored.

Repair...

Beneficial Effect

You restore one item that has been rendered unusable by a [Destroy](#) effect. For an item you are touching you need not specify a target in the verbal. For other types of abilities you specify a target after the Repair verbal. Repair may also be used to refresh [armor points](#). A "Repair [Armor](#)" effect will restore one [armor point](#) of your current active [armor](#). A Repair <Number> [Armor](#) effect will restore a number of [armor points](#) equal to the indicated amount, or all [armor points](#) if the number of exhausted [armor points](#) is lower than the indicated amount. "Repair All [Armor](#)" will restore your [armor](#) to its maximum value.

Repel

This effect prevents you from using [melee](#), [missile](#), or [packet](#) attacks on the attacker. You will also attempt to stay 10 feet away from the attacker unless doing so would endanger you. If this is the case you may move to a safer position even if it takes you within 10 feet, so long as you then attempt once again to stay 10 feet away from the attacker. You cannot use [melee](#), [missile](#), or [packet](#) attacks on the attacker in any case. The Repel effect will last until you rest for five minutes unless the attacker strikes you with a [melee](#) attack that does not cause a Repel effect. If the attacker strikes you with a [melee](#) attack using an effect that is not Repel then this effect ends immediately.

The attacker is not immune to the attacks of a character affected by the Repel. That character is free to launch attacks at other creatures so the attacker should be careful to stay clear of other potential targets and avoid attacks launched at other characters.

Root

You cannot move your right foot from its spot. You may pivot on that foot, and you may move your left foot. A Root effect will last until you rest for five minutes.

Silence

You cannot talk or make any in-game verbal noise. You cannot use game skills that require incantations. You must still call out during [Expose](#) effects. You must still use out-of-game phrases as normal. A Silence effect will last until you rest for five minutes.

Slam

Some great force knocks you back and off your feet. When you are struck with this effect you role play an extremely forceful blow or blast. You may take up to three steps backwards and fall down. The steps backward are optional. The effect ends when your chest or back touches the ground. If falling to the ground is an issue due to ground quality, crowding or health you may opt to instead take your steps, drop to a knee and place both hands palm down on the ground as shake your head for three seconds.

Some Slam effects are so powerful they knock you back through a [shield](#). If you hear "Shield Slam" it works even if it strikes your [shield](#). This attack can be blocked by a [weapon](#) and would count as a strike to the limb holding the [shield](#).

Slow

You cannot run. You may only walk at a normal pace. The Slow effect will last until you rest for five minutes.

Stabilize

Beneficial Effect

If you are at 0 [Vitality](#) and unstable this effect makes you stable. You start your 5 minute count. Otherwise you call "No Effect."

Stricken

You are unaffected by any beneficial effect unless it removes the Stricken effect from you. Call "No Effect" to any other beneficial effect used on you.

There is one exception; if someone uses First Aid on you then the [Stabilize](#) effect will work. Only a "Cure Stricken" effect or a [Cure](#) effect applied to the trait of this attack will remove this effect. An effect that removes the Stricken effect from you will not remove other effects. Stricken does not work on items you carry or wear and items may be affected by [Repair](#) or [Imbue](#) effects. The Stricken effect will last until you rest for five minutes.

For example, if you have a Stricken by [Poison](#) and a [Paralyze](#) by [Poison](#) effect upon you, a [Cure Poison](#) effect will remove the Stricken effect but it won't also remove the [Cure Paralyze](#) effect. A second [Cure Poison](#) would be needed to remove the [Paralyze](#) by [Poison](#) effect.

Stun

You are knocked unconscious. Stun will last until you rest for five minutes. You are resting while you are stunned. Another character may take a full minute of role play to revive you and end this effect.

Speak

Beneficial Effect

This effect allows you to converse with a creature or being that cannot otherwise communicate with you. It is usually used with the [Bane](#) trait, allowing you to speak with specific types of creatures. The subject is under no obligation or compulsion to speak with you, but it may do so if it wishes. The Speak effect will last until a participant uses another game skill or until a participant move out of reasonable conversation range.

Waste...

Waste is always followed by either an [attribute](#) or a skill that has a limited number of uses. You lose one or more uses of the named skill or one or more points of the named [attribute](#). Waste has no effect if you have no [attribute](#) points or skill uses left. If you do not have the named skill then Waste to that skill has no effect. As a default, Waste removes one point or use of a skill. If a number is placed before the [attribute](#) or skill name then you will lose more [attribute](#) points or uses of the skill. Skills that require [attributes](#) cannot be wasted directly and are unaffected by a Waste effect.

Wasted [attribute](#) points and skill uses can be refreshed. A [Cure](#) Waste effect will restore points or skill uses lost to Waste effects unless they have already been refreshed or restored by some other means. Once a wasted [attribute](#) or skill use has been refreshed a [Cure](#) Waste effect will have no effect on you. [Attributes](#) and skills lost to a Waste effect are always refreshed before points lost through normal use.

Waste can also be used to remove abilities of an empowered item. If the item has a unique name and Waste is followed by that name then any charged abilities of the item are removed as if they had been used.

A Waste **Vitality** effect will reduce your current **Vitality** total. This effect ignores **armor points**, but is otherwise treated as a called **Damage** effect and will render you unstable if it removes the last of your **Vitality** points.

Weakness

Your ability to strike with **melee** attacks is severely weakened. You cannot deliver any called effects with your **melee** attacks. Weakness does not affect uncalled strikes or any other weapon skill. The Weakness effect will last until you rest for five minutes.

Attack Traits

Most attacks include a descriptive trait. This trait is indicated by the second part of the verbal. The trait of an attack adds flavor to the attack and determines whether certain defenses can be used to negate the attack. If an attack is "5 **Damage** by **Fire**" then the trait of the attack would be **Fire**.

The "by **Weapon**" trait is dropped from the verbal of normal **melee** attacks to reduce noise. Any **melee** or **missile** attack with no trait is assumed to have the "**Weapon**" trait.

Most attack traits allow you to role play the effect. You may step back or cry out in reaction to the attack. If you are surprised by an attack, however, you cannot add additional role play to the effect. For example, if you were hit by a "**Stun** by **Force**" from a visible enemy then you could add the role play of crying out or staggering back. But if someone sneaks up behind you and calls out "**Stun**" with a **melee** attack then you should just go down. If someone sneaks up and surprises you with a spell that you honestly did not see coming, you should not cry out to warn your friends.

Elemental Traits

These include **Air**, **Cold**, **Earth**, **Fire**, **Ice**, **Lightning**, **Water**, and **Wind**. The effect is caused by elemental power. Abilities that work against Elemental effects will work against effects with any of these traits. You may role play an Elemental effect by crying out or stepping backwards as the effect is inflicted.

Mental Traits

These include **Awe**, **Confusion**, **Despair**, **Fear**, **Gloom**, **Inspiration**, **Madness**, **Presence**, **Trance**, and **Will**. The effect is caused by some mental or emotional reaction. Abilities that work against Mental effects will work against effects with any of these traits. You may role play a Mental effect by crying out or stepping backwards as the effect is inflicted.

Metabolic Traits

These include **Aging**, **Air**, **Cold**, **Disease**, **Poison**, **Radiation**, and **Sleep**. The effect is caused by a Metabolic reaction. Abilities that work against Metabolic effects will work against effects with any of these traits. You may role play a Metabolic effect by crying out or stepping backwards as the effect is inflicted.

Physical Traits

These include **Crystal**, **Earth**, **Force**, **Ice**, **Silver**, **Thorns**, **Weapon**, **Web**, and **Wind**. The effect is caused by a Physical force. Abilities that work against Physical effects will work against effects with any of these traits. You may role play a Physical effect by crying out or stepping backwards as the effect is inflicted.

Special Traits

All traits not included above are Special traits. These can include, but are not limited to, **Acid**, **Blessing**, **Curse**, **Light**, **Magic**, **Malediction**, and **Shadow**. These traits are not included in any general trait, so abilities must specifically include them. Special attacks allow no additional role playing; you will suffer the effect of a Special attack immediately.

Bane

This is a unique attack trait that works against another specific trait, and targets only those creatures that have that trait. Instead of saying "by" you would say "to" and state the trait that is targeted. An attack that stated "10 [Damage](#) to Undead" would be an example of an attack with the Bane trait, and the attack would only affect creatures with the Undead trait. If you somehow lose the trait that a Bane effect targets while under that effect, then the effect ends immediately. So, if you had a 'to Dead' effect upon you and you were brought back to life then the 'to Dead' effect would end. Remember that the race of a character is always considered to be a trait of that character. Bane attacks allow no additional role playing; you will suffer the effect of a Special attack immediately.

Some effects may have both a normal trait and a bane trait. In this case the attack affects only those targeted by the Bane affect but it may be resisted by defenses that work against the normal trait. An attack that stated "Paralyze by [Fear](#) to Elf" would only affect characters with the Elf trait but it could be negated by a [Resist Fear](#) defense.

Self

This trait indicates that the effect works only on the person using it. Instead of saying "by" you would say "to Self" after the effect. This indicates that you are the only target of the called effect.

Defenses

These abilities allow you to negate abilities used against you. Although there are a large number of possible defenses that can be used against specific causes and effects, all defenses can be summarized as one of the following types.

When it is possible to apply multiple defenses to an attack the defender decides which defense to use. Although [Elude](#), [Guard](#), and [Shield](#) defense must be used if an attack would affect you, it is possible, for example, to use a skill that provides a [Resist](#) defense when an appropriate attack strikes you to 'protect' and [Shield](#) type defense. You could, for example, use a [Resist](#) against [Fear](#) to save a [Shield](#) against any [Mental](#) trait.

Elude, Guard, Shield

You negate the first attack of the appropriate type that strikes you. Although different verbals are used to indicate the nature of your defense and to add flavor to the game, all of these defenses work the same way. You must call out the defense when it is used.

Avoid, Parry, Resist

You choose one attack of the appropriate type to negate when it strikes you. You can allow an attack to affect you and negate a later attack. Although different verbals are used to indicate the nature of your defense and to add flavor to the game, all of these defenses work the same way. You must call out the defense when it is used.

Purge

You may negate an attack after it has affected you. You must spend three seconds to role play this defense as you shake off the effect, during which time you must remain relatively still. You cannot use game skills while role playing the purge. You cannot use Purge while unconscious unless doing so would wake you. You cannot use

Purge when you are dead unless the skill specifically allows you to use 'Purge [Death](#)' in the verbal.

No Effect

You are unaffected by the attack in question. This indicates a defense that is not consumable. The attack does not affect you, nor will it ever affect you.

Reduce, Absorb

You are affected by the attack in question, but the effect has been mitigated, lessened, or changed entirely. The actual reduction is determined by the skill or ability that allows you to use this defense. Reduce is often used to indicate the effect has been lessened while Absorb often indicates that the attack had a different effect entirely. The verbal for this defense might be followed by "to" and the modified effect such as "Reduce to [Maim](#)" or "Absorb to [Heal](#) 2." You must role play the new effect appropriately.

Increased

While not exactly a defense, this call indicates that the effect had a greater than normal effect on the target. If the target calls 'Increased' in response to a beneficial effect, the target might have an ability or skill that allows them to receive additional benefit from the effect in question. If the target calls 'Increased' in response to an attack, the target might have a weakness or vulnerability to the effect or trait that was used against them. Some games might use 'Increased to...' followed by an effect to specify extra information about the game effect.

Reflect

You choose one [melee](#), [missile](#), or [packet](#) attack of the appropriate type to rebound back at the attacker when it strikes you. Call this defense to negate the effects of the attack. If your attack is reflected then you must take the attack as if your [melee](#), [missile](#) or [packet](#) had struck you. The attack retains all of the original traits so it might not actually affect you. You may use defenses to negate the attack, including using Reflect to bounce it back on the original target.

Spirit

You are insubstantial and are unaffected by most attacks. You call "Spirit" to any attack that you negate for this reason. You cannot use game abilities unless specifically allowed to do so. You cannot speak or converse with other characters unless they use an ability that allows you to do so. If someone tries to talk with you, you may call "Spirit" to inform them that you cannot speak. You cannot drop any items. No one may search you, nor can items that you carry be removed from your person. Nothing can be thrown over you. You cannot rest while in spirit form, and effects that last until you rest will not be removed. You cannot block doorways or portals. If someone tries to move through a portal that you are blocking then you are forced to move.

Characters who have died and are traveling to the Realm of [Death](#) are spirits. If you gain the Spirit trait because you have died and you have become a Spirit of the Dead then you also gain the Dead trait. Effects with the trait "to Spirit" affect all spirits, while effects with the trait "to Dead" affect only spirits of the dead. You must walk with your head bowed and your hands at your side.

Some abilities allow a living character to become a spirit for a time, but these abilities usually have special restrictions or will not be absolute in their protection. You might gain a trait and become vulnerable to attacks with that trait even though you are a spirit. Some of these skills last until you move. In these cases you cannot move or speak without ending the effect. If you turn into a spirit in a place which blocks a portal or doorway then you are forced to move to allow someone through. Since this can end the effect you must be careful to use these types of skills so as to not block confined areas.

Defense Traits

A defense might have a trait associated with it. The verbal should include the defense and the trait with a “by” between them. This can be done to add flavor to an ability, to differentiate two similar skills, or to allow other skills to key off certain defenses.

Chained Defense

A chained defense has an effect that is called immediately after the defense. The verbal should include the defense and the additional effect with an “and” between them. If the additional effect is an attack then that attack must be launched immediately as the defense is called. Using the additional effect could be optional or required. If the additional effect affects the character using the chained defense then the ability must use the [Self](#) trait, and the character must role play that effect as if they had been struck by it.

For example, a [Fire](#) based attack strikes a [Fire Elemental](#). The creature calls out “[Resist](#) and [Heal](#) to [Self](#)” to indicate that the attack was negated and the creature was healed by using the defense.

For example, a strong creature can tear out of some physical effects but it takes damage doing so. The creature is struck by the appropriate attack, role plays for 3 seconds, calls out “[Purge](#) and 2 [Damage](#) to [Self](#)” and then role plays the damage effect.

For example, a character has an ability that simulates a Riposte. The character is struck by a successful [melee](#) attack, calls out “[Parry](#) and 3 [Damage](#),” and immediately swings at the person who attacked her.

For example, a creature has an ability that can shoot attacks with the Magic trait back at the attacker. The creature is struck by a “[Paralyze](#) by [Magic](#).” The character calls “[Resist](#) and [Paralyze](#) by [Magic](#)” and throws a [packet](#) back at the attacker.

Armor Points

Armor provides points of [Protection](#) that act as a buffer against damage effects. Armor points are removed by damage in a manner similar to [Vitality](#). Armor points are lost before [Vitality](#) points. The method by which exhausted armor points are restored varies depending on the type of [armor](#) you are using and the skills and abilities of the Accelerant game you are playing.

You may only have one base type of [armor](#) active at a time. If you try to restore or activate or wear one type of [armor](#) while you have active points from another type of [armor](#), the [armor](#) type with the lower number of active armor points will be exhausted. If there is a tie, then the new armor points will be immediately exhausted. Exhausted armor points are gone and must be restored just as if they were exhausted by [Damage](#).

For example, Travis is wearing a 2 point suit of [armor](#). He role plays and activates a skill that gives him 3 [points of armor](#). The armor points from the suit of [armor](#) are exhausted and he has 3 armor points from his skill. If he wants to use the armor points from his suit of [armor](#) later, he will have to have the [armor](#) suit repaired.

Traps

Traps are devices or substances set to deliver an effect to anyone who disturbs them or attempts to get past them. Anyone can avoid a trap, but no one can attempt to manipulate a trap by moving it, disarming it, or affecting the individual components unless they have a skill that allows them to do so.

Most traps will cause an effect to the person who set them off. If someone manages to trigger a trap with a thrown object, then the object will take the affect instead. If the trap affects the entire room or corridor, then this trick will not provide much help. Some traps will work multiple times, while some will work once. If an item is causing a trap to go off continuously then anyone who touches the item will take the effect.

If a trap is set in a small box, chest, or other enclosed area no larger than 3 feet in any dimension then setting it off will destroy everything inside the area. Coins, items, paper, and everything else inside will be destroyed and cannot be removed from the box. If any living creature has somehow crawled into an enclosed area no more than 3 feet in any dimension with a trap and the trap goes off then that fool will be killed instantly. There are four types of traps.

Snap Trap

These traps make a snap sound when they go off. They are represented by mousetraps, party poppers, and snaps. These traps cause 2 [Damage](#) to whoever sets them off.

Buzzer Trap

These traps make an electronic sound of some kind when they are set off. Sounds used for these traps include beepers, buzzers, and electronic sound effects like the moaning of a rigged welcome mat you might find at Halloween. These traps cause 5 [Damage](#) to whoever sets them off.

Verbal Trap

When these traps are set off and you will hear a trap sound and a voice will call out a verbal associated with them. Whoever set the trap off must take the effect of that verbal. If no verbal is present, then the sound determines the type of trap as described above.

Gas Trap

As a magical trap, but the verbal will begin with the words "In This [Room...](#)" Everybody in the room will take the effect. This trap only works in an enclosed room with normal doorways and corridors leaving it. The trap will affect you if any part of you is within the room when the trap goes off.

Contact Poison

This attack is represented by petroleum jelly. If you touch the jelly with bare skin, you will take an effect of "5 [Damage](#) by [Poison](#)." A character with the appropriate skill may apply such a substance directly from the vial it was created in.

Once applied to a surface, the jelly cannot be scraped off onto another object. Only a character with an appropriate skill may wipe the substance off a surface with a cloth or cloth like substance, but the contact poison is destroyed in the process.

An item with contact poison is considered a Red Sticker item. The fumes and burning of the poison are overwhelming, even to a character who is immune to it. The object cannot be moved from its place or handled until the poison is removed by a character with the appropriate skill to do so.

Shackles

Shackles are a prop that binds the wrists or legs of a character. An in-game lock is affixed to each prop to represent the locking mechanism of that prop. The prop must be loose enough to remain comfortable and, for safety, the player must be able to easily remove the prop if an out of game need arises.

Shackles can only be placed on a helpless or willing character if the lock is open. You place the shackle prop on the helpless or willing target and close the lock. Shackles placed on the arm restrict movement and make it

impossible to use any skill that requires that the arms must be free, including using weapons, using [packet](#) attacks, and using First Aid. You may use a skill that allows you to attempt to open a game lock on your own shackles. Shackles placed on the legs make it impossible to run and restrict movement to the extent of the shackles. A prop placed on the ankles must be constructed to allow the player to stand and walk slowly.

Shackles can be removed by opening the lock or by using an appropriate skill to remove them. Each game will have a skill assigned to destroy and remove shackles by taking a minute and using the appropriate props and role playing. Skills that allow a character to slip out of bonds are possible as well.

Verbal Modifiers

There are certain phrases that can be added to verbals to change the effect. These can modify the duration or add additional effects to an attack. For simplicity, a single attack can only be modified by one verbal modifier.

Short

Someone precedes an attack verbal with "Short" and calls out an effect that lasts until you rest or lasts for the entire event. That effect instead lasts until you rest for 10 seconds. If used with [Frenzy](#) then the effect will only last 10 seconds.

Permanent

Someone precedes an attack verbal with "Permanent" and calls out an effect with a duration. The effect will last at least for the remainder of the event. Permanent effects may not be removed by resting, but may still be removed by the [Cure](#) effect.

Permanent effects might last indefinitely. If you end the event with a Permanent effect submit to plot a description of the effect and how you received it.

Ambient

Someone precedes an attack verbal with 'Ambient' to indicate that the effect is a result of an environmental or a plot condition and not an effect that originates from the creature that calls it. Although the effect itself remains unchanged, this indicates to the players that disabling the creature calling the effect will not prevent the effect. This modifier is usually used with plot deliveries to indicate plot driven effects.

If, for example, someone from plot called out 'By My [Voice](#), Ambient [Agony](#) by [Fire](#)' then the players would know that throwing a [Silence](#) effect or trying to [Paralyze](#) the creature calling the effect would not prevent the plot person from calling the effect. A plot person could also call something like 'By Your [Name](#), Travis, Ambient [Agony](#) by [Disease](#)' to indicate that some plot condition is causing Travis pain but it isn't related to the creature calling the effect.

Double and Triple

One single delivery causes multiple attacks to affect the target. "Double" causes two of the specified attack to be delivered, while "Triple" causes three attacks to be delivered. Each attack requires a separate defense.

For example, a wizard calls out "Triple 10 [Damage](#) by [Fire](#)" and throws a [packet](#) that hits you. You must take three "10 [Damage](#) by [Fire](#)" attacks. "[Resist Fire](#)" would negate one of these attacks and you would still take two attacks. You may use multiple defenses against these attacks.

Chained Effects

Two effects can be chained in one attack. The verbal should name the effects with an "and" between them. If both effects have the same trait then the trait is called only at the end of the attack. If both effects have different traits then a trait is called for each effect. A defense that negates one of the effects or one of the traits if they are different would only affect that portion of the attack. In the case where both effects have the same

trait, however, a defense that negated the appropriate trait would negate all effects. The attack is still considered a single **melee**, **missile**, or **packet** attack so a defense that negates a hit from a specific delivery such as **melee**, **missile**, or **packet** will negate the entire attack.

*For example, a spider calls out “**Drain** and **Slow** by **Poison**” and hits a player with a **packet**. The defense “**Resist Poison**” would negate the entire attack. The defense “**Resist Slow**” would negate the **Slow** effect, but the character would still be affected by the **Drain** effect. If the character had both “**Resist Slow**” and “**Resist Drain**” defenses then both could be used to negate the effects of the attack.*

*For example, a wraith calls out “**Paralyze** by **Fear** and 2 **Damage**” and hits the player with a **melee** attack. The defense “**Resist Fear**” would negate the **Paralyze** effect. The defense “**Resist Weapon**” would negate the **Damage** effect. A skill that negates one **melee** strike would negate the entire attack.*

Numina Campaign Rules

Welcome to Numina

You start with 50 Character Points (CP). The CP cost of each skill is located next to the skill name. You can gain an additional 2 CP from submitting your character history, Playing Numina Events, acting as a non-player character (NPC) for Numina or other partner LARPs, and supporting Numina with prop creation and other volunteering.

Building a Character

To get you started building a character for Numina, we have broken it down into logical steps. You start by looking at your character's past. What does your character look like ([Aspect](#)), where did they come from ([Culture](#)), and what did they do when they lived there ([Foundation](#)). Then you look at your character's present. Think about when trouble comes to town, or you go to find trouble, how do you manage it? Do you pick up a pair of swords, do you heal the fallen, call down magics upon your foes, or a different path? Then look at the specifics of how you could represent the vision using the rules of the game. Do you want to craft poisons and potions, bring the dead back to life, or kill the living? ([Excellencies](#)). Finish off your character by purchasing [attributes](#) so you can power your skills that you use in-game.

Here are the steps broken down for creating a character.

Before you get started, know that as all players are Adventurers, you start the game with a set of adventurer skills. These allow you to perform many of the core functions of an adventurer such as wielding a basic [weapon](#) or bandage someone who is wounded. Adventurer skills do not cost any CP.

Explore Your Past:

This represents who your character was before they arrived at the game. Skills in this section provide opportunities for you to explore aspects of your characters history and share it with others.

1. **Step 1** - Choose 1 or 2 [Aspects](#). These Aspects do not cost CP.

Note: You can purchase a total of 3 Aspect skills from your Aspects

2. **Step 2** - Choose 1 [Foundation](#). This [Foundation](#) does not cost CP.

Note: You can purchase up to 2 [Foundation](#) skills from your [Foundation](#)

3. **Step 3** - Choose 1 [Culture](#). This [Cultures](#) does not cost CP.

Note: You can purchase up to 2 [Culture](#) skills from your [Culture](#).

Define Your Role:

This defines what you do now that you are an adventurer. Do you hold back the enemy with your sword and [shield](#), do you heal those who fall, or do you choose a different set of skills than the world. While these skills define what you can do, they do not define who or what your character is. You do not take an Aspect and become a 'Wizard.' If you see yourself as a Wizard, then you should take on that role and title. Multiple people with different sets of [Excellencies](#) or [Domains](#) can see themselves as Wizards. The rules do not set those as [Traits](#), you define them through your character history and roleplay. Let your vision decide who your character is, not the names in this rulebook. [Expressions](#) represent areas often outside of combat which includes visions, performance, religion, and other pursuits. These help flesh out your character beyond combat.

1. **Step 4** - Choose your one Domain: This Domain does not cost CP.
2. **Step 5** - Choose up to three [Excellencies](#)*: Your first Excellency costs five CP, each subsequent Excellency costs one additional CP (i.e. the second costs six CP, and the third costs seven CP, etc.). You may purchase

up to three [Excellencies](#) total (this is a hard limit). Additionally Excellency purchases must be unlocked in-game.

Note: [Excellencies](#) marked as hidden require Staff approval before they are unlocked.

- Step 6** - Choose up to two [Expressions](#): Your first Expression costs five CP, each subsequent Expression costs one additional CP. (i.e. the second costs six CP, the third would cost seven CP, etc.). At character creation you may purchase up to two [Expressions](#). Additionally Expression purchases must be unlocked in-game.
- Step 7** : Purchase Skills Skills come from all the different things you have selected previously and also : include [Open Skills](#). [Open Skills](#) include a lot of different skills that are available to all players. Skills are of variable costs.

Assign Your Attributes:

[Attributes](#) power actions in Numina. You need your [attributes](#) to perform skills and take blows from others. The more [attributes](#) you have, the more times you can do things.

- Step 8** - Purchase [Prowess](#), [Fortitude](#) and [Insight](#). Spend these [attributes](#) to use skills.
- Step 9** - Purchase [Purpose](#). [Void](#) and [Purpose](#) allow you to refresh your other [attributes](#) after taking a [Short or Long Rest](#) so you can continue your adventures. [Void](#) cannot currently be purchased.
- Step 10** - Purchase [Vitality](#). [Vitality](#) defines how many hits your character can take before they fall Unstable.

Wrapping Up

At this point you are done, and you have a character. You are ready to start playing Numina!

Of course, some people create their characters differently, they start with costuming or by doing a full mathematical analysis of all potential options or putting the options on a roulette wheel and see where luck takes them. The approach you take is up to you, but we offer the above path to help guide you in your journey.

Earning CP

You can earn CP by supporting the Numina community. Methods include:

Method	CP Amount
Attending a Numina Event as a PC or NPC	1 CP
Helping Set up for a Numina Event by doing a called-out Setup Task	.5 CP
Helping Clean up for a Numina Event by doing a called out Cleanup Task	.5 CP
Sending in a PEL	.5 CP
Donating time or props to Numina As defined for the task.	—
NPC'ing a LARP event at a LARP that shares CP with Numina (See the website for the latest list of CP Sharing LARPS).	Up to 2 CP (Attendance, Cleanup/Setup, PEL)
Special Incredibly Rare Effects in-game As defined by the effect.	—
A player can donate any CP beyond their initial CP to another player as long as this donation does not take them over the CP Cap. Donations can be made from CP that would be over a person's maximum CP Cap. (see below on CP Cap)	—

Note: The standard CP a player can earn per event is up to 2 CP:

(1 CP for attendance + 0.5 CP for setup + 0.5 CP for cleanup OR 1 CP for attendance + 0.5 CP for PEL + 0.5 CP for either setup or cleanup).

In rare cases, additional CP may be awarded for specific event service or support beyond standard participation.

Numina CP Cap

- Beginning in 2026, a player's accrued (banked) CP is capped at 100.
- Players may earn any amount of CP during the year; however, no player may hold more than 100 CP in their bank at any time.
- You cannot bank CP above the CP Cap, but you may donate that excess CP, as long as the recipient remains within the CP Cap.
- Any CP earned beyond your starting CP may be donated to another player.
- The CP Cap increases by 15 each year, for example it will be 115 at the start of 2027.

The Future

The rules in this rulebook only define what you can take as a starting character. Numina is a living campaign influenced by the stories created by the community. Through in-game roleplay, you will have the opportunity to find new skills, new character options, ways to purchase locked excellencies, ways to purchase more than the starting number of excellencies / expressions and more.

Some players feel restricted when they create a character that a decision is permanent, and they will forever be locked into what they chose. Numina offers options and opportunities for characters to change skills, [Excellencies](#), and other facets of your character. These often require cost and roleplay to achieve, but they are available so that your character can grow and change over time.

Another note for the future, there are more things to spend CP on than are listed in this book. That includes things that are hinted within these pages and more. As Numina begins these, like other plot options will be out there in the world to find. As with any aspect of a LARP, these achievements are not gained simply or quickly. Just as your character may have a goal to gain a title within their culture, a membership in a restricted club, or the friendship of a reticent person, so too finding details on where these skills might reside, locating trainers and then gaining trainers for them are quests within the world Numina presents. Though, as with many things in a magical world, sometimes things such as this appear when you do not expect them whereas other times they are elusive. Do embrace the journey and as you establish relationships within the world so too will the knowledge held by those you cherish be revealed.

Rules of Numina Etiquette

Respect and Shared Play

Respect is the foundation of our play culture and the lens through which all in-game actions should be viewed. While characters may experience conflict, anger, rivalry, or even open hostility, those emotions never override our responsibility to treat one another with care and dignity out of game. Players, NPCs, and staff should always be treated with respect, regardless of character alignment, role, or circumstance. Even when portraying villains or engaging in intense roleplay, participants are expected to remain mindful of the real people involved and to separate in-character actions from out-of-character behavior. These rules apply to our LARP events, as well as online Numina spaces and official Numina non-LARP events. Our goal is to create a space where players feel safe taking emotional and narrative risks, knowing that respect for one another is the foundation that makes meaningful play possible.

The Lookdown

The Lookdown is a safety tool that allows a participant to immediately step away from a scene for personal well-being. It is intended for moments when a participant needs to disengage from play due to emotional discomfort, physical strain, or feeling unsafe, including during intense roleplay or combat situations.

The Lookdown is designed to be clear, respectful, and non-disruptive, allowing a participant to remove themselves from a situation without explanation or discussion.

How It Works

To perform a Lookdown, a participant places a flat hand above their eyes, as if shading them from the sun, lowers their gaze, and calmly exits the scene. This signals that they are stepping away for personal reasons and should not be stopped or questioned.

The Lookdown may be used at any time and for any reason.

Community Expectations

When someone uses the Lookdown:

- They should be allowed to leave the scene immediately and without comment.
- Other participants should not follow, question, or attempt to engage them.
- The choice to use the Lookdown should be respected without judgment or consequence.

A follow-up conversation may happen later only if the person who used the Lookdown chooses to engage. The purpose of such a conversation, if it occurs, should be support and understanding, not explanation or justification.

OK Check-In

The OK Check-In is a nonverbal safety tool that allows any participant to check in on another person's well-being during play. It is designed to be quick, unobtrusive, and usable without breaking immersion, while ensuring that all players feel safe, supported, and respected.

The OK Check-In is especially important during emotionally intense roleplay, moments of heightened tension, or any situation where a participant may be unsure whether another player is comfortable.

Step One: The Check-In

A participant makes eye contact with the person they wish to check in on and touches two fingers to their own opposite shoulder at about chest height. This gesture asks, 'Are you okay?'

This check-in may be used at any time, for any reason, even if there is no clear sign of distress.

Step Two: The Response

The person being checked on responds using one of the following hand signals:

- **Thumbs up:** 'I'm okay. Please continue.'
- **Flat, wavy hand:** 'I'm not sure / please ease up.'
- **Thumbs down:** 'I'm not okay.'

Any response other than a thumbs up indicates that an adjustment is needed.

If, during a check-in, you realize that you are not okay, this is an appropriate time to call a Lookdown and step away from the situation to take care of yourself.

Step Three: The Adjustment

The person who initiated the check-in adjusts their behavior based on the response:

- **Thumbs up:** Continue the scene as normal.
- **Flat, wavy hand:** Continue the scene, but reduce intensity. This may include lowering emotional intensity, increasing physical distance, or softening the interaction.
- **Thumbs down:** Stop the specific roleplay interaction immediately and allow the participant space to disengage or step away as needed.

If no response is given, the situation should be treated as a thumbs down and de-escalated accordingly.

Additional Guidance

You may feel hesitant to respond with a flat hand or thumbs down because you don't want to negatively impact someone else's experience. During an OK Check-In, honest responses are essential, as the checkin only works if the other person can react appropriately to what you share.

It is always appropriate to check in after an intense roleplay scene, even if the moment has already passed. A brief follow-up can help ensure that everyone involved feels grounded, supported, and comfortable after an emotionally charged interaction.

It is also appropriate to check in if you observe an intense interaction between players and/or NPCs. When doing so, check-ins should be open, respectful, and focused on care rather than interpretation or judgment. Whenever possible, these check-ins should include all involved parties or be done with staff awareness, ensuring clarity, transparency, and shared understanding.

The goal of the OK Check-In is to create an environment where players feel safe to take emotional and creative risks, knowing they are supported by a community that values consent, communication, and mutual care.

Touch by Consent

In Numina, physical contact between players by default is not allowed. Physical interaction in roleplay is only appropriate when clear and mutual consent has been given. While some players may choose to include physical interaction as part of their roleplay, others may not, and both choices are equally valid.

Consent must always be given freely and can be withdrawn at any time. It applies only to the specific interaction agreed upon and does not imply permission for future contact. Seeing others engage in physical contact does not mean the same consent is given to you.

Respect for personal boundaries is essential. When in doubt, roleplay without physical contact. If you believe physical contact may be appropriate, ask first and wait for a clear yes. If the answer is no, accept it without hesitation or judgment, recognizing that honoring boundaries is a fundamental part of maintaining a safe, welcoming, and respectful community.

Assume they Can

In Numina, players and NPCs may possess abilities, knowledge, or effects that are not immediately visible or obvious to others. If you see someone do something unexpected, assume that they are acting within the rules of the game.

It is important not to challenge or interrupt another player's actions in the moment. Doing so can disrupt play

and create unnecessary tension. If something seems confusing or concerning, you may bring it to staff after the scene or event so it can be reviewed calmly and appropriately.

This approach helps preserve immersion, mutual trust, and a respectful play environment for everyone involved.

How to Raise an Issue at an event

Sometimes an issue may arise during play that feels important enough that it should not wait until after the event to be addressed. If something occurs that causes concern or discomfort and feels timesensitive-but does not rise to the level of an immediate emergency-there are appropriate ways to raise it during the event.

If you believe someone is in immediate danger or at risk of harm, follow the [Emergency](#) procedures.

If you feel a concern needs to be addressed during the event, you may do so in one of the following ways:

1. Speak with a Player Representative

Player Representatives will be introduced at the beginning of the event and are available to listen and help determine next steps.

2. Ask the Innkeeper for Assistance

You may ask the Innkeeper to connect you with a Director or General Manager if you need support or guidance.

3. Go Directly to Staff

If the situation feels time-sensitive, you may go to Monster Camp and ask for Cindy Brock, Mike Miller, or Josh Rosenthol, who are often found and available to help address concerns during the event.

A Note on Timing and Support

Not every concern needs to be addressed immediately during play. If an issue is not urgent or does not impact ongoing safety or gameplay, it may be more appropriate to raise it after the event, when there is more time and space to address it thoughtfully.

Our goal is to support players while also preserving the flow of the event. You are always encouraged to speak up when something feels important, and we will work with you to find the right time and way to address it.

What to do in case of an emergency

An emergency is any situation where someone's safety or well-being may be at immediate risk. If you believe an emergency is occurring, act quickly and follow these steps.

1. Call 'Emergency.'

If you believe there is an emergency, clearly call out '[Emergency](#)' so that everyone nearby is aware and gameplay immediately stops.

2. Take or Assign Leadership.

The person who calls the emergency should either take charge of the situation or clearly designate someone else to do so. This ensures that the response is coordinated and not chaotic.

3. Assess and Seek Assistance.

Determine what type of help is needed. If the situation involves injury, illness, or a medical concern, send someone to contact staff or emergency services as appropriate.

For example, a visible injury or loss of consciousness requires immediate medical attention, while a dropped prop or tripping hazard may simply require clearing the area.

4. Contact Emergency Services if Needed.

If the situation involves a medical emergency or serious risk, call emergency services immediately. Do not delay while seeking approval or confirmation.

5. Clear the Area.

Ask nearby participants to step back to give space for care and to prevent further injury. Once the situation is under control, staff will determine when and how play may resume.

Numina Specific Rules:

Reading Skill Listings

Each skill is listed in a table with the following entries:

- **Skill Name:** The name of the skill. Use this for reference or to identify related skills.
- **Cost:** The number of CP (Character Points) required to purchase the skill.
- **Verbal:** The phrase you say when using the skill, and the effect it produces. For example, if the verbal is "5 Damage by Fire," the effect is a 5-damage fire attack.
- **Description:** Flavor text and instructions on how the skill works and how to use it. For example, if the description says, "Spend an attribute to gain three packet attacks to burn your foes," you know that spending the required attribute points grants you three packet attacks. The Verbal column then tells you those attacks are "5 damage by Fire."
- **Attribute:** Indicates which attribute you spend to use the skill, if applicable. For skills with limited uses (per rest or per event), this field will specify that. If the skill is a thread skill, this will also be noted here.

For skills without a verbal, the description will explain how they are used.

Weapons Guidance

- **Basic One handed weapons:** include swords, maces, clubs, and axes. They must have a single striking surface (ie, not a double blade) and cannot have overlarge hilts or crossguards.
- **Basic Two handed weapons:** are any weapon up to 64', to include staves, two handed swords, spears, two handed clubs and shorter glaives.
- **Hafted Weapons:** include those weapons up to 72' in length, to include polearms, giant hammers and other larger weapons.
- **Two-Handed Weapon Requirements:** Spears, staves, glaives, and other two-handed weapons require two hands to wield unless a specific skill allows for the use of that weapon in one hand.
- **Shield Size Limits:** A full-sized shield cannot be more than 60" in the combination of width and length, and no more than 36' in any one dimension. For example, a rectangular shield can be 36' long and 24' wide. Whereas a circular shield can be 30' in diameter.
- **Buckler rules:** <To Be Inserted Later>
- **Bow rules:** <To Be Inserted Later>
- **Two Weapons:** To wield a weapon in each hand in combat requires a skill which grants the ability to have a second weapon. If you do not have such a skill then the second weapon is treated as a non-combat object and, as with all non-combat objects, if struck you either must drop the weapon or take the damage done to the weapon.
- **Adventurer Skills:** Every player gains the ability to use certain weapons through Adventuring Skills.

Armor

Characters may wear physical armor or use game skills to gain points of Armor. Distinct types of armor give different amounts of armor as described below.

- **Unarmored** [0 points]- you aren't wearing armor.
- **Light Armor** [2 points] - You are wearing armor with either your chest or your extremities covered by a flexible, reinforced material. Examples might be a leather jerkin. Or Arm guards plus Leg guards.
- **Skill based armor** [2 points] - You have a skill which counts as two armor points. The skill defines if there is a costuming requirement.
- **Medium** [3 points] - Either you must have both a flexible reinforced chest piece and extremities covered, or a rigid chest piece.
- **Heavy** [4 points] - You must have a rigid chest piece and rigid extremity covers

Armor Effects - Skills, Imbues and Grant may Increase the total value of armor you are wearing to a maximum of 4 points if you are not wearing heavy armor and 5 points if you are wearing heavy armor. Your armor points

cannot exceed these maximums unless explicitly stated otherwise.

Armor materials do not have to be authentic, wearing shaped fiberglass or foam prepared and painted to look like plate metal would be treated as plate metal for example. The goal of armor should be to enhance the look of your character, not provide you a physical impediment.

Thread Skills

Numina has a class of skills called Thread Skills. Thread Skills enhance other skills. Thread Skills that do not denote specific skills apply to all skills. Thread Skills are subject to the following limitations on use:

- You may only use three Thread Skills to change or enhance a single skill.
- You cannot use a Thread Skill on uncalled damage or effects that come from [grants](#), items, or other non-skill-based effects.
- Thread Skills that work based on a minimum numeric value, for example a Thread Skill that only increases damage effects greater than three, use the base value of the skill they are changing to define if they can be applied.
- Thread Skills that work based on the trait of the effect, for example +1 [Increase](#) to healing effects of the [Will](#) trait, work off the final trait of the effect, so you can apply one Thread Skill to change the effect to 'Will' then another Thread Skill that [increased](#) effects by [Will](#).
- Skills that are specifically marked as 'Extra Thread Skill' do not count against the three Thread limit and you may combine one Extra Thread Skill with your three standard Thread Skills.

Note that some unique Thread Skills may contradict these rules, those skills explicitly state they are exceptions, and those exceptions override the normal rules.

Here are two examples of Thread Skills in use. In example one, Tharadon uses his skill which provides him with two [melee](#) attacks of three damage. He applies his first Thread Skill which increases the damage of a [melee](#) attack from three damage to four damage. Tharadon then would like to apply a second Thread Skill which increases any [melee](#) attack of four or greater by one. However, as the base attack was not four or greater, Tharadon could not use that skill. Instead for his second Thread Skill Tharadon used a skill that changed the attack from base damage to [Fire](#) damage. At this point Tharadon has two [melee](#) attacks of '4 damage by [Fire](#)'. If he has another applicable Thread Skill Tharadon could still use it.

In example two, Chandara uses spell that has two [packet](#) attacks of three damage by [Force](#). Chandara applies three Thread Skills to this spell, all of which [Increase](#) the number of [packet](#) attacks by one. This changes the spell so that she now has five [packet](#) attacks of three damage by [Force](#).

Resting and Focus

There are two types of [Rest](#) defined in Numina, short and long.

A **Short Rest** requires one minute without the use of game skills. This should be represented by rest, be it sitting, leaning against a tree or other relaxed position. You may not perform Skills that require [Focus](#) during a Short Rest unless the skill says so. Taking damage during a Short Rest does not interrupt the rest unless you use an active game skill to resist the effect. Passive effects such as a [Guard](#) do not interrupt the rest. Falling unconscious due to damage is also considered still Resting. Being paralyzed or stunned also counts as [Rest](#).

A **Long Rest** takes five minutes and requires a Place of Peace. A Place of Peace refers to the main town area of Numina if there is no combat going on in that area. If there are monsters or other combat taking place in the town (not duels, but general combat) the town cannot be considered a Place of Peace. Other areas might be explicitly marked by a tag or spirit as a Place of Peace.

Imbue Rest

Imbue Short Rest - If you are the recipient of an 'Imbue Short Rest' you can use skills and attributes as if you had just completed a Short Rest.

Imbue Long Rest - If you are the recipient of an 'Imbue Long Rest' you can use skills and attributes as if you had just completed a Long Rest.

Centering

Numina introduces a concept called Centering. Any player can Center by taking a Short Rest. At the completion of your Short Rest, you are Centered. You lose your Centering if you move from the location where you took your Short Rest. While you are not Rooted there, if you take any steps away from your location, such as taking a step or two away to attack a foe or heal an ally, your Centering is lost the moment you leave your spot. (The spirit of the rule is not that you are stuck unmoving in that place for the duration; rather, if you move away, you are no longer Centered) This includes having to move away from your spot due to a Repel or a Disengage. If you have used a Skill with multiple effects that was enhanced by a Thread Skill that requires Centering, and you lose your Centering, any remaining effects that were unused are lost. The Centering mechanic is used in Skills of the Earth Domain and associated Excellencies.

Multiple Effects

Some Skills result in you being able to use Multiple Effects. For example, a skill might grant you three, '2 Damage' melee attacks. You spend the Attribute or use of the Skill when you activate the Skill. You can utilize other Skills while the first Skill with multiple effects is active, and you retain all unused effects from the Skill. You may even activate other Skills that have multiple effects and have them all active. All unused effects are lost when you take a Long Rest or reactivate the same Skill. Some Skills may have unique exceptions to these rules, in that case those exceptions apply.

Spellcasting

In Numina, any ability which involves making a Packet Attack (versus a melee or missile attack) including a beneficial effect via a touch packet is, for the purposes of rules, a spell. By default, anyone with a skill to cast a spell must do so with both their hands free of anything except packets and follow the rules to 'cast' the spell. This includes effects granted from items such as potions, tinkered items, or enchanted items. If you, or any item you are holding is struck by an effect during the casting, including Beneficial and Voice effects, the casting is interrupted, and you will have to perform the casting again. No use of the Skill or Attribute is lost due to the interruption.

Numina follows a packet flurry system in the same way that there is a melee flurry system. You can throw three packets without a break. After three packets you must perform a visible / audible roleplay that takes at least three seconds. This RP is the reset of your flurry and afterwards you can cast three additional packets. This rule applies to touch packets as well as thrown packets. The 'Surge' skill allows an individual to cast more than three packets in a row, when these skills are used you must say 'Surge' to communicate that you are resetting your Packet Flurry via a skill.

Methods:

This section will go into the details of the Packet Attack rules, called Methods. Methods describe how you focus your powers. At character creation there are three Methods available to characters: Verbal, Somatic, and Preparation.

Verbal is when the Spell is cast through an incantation prior to invoking the spell. The requirements of an incantation are:

1. It must be at least 3 seconds in length (dramatic pauses are not included in your 3 seconds).
2. The incantation must be about the spell you are casting. For example, the incantation 'I conjure forth the

fires of the heavens to burn you to ash' would be a valid incantation, assuming you didn't rush it and say it too quickly. However, the incantation 'Mary had a little lamb, **Death** by **Magic**' would not be a valid incantation.

3. The incantation must be as loud as the **Effect** you cast. You can whisper a Spell, but then you must whisper the **Effect**.
4. Each Spell should have a custom incantation tailored to that Spell.

Somatic spells involve a complex motion prior to casting the spells. If you have the ability to cast while holding something in your off hand, you are not required to drop the item; however, you must incorporate your off hand and/or the item into your gesture. Your gestures must:

1. Be performed in the direction of your target
2. Be visible at least 10+ feet away from you
3. Be nearly continuous movement (stopping for 2 seconds like a statue isn't a valid gesture)
4. Take at least 3 seconds to perform
5. Each spell should have something distinct about its gesture

Preparation refers to the crafting of items where powering the **Effect** is represented by the time spent creating them, versus the time required to use them. The **attribute** is used when you create the item, not when you invoke the ability. Examples of Skills that involve Preparation include:

- **Alchemy**
- **Tinkering**
- **Arcaneering**

Another known Preparation Method is **Enchanting** (not available at character creation, but may become available during play).

Other known Methods include:

1. **Talismaner** (using items)
2. **Performance** (using song)
3. **Scholarly** (using scrolls and books)

Magical Sources:

One of the main aspects of Numina is that it is a world full of magic and wonder. When a player creates a character, they pick Skills which come from inside of them, such as skill with swinging a sword, or a skill which is powered from an outside source, such as channeling the magic of the Genesori. Sources do not affect the rules of the game. They help shape the story of the game and the ways in which you, the player, are interacting with the primal forces of the game world.

An example of potential variation in Sources would be a tinkered device that shoots a bolt of flame. One person expresses that they craft their device through clockwork parts, a second uses Elemental power, and a third uses the Arcane. All three devices operate with the same game rules by enabling the player to make a **Packet Attack** of '5 damage by **Fire**.' What changes is the story, that player tells about their device and its crafting.

All Spells and crafted items in Numina have a Source. While you can choose the Source yourself, not every Skill allows every Source and not every Source is available at character creation. At game start, when taking a spell casting Excellency or Open Skill, you can pick either **Arcane** or **Divine** as your source to power those Spells. For Beneficial Spell casting **Excellencies** you may also choose Surgery. For Skills from your Aspect, your Source is the Aspect itself. For crafting, the specific Excellency will define the Source of Alchemical, Arcaneering, or Tinkered item. There are other known Sources of power in Numina including the **Shade**, Enchanting, Blood Magic, and others.

Archery Attacks

Numina has a specific type of attack listed which is an 'Archery **Attack**.' This is a **missile** attack, but requires a Bow or Crossbow prop to be held in the offhand while making the attack. Skills that grant Archery attacks do not work with **thrown** weapons.

Crafting Skills

There are four known types of items in Numina: Alchemy, Acraneering, Tinkering, and Enchantment.

How crafted Items work

The following are true for all crafted items:

- Crafted items last for only one event. If they are not used during the event in which they were created, then the power of the item fades into nothingness between events.
- Crafted items require formulas. The formulas listed in the rulebook are available to every character with the appropriate Excellency, but other formulas may be found in-game. These formulas may have other special limits such as a number of uses or an expiration date.
- Unless otherwise noted, all crafted items may only be used once.
- If a crafted item may be used multiple times before it is expended, each activation counts as a separate use of the item. That means that you may rest between uses without losing charges unlike most skills.

Crafting Ingredients

All crafting requires two things: the expenditure of your [attributes](#) and the expenditure of coin. The cost in coin is an abstract representation of the costs of various materials used in production. By default a crafted item costs 1 Drakar to produce. Some particularly rare or difficult items may cost more, and those additional costs will be noted. Additionally, special components can be found in-game that can be spent during item creation to improve the resulting item.

Components:

Numina uses two forms of components to enhance crafted items, referred to as common and rare components. These components take various forms in-game, appearing as crystals, plants, bugs, shells, mechanical scraps, or other small items. Common components appear as a single item or small item: One crystal, a single leaf, a bug under 1 inch long, etc. Rare components are always either groups or large items: A cluster of crystals, a sizable plant, a bug 2+ inches long, etc.

In rare cases components can be infused with additional magical energy. Some rare or advanced crafting recipes may be modified by or even require these special components. The magical nature of these components can be revealed by placing the component under an ultraviolet light placed at an in-game crafting location. One will be present at the main crafting station, and a player that sets up their own crafting area may place a UV light there as well. Players may not carry UV lights on their person for the purpose of component identification. If a magical component is used to craft a Formula that does not require one, the magic in the component can instead be used instead of spending an [attribute](#) to craft that Formula.

Crafting Forge, Lab, etc

To craft an item a character must also have a forge, lab, workshop, or other area where they work. This can be represented in-game however a character wishes but must be placed at the beginning of the event and cannot be moved once placed. There is no limit to the number of crafters that may share a workspace, and there will be a Crafting space provided in-game that PCs can use and even contribute items to personalize the space. It is not required to use this crafting area and a PC can make their own if they want provided it is relatively apparent that the props define a crafting area. For example if a poisoner wants to keep their alchemy lab a secret, then they are welcome to do so!

Info Skills

There is a class of Skills called Info Skills. These Skills allow you to impact the Numina game world between events. This can be through a letter to a contact, a question you research, a holding you utilize, or other means. Replies can come via email before the event, at check in, in-game, or between events. You can use two Info Skills between events. Your first Info Skill has no in-game cost. Your second Info Skill has an in-game cost of 2 Ketch.

You may also use one Info Skill during an event if you can find an appropriate NPC. You do so by giving a clearly written info skill to an appropriate contact. For example, a letter should be given to someone who can access the Courier network, whereas the use of your Holding should be given, in written form, to a staff member related to the plot you intend to impact. It is appropriate to ask a specific NPC if they can take your Info Skill. Using an Info Skill during an event does not count against your two between-event Info Skills. Some Info Skills are limited to one use per event; using such a skill during an event prevents using it again that event, but still does not count against your two between-event uses.

All Info Skills are marked as such in the rulebook.

Imbue Extra Info Skill: An NPC can [Imbue](#) an extra Info Skill to you. The NPC does so by saying 'Imbue Extra Info Skill'. If they do so, that Info Skill must be used either during that event, or between that event and the next event you attend. You cannot save Imbued Extra Info Skills. An Extra Info Skill does not have a monetary cost. Often the [Imbue](#) Extra Info Skill is used to allow you to reach out to a specific NPC about a plot or to follow up on a discussion. You may only have one Extra Information Skill at any one time. If you get a second [Imbue](#) Information Skill you must choose which one to keep. If you do not have the Info Skill type imbued you may still use this one Info Skill.

Numina Currency

Coin	Shape	Value
Drakar	Circular	1
Ketch	Rectangular	10 Drakar
Reel	Octagonal	100 Drakar (10 Ketch)

When you Die

In Numina 3, when you become a [Spirit](#) of the Dead you must immediately go to the Gate of [Death](#), an in-game location on the site. Once you arrive at the Gate of [Death](#), there will be an indicator you can use to alert the game staff that you are awaiting assistance with the [Death](#) mechanic. If no one comes within 1 minute of waiting, you can enter the gate and there will be instructions on how to proceed.

Post Event Letters (PELs)

One method that the staff of Numina uses to plan for future events is the PEL. A PEL is a write up of what you did during the event, what encounters you enjoyed, and what you would like to see in the future. We ask that you do not use your PEL as a method to raise concerns with the game. Please send concerns to the Numina GM alias via the website. We want to make sure concerns are seen and that mechanism ensures we hear any concerns you have and can react to them. Both Players and NPCs are encouraged to send in PELs after an event events. As described in the CP section, submitting a PEL is worth .5 CP.

To work on your PEL, or submit it for reading, go to the database. Under Event Details (for the event you just attended), you should see a link to "Start Your PEL." There are question prompts to get you going. Numina has what we call a positive PEL philosophy, detailed here.

Positive PEL Philosophy

Our PEL (Player Event Letter) philosophy states what we look for in PELs, and how we use them, as well as things should be sent to other venues instead of the PEL address. There have been some shifts in what we look for in PELs since we have gained experience as staffers, so read on!

PELs are the longest-lasting form of communication between players and staff, with the most value and

relevance to collaborative storytelling. PELs are a fabulous place to tell us what mods you experienced over the weekend, conversations with PCs and NPCs, and other activities that helped you move your character and the stories of [Rues](#) along. We love to hear the flow of your event, your understanding of what you learned, and your ideas of where you think it is going, what you are interested in pursuing, and reminders of conversations you had with NPCs.

The other value of PELs is to inspire the staff and NPCs for the next event. The time you take on your PEL to relay compliments, excitement, good-natured fistshaking, and observations of our efforts goes miles in keeping **us** excited to entertain you.

PELs are intended to be a productive and positive experience for staff and players that will be used as a tool to build off the ideas and excitement you had for the next events. We understand, of course, that not all experiences are positive. PELs are also a fine place to share constructive improvement suggestions, especially as they relate to your enjoyment of the event and what might help you have more fun with the game.

If you have had a negative experience at an event and you aren't sure how to make constructive comments about it, please send us those writings at numinadirector@gmail.com. That allows the directors to get the relevant staff involved without unnecessarily bringing down the spirits of the whole PEL audience. One 'just needed to vent' PEL can, unfortunately, wipe out a lot of excitement.

The Short Version

What we look for in PELs

- Your weekend mods and experiences
- Your conversations with PCs and NPCs that provided moments of character or plot growth
- Your ideas and theories about plots and what the future holds
- Your hopes for what the future holds
- Compliments and Kudos for NPCs, mods, props, stories, and other players.
- Ideas for what would make the game more fun for you and your character
- Ways to change or alter an encounter or plotline to make it more fun or impactful to you.

What you should send to numinadirector@gmail.com

- Anger
- Negative interactions with other PCs, or NPCs unless going through the Player Rep
- Logistic issues that impacted your event
- Game issues or plot issues that impacted your event
- Criticism on the way something was done or presented

Important Contact Information

Please don't DM individual staff for Holdings approval or plot questions. Email the appropriate Numina address instead so your request can be tracked and answered by the full team.

Important Email Addresses:

- **Character Histories:** NuminaHistory@gmail.com
- **Post-Event Letters (PELs):** NuminaPEL@gmail.com
- **Rules Questions:** NuminaRules@gmail.com
- **Character Sheet Updates:** NuminaCharacter@gmail.com
- **Player Rep:** NuminaPlayerRep@gmail.com
- **Directors:** NuminaDirector@gmail.com
- **Owner:** zyzadventures@gmail.com

Imbue Long and Short Rest

Imbue Short Rest: If someone uses an effect on you of 'Imbue Short Rest' you gain the effect of having completed a short rest. You can spend [Void](#) as if you took a [Short](#) rest, utilize any skills which require a [Short Rest](#), etc. You do not gain the effect of [Focus](#) time.

Imbue Long Rest: If someone uses an effect on you of 'Imbue Long Rest' you gain the effect of having completed a Long rest. You can spend [Purpose](#) as if you took a Long rest at a Place of Peace, utilize any skills which require a [Long Rest](#), [Rest](#) off any effects which are not permanent, etc. You do not gain the effect of [Focus](#) time.

Adventurer Skills

These skills are known by all adventurers who are in Numina. You begin game with all these skills.

Skill Name	Cost	Verbal	Description	Attribute
Base Weapon Skills	Included	N/A	You are skilled with Basic One Handed Weapon and Basic Two handed weapons as defined in the Weapons section. This skill only grants you the ability to wield a single weapon .	N/A
First Aid	Included	See Description	who is unstable or repair a maimed limb on yourself or another. You must have at least one free hand to use this skill. You touch another character with a packet . Say the phrase 'Begin First Aid'. First Aid takes one minute. At the end of the minute, you say either ' Stabilize ' or ' Cure Maim Limb '. You can touch an individual with a packet	N/A
Diagnose	Included	See Description	and say ' Diagnose <Trait>' or ' Diagnose <Effect>'. You may only Diagnose a specific Trait and only Traits which are Elemental , Mental , Metabolic , or Physical . You may diagnose any standard effect, but you may not diagnose inflicts. You may also ' Diagnose Damage ' to determine how much damage someone has taken.	N/A
Improvisation	Included	N/A	If, during a game, your prop for a specific in-game item breaks you can find an alternative prop and keep playing as though you were using the original prop.	N/A
Improved Guard	Included	N/A	You may choose not to have Guard effects trigger on uncalled damage. This choice is at your discretion	N/A
Wear Light Armor	Included	N/A	You can wear 'Light Armor ' as described in the armor section.	N/A
Repair Armor	Included	' Refresh all armor '	Spend one minute of Focus . At the end of the minute you repair all of the points of Armor you are currently wearing.	N/A
Purposed	Included	N/A	As one of the Purposed people of the world you start game with the 'Purposed' trait.	N/A
Living	Included	N/A	As a Living being in the world you start game with the Living trait.	N/A

Aspects

The people of Numina III come in all sorts of different colors, shapes, sizes, genders, and Aspects. Everyone is born exhibiting at least one Aspect but may have more than one. Your Aspect is an outward presentation of your inner self and reflects some sort of connection to the forces of the universe.

Your Aspect may be the same Aspect as one of your parents, or come from a distant ancestor, or you may have a totally different Aspect than others in your family. Aspect is not genetic or inherited, though some families have a long history of exhibiting a specific Aspect. Likewise, you may learn of a specific community, city, or country with a predominance of certain Aspects. Note that while these groups may exist, there is no set rule that Aspects must appear in any fixed frequency or location.

There are no labels for people based on any of these characteristics, save for literal descriptions: 'There is a group of people with white hair at the door' or 'Do you see those two Celestial Aspected walking down by the lake?' The people of the world do not make up labels to classify groups of Aspected as a subset of people; each

Aspected is a unique person.

As people exhibit one or more Aspects, the rational people of the world recognize that discrimination against an individual based on their Aspect is wrong. Individuals or cultures who do discriminate against someone based on their Aspect are considered villainous and treated as such.

Every character can (and must) have at least one Aspect. Characters may have up to two Aspects. Characters with the [Aspected](#) Expression may purchase an additional aspect.

You have the "[X] Aspect" trait, and are affected by skills which target "[X] Aspect". For example, if you are Arcane Aspect, you have the "**Arcane Aspect**" trait, and would respond to a "Expose Arcane Aspect" and take damage from a "5 [Damage](#) to Arcane Aspect". Note that you do not have "[X]" on its own, for example if you are Arcane Aspect, you do not have the "**Arcane**" trait.

Each Aspect grants you access to several Skills. You may purchase a total of three Aspect Skills, regardless of how many Aspects you have. From your Aspect Skills **you may only select one extra [Attribute](#) or [Armor](#) increasing ability**. Otherwise, you may select two of the same Skills of other types from your different Aspects (e.g., you may only purchase one 'Extra [Attribute](#)', but two 'Purge X').

When you choose an Aspect you should also choose a single [Trait](#) which you feel represents your Aspect(s). Options include individual [Traits](#) from the [Elemental](#), [Physical](#), [Mental](#) and [Metabolic](#) trait groups. You can use this [Trait](#) with Aspect related skills that call for your 'Chosen Aspect [Trait](#)'.

The only [Trait](#) not available for this selection is the '[Weapon](#)' [Trait](#).

Skill Name	Cost	Verbal	Description
Extra Attribute	3	N/A	You have an additional Attribute (Choose one attribute of your choice of either Prowess , Insight , or Fortitude).
Aspect Armaments	4	N/A	You gain a special weapon . See details in Aspect Armament Skills section.
Blast Aspect	2	'Triple 3 Damage by <Trait>'	Once per event, when you take this skill choose melee , missile , or packet . The <Trait> is the Trait you chose when you selected your Aspect.
Unravel Magic	2	'Purge Will'	Once per event, you can Purge an effect that has the Will trait.
Invoke Aspect	2	... by Aspect	Once per event, you can change the effect Trait of any non-per event Skill to the name of your Aspect (i.e., Spirit , Arcane , Shade , etc). This is an extra Thread Skill.
Tongue of Aspect*	2	'Speak to <Aspect>'	Once per Short Rest , you can use the ability ' Speak to <Aspect>' where aspect represents your aspect.
Aspect Fury	2	' Reduce '	Once per event, if you are affected by a ' Frenzy ' effect, you can attack your enemies if there are enemies instead of your allies. If there are no enemies around, you will then attack your allies.
Aspect Armor	3	N/A	If your armor has clear detailing that shows your aspect (Faux Fur for beast, Fake plants for Plant , Celestial Star patterns for Shade , etc) treat the armor as being worth one additional point of armor . This point cannot take you over the maximum number of armor points your skills allow.
Enhanced Healing	2	N/A	Once per event, when using a healing effect, you can increase the effect by 2 and change the effect to 'By <Aspect>'. This effect is an extra Thread Skill.
Channel Aspect	2	'.. By <Trait>'	When you use any beneficial skill, you may change the trait to 'By <Trait>'. The <Trait> is the Trait you chose when you selected your Aspect.
Absorb Elements	3	N/A	Once per Long Rest , when you are affected by your chosen Trait, you can instead say ' Absorb to Heal 2'.

**Tongue of Aspect is purchased per Aspect. If you have multiple Aspects and want to use Tongue of Aspect for each one, you must purchase it separately for each Aspect. The normal limit on total Aspect skills still applies, so buying Tongue of Aspect for two different Aspects counts as two separate Aspect skill purchases.*

Arcane

Makeup / Costume Requirements: You exhibit characteristics like unnatural horns, bone protrusions, or swirls of bright colors upon your skin.

Beast

Makeup / Costume Requirements: You display features of the animal to which you are closest. These animals must be mammals, birds or reptiles.

Construct

Makeup / Costume Requirements: Your costume and makeup should show the substance you are infused with.

Divine

Makeup / Costume Requirements: You have metallic (gold, silver, copper) coloration upon your face.

Elemental

Makeup / Costume Requirements: Your makeup should display elemental focused makeup in the color to which you are attuned, Earth (brown), Air / Wind (White), Lightning (Yellow), Fire (red) or Water / Ice (blue).

Ghost

Makeup / Costume Requirements: Your makeup should include whites and grays to show your ties to the grave.

Note: the speak to skill for Ghost is "Speak to Dead"

Life

Makeup / Costume Requirements: None required. You may, at your discretion, have exaggerated ears, or teeth.

Plant

The flora is a part of you, and you display their nature upon you.

Shade

You have a bit of the shade within you and show those bits upon your face including Constellations, Heraldrics, Shade locations and other Shade beings. This aspect more than any other is very diverse as there are many parts of the shade.

Aspect Armament Skills

Aspect Armaments skills allow you to wield special weapons. These includes [Claws](#), [Elemental](#) Armaments, Heritage Armaments, and others. These skills grant you the ability to wield [weapons](#) of this type. To wield two [weapons](#) in combat, either both Aspect Armaments or one Aspect Armament and one normal, you must have the [Two Weapon](#) skill. If you have the skill to wield a Buckler or [Shield](#), you can wield an Aspect [Armament](#) and the Buckler or [Shield](#). Certain Aspect Armaments allow you to have an Aspect Armament that is a Hafted [weapon](#), Buckler or [Shield](#). You must have the appropriate skill to wield these in battle. Each Aspect [weapon](#)

grants the ability to resist certain attacks or perform certain effects due to the presence of the weapons.

- **Arcane** - May be any one handed [weapon](#), staff, buckler or [shield](#). Must display visible arcane symbols on the blade or striking surface of the [weapon](#) or the face of the buckler or [shield](#). When you are wielding [Arcane](#) Armaments and are affected by a 'Destroy' effect to that Armament, you instead 'Reduce to Short destroy'.
- **Built In** - You gain the skill [Claws](#). If you have the appropriate skill, you may wield a Built in [Shield](#) or Built in Buckler with your Claw. Built in Bucklers and Built in [Shields](#) should be decorated to denote that they are built in. If you are affected by a [Destroy Weapon](#) or [Destroy Shield](#) effect while using your Built In Armaments, you take a [Maim](#) effect instead.
- **Claws** - Claws may be up to 46' long and be red in color. Claws cannot be disarmed. If you are affected by a [Destroy Weapon](#) or [Destroy Shield](#) effect, you take a [Maim](#) effect instead.
- **Divine** - May be any one handed [weapon](#), hafted [weapon](#), buckler or [shield](#). The [Weapon](#) or [shield](#) must be decorated with a prominent symbol of the Genesori or a religious order. If you are hit by a 'Destroy weapon' or a 'Destroy shield/buckler' effect, reduce the effect to 'Short destroy'.
- **Elemental** - May be any one handed [weapon](#), hafted [weapon](#), buckler or [shield](#). The [Weapon](#) or [shield](#) must be decorated in the style of your aspect element. If you are hit by a 'Destroy weapon' or a 'Destroy shield/buckler' effect, reduce the effect to 'Short destroy'.
- **Heritage** - You have a [weapon](#), pair of weapons, staff, buckler and/or [shield](#) passed down in your family. Those [weapons](#) were made by special crafters and are immune to destroy effects. You must have marks of your family upon the [weapon](#). You must be skilled in those [weapons](#) to wield them.

Foundations

The word 'Foundation' refers to what your character did and learned before they began adventuring. One person might write about their Foundation as 'I spent my time as a wastrel in the taverns, spending my days dicing for coins and deep in the cups.' Another person when creating their character's Foundation might describe it as 'I was a dutiful apprentice to a wizard, delving deep into the mysteries of the arcane under the tutelage of my preceptor.' Both of these tales flesh out the character and describe that character's Foundation before they ever set foot into the Numina campaign.

Each player may choose one Foundation as part of their character creation. You may purchase up to two Foundation Skills. To allow for diverse and in-depth character histories, we offer the following lexicon of Foundation options. Each Foundation has a Type and description. The Type determines the group of Skills granted to that Foundation. The description provides a guide to when the Skills come into effect. For example, a Soldier is a Place Type. Battlefields are the Place in which their Skills come into effect.

Available Foundations

Agriculture (Resource: Food)

You have sown crops, raised livestock, and/or gathered the fruits of the world. You can find bounty anywhere, even where others would find naught. You could have owned a farm, worked on the land of another, or kept gardens of flowers for their beauty.

Alchemical (Resource: Components)

There are times when you wonder if you have more alchemical substances running through your veins than you do blood. You have distilled potions, venoms, poisons, and balms. You could have spent years in an alchemical shop, apprenticed to an alchemist of great note, or experimenting on your own.

Arcane (Specialty: Magic)

The Arcane was your world. Maybe you grew up in the house of a mighty wizard or arcane researcher. Perhaps

you found a great book of magic in your youth that taught you how to control the arcane or maybe it just came naturally to you.

Artifice (Resource: Components)

Where something could be accomplished through muscle, you create amazing constructs to achieve it. Where something could not be done through normal means, you found even more fantastic creations to realize it. You may have been part of a manufactory, were a lone inventor, or come from a family with a history of working in creation.

Ecclesiastic (Specialty: Divine)

You may have spent your years in a temple or traveling the world preaching your faith. You dedicated your youth to the service of a single faithful order or perhaps you learned many faiths to better broaden your enlightenment.

Entertainer (Interaction: Performance)

A room full of people reading and studying is as boring as a tomb to you. You would rather see them all singing together, enjoying a performance, or dancing the night away. Perhaps you were a traveling bard, a soloist in a theater, or maybe you were just the best singer in your town.

Artistic (Resource: Sale of goods)

Perhaps you are a painter, a sculptor, or another creator of physical art. You gain insight and inspiration from the act of creation. Your works bring laughter, tears, and epiphany to those who view them.

Heroic (Place: Modules: An adventure led by an NPC or through a gate that includes less than 12 PCs)

You are a hero. Perhaps you come from a time lost, like Fortune's Bend's past. Perhaps you are a modern hero, who has put yourself in peril to save others. You put the good of others and the good of the world above your own safety.

Leisure (Resource: Coin)

You have money and goods at your disposal. When you are hungry there is food, when tired there are the softest of beds, and when you want to go shopping there are always funds and eager merchants to sell you things. You grew up with money and know how to spend it.

Mariner (Place: Physical Challenges and Water)

You could have been the captain, first mate, or a sailor upon a vessel on the seas or rivers. You know navigation, ropes, and a wide range of ports of call. As a mariner you understand the weather, the tides, and the call of the waves.

Mendicant (Interaction: Helping others in need)

You spent your years helping those in need, setting bones, healing the ills of those around you, and learning about what cures and afflicts the body. You may have been the town healer, worked in a large house of healing, or traveled to help those in need.

Mercantile (Resource: Goods and Trade)

You may have worked in a merchant house, run your own store, or traveled from town to town buying and selling goods. As a merchant you understand the real value of money and have connections that allow you to turn coin into goods or coin into more coin.

Military (Place: Field Battles: Any large-scale combat encounter including more than 12 PCs)

You spent years serving in an army as a soldier or officer. You could have served in a kingdom's army, as part of a mercenary company, or in the defense of a city. You know the ways of battle and understand the honor that comes from following a respectable commander.

Courts (Interaction: Noble and political interactions)

Maybe you are the 7th child of a noble of the sword and gained recognition from your parents' martial lineage. Maybe you were adopted by a Baron and gained her family name. Maybe you are descended from a long line of royalty that has seen better days. Regardless of where you got your name, you come from a noble background and can claim lineage within your kingdom. While you have noble lineage this background does not grant you any inherent political or titular power. (Note: You cannot be of the direct line of the ruler of a kingdom or some other noble of significant status. You can be of a line related to the ruler, but it would be far enough away that there is no likelihood of inheritance)

Poverty (Resource: coins)

You never knew if you'd have enough food to eat, a place to sleep, or somewhere to get in out of the rain. Perhaps you are an orphan who had to make their own way, maybe your family fell on hard times and you had to work from a young age, or you might have had everything taken away by a bandit and were left with nothing. You know how to survive like no one else, because you've had to.

Reformed (Interaction: Interacting with or discussion of villains)

You were not a hero or even a good person. You committed foul deeds and made dark deals. But that is the past. You have changed and are that person no longer. You know what it means to be a good person, because you have seen the darkness and how easy it is to fall into the evil. Now that you have come to the side of good, you understand more than any how important it is to stay there.

Stargazer (Specialty: Shade)

The constellations of the [Shade](#) drew you from a young age. Maybe it was your choice, maybe it was theirs, but your past was bound to the [Shade](#). You may have traveled it when young or lived on the edges of it. You know the [Shade](#).

Traveler (Place: Any time you pass through a gate, but not outside of the World)

You never felt comfortable living in a single place. Perhaps you grew up in a family that was nomadic. Maybe you just left your place of birth to see what was out there. Or maybe you are following a legend across the world seeking answers. In any case, you love to travel and have seen much of the world.

University (Specialty: Pick a specific subject)

You might have been a student, a professor, or a staff member of one of the great houses of learning. You have experience with classes, books, and researching information. You know the way to mine for the right answer within a tome and how to record information so it is not lost.

Wilderness (Place: forests)

Soft beds, ample food, the comforts of civilization, these things were not for you. You spent your years in the wilderness. Perhaps it was by fate, because you were lost there; by choice, as you wanted away from the life of cities; or by necessity, as you had to leave your home. In any case, you know of life within the forests and wild places.

Foundation Skills

Research

All [Foundations](#) grant you the ability to research on a topic explicit to your specific [Foundation](#). For example, a person with a University background would be able to look into topics like the contents of books, libraries, or about individual professors or staff at a given institution of learning. A person with an Alchemical background could ask questions about alchemy and ingredients for Alchemy.

Place Skills

[Place](#) skills can only be used when you are in the place where your [Foundation](#) applies. For example, a soldier's Skills, being Military, works in field battles, whereas Travelers work in modules and Wilderness Skills work outside of town in forests.

Skill Name	Cost	Verbal	Description
Attack	2	'4 damage'	Twice per event you gain a 4-damage attack when in your place. Pick the type of attack, Melee , Missile , or Spell, when you purchase this ability.
Defense	2	' Reduce to 2 damage'	Once per event, reduce any damage melee , missile or packet attack to 1 damage.
Boon	2	' Grant Melee Attack 4 Damage '	Twice per event you can gift another a 4-damage attack (pick when you take this ability from melee , missile , or magic) when in your place.
War Story	2	' Grant 2 Protection '	Once per event, when you tell a war story that occurred during this event or the last event you attended, you can give yourself and the listener a protection effect.
Home Ground	2	N/A	Once per event, when you are in your place you gain an additional point of any attribute of your choice. When you leave your place or after your next Long Rest , the point is lost.
Holding	4	N/A	You have a holding which can be a place or a business which represents resources you have related to your Foundation .

Specialty Skills

Specialty skills can only be used when you are wielding the forces or arrayed against the forces your specialty implies. For example, an Arcanist would be skilled against magical beings, where-as a stargazer would be skilled in shade matters.

Skill Name	Cost	Verbal	Description
Enhance	2	N/A	Once per event, when using a healing or damage effect powered by your Foundation Type, increase the effect by four. This is an extra Thread Skill.
Expose	2	'By my gesture, expose <specialty>'	Once per event you can try to expose your Specialty by invoking your knowledge. If you are uncertain of your specialty's expose , please consult with Rules staff before using this skill. Some examples include: Astrology: Shade , Magic: Arcane , Theology: Divine , Spirits: Dead or Spirit , Nature: Beast or Plant . Others are allowed, but work with staff for the specifics.
Convert	2	'... by specialty'	Once per event you can make a damage, Agony , or Maim attack with the Trait by your specialty (e.g., ' Arcane ', ' Shade ', etc.). See above for details for traits.
Share Knowledge	2	' Grant 2 Protection '	Once per event, when you share something you learned about your Specialty this event or last one to someone you haven't told it to before, you can give yourself and the listener a Protection effect.
Long Study	2	N/A	Once per event, after you have finished studying or talking about your specialty with others, you gain a point of Insight . That point remains until your next Long Rest .
Holding	4	N/A	You have a holding which can be a place or a business which represents resources you have related to your Foundation .

Resource Skills

Resource Skills can only be used when you are dealing with coin and crafting. Your [Foundation](#) will determine what type of Resources you might have access to. For example, an [Arcaneer](#) would be skilled at crafting Arcaneering items, whereas a Merchant might do better when buying items.

Skill Name	Cost	Verbal	Description
Enhance	2	N/A	Once per event, when using a healing or damage effect powered by your Specialty, increase the effect by four. This is an extra Thread Skill.
Discover	2	N/A	You have a way of finding Resources. At check in you gain an extra 2 Drakar coin.
Convert	2	'... by Providence'	Once per event you can make a damage, Agony or Maim attack with the Trait 'By Providence'
What's in Back	2	N/A	There is an additional list of items for sale from the Guild. Once per event you can purchase one of these items.
Shopping Spree	2	N/A	Once per event, when you use a Resource (coin, components, magic items, etc.) you gain a point of Prowess . This point is lost after you take your next Long
Holding	4	N/A	You have a holding which can be a place or a business which represents resources you have related to your Foundation .

Interaction Skills

Interaction skills can only be used once empowered by an interaction. For example, a diplomat might be empowered by a political discussion where-as an entertainer would be from a performance .

Skill Name	Cost	Verbal	Description
Not my Fight	2	N/A	Once per event, if you are roleplaying in an encounter and it turns into a fight, you can turn to Spirit for 10 seconds and move away from the center of the combat
Observer	2	N/A	Once per event, when there are too many people for a module, you can offer to go as a Spirit instead of a participant. You must stay to the side, avoid combat, and can only talk in whispers.
Extrovert	3	Refresh two attributes to self	Once per event, when you engage in your signature RP (based on your type of Interaction), you can refresh two points of Insight , Fortitude , or Prowess .
Fun to Be Around	3	Refresh two attributes	Once per event, when you engage in your signature RP (based on your type of Interaction) you can refresh two points of Insight , Fortitude , or Prowess to another.
Mutual Understanding	2	N/A	Once per event, after a social Interaction of your type, you gain a point of Insight . This point is lost after you take your next Long Rest .
Holding	4	N/A	You have a holding which can be a place or a business which represents resources you have related to your Foundation .

Cultures

Numina has 16 different cultures for you to pick from when creating your character. Cultures provide a backdrop on where and how your character grew up and the unique traditions and experiences they would have coming from those cultures. In addition, each culture offers a specialized Research Topic that their citizens excel in.

Available Cultures:

Culture	Research Topic
Aluvair	Natural Phenomena
Dovenost	Item provenance and craftsmanship
Eltiel	Military
The Five Duchies	Spirits of the Dead

Culture	Research Topic
Kindaria	Exploration
Konnigstrava	Rituals
L'Dahn Linenation	Historical References
Merrigor	Undead
Melluria	Earth Works/ Geology
Myos Islands	Trade and Travel
Ophrailes	Magical Theory
The Reach	No unique research topic
Rues	Religion
Scyllina	Noble Intrigue
Spyndelmere	Magical Afflictions
T'barris	Hunting

Culture Skills

Skill Name	Cost	Verbal	Description
Appreciation	2	'Grant Defense Guard'	When you share something of value from your culture (like a meal, drinks, or appreciation of cultural art or music) with another player who isn't of your culture, you both gain a 'Guard' effect to the next called melee , missile , or packet attack that strikes you.
Camaraderie	2	'Heal 4 and Repair 4 Armor to <Culture>'	Once per event, when you see someone else of your culture in trouble, you can bolster them by reminding them of a value of your homeland and using a touch packet to heal them and restore their armor .
Garb	2	Imbue to self '+1 Armor'	Once per event, when you dress in the style of your culture, your clothing takes on additional protection . This allows you to exceed the maximum number of armor points normally available to you. This effect ends when you take your next Long Rest or change out of that outfit.
Homeland	2	N/A	Once per event, when you travel to your homeland, you gain an extra point of Prowess , Insight , or Fortitude . This point is lost when you take your next Long Rest or leave your homeland.
Practice	2	'Grant <attack> 4 damage by <Trait>'	Once per event, when you act in a manner that exemplifies your culture (something you feel meets the style and mannerisms defined in the cultural writeup), you can gain a grant attack (melee , missile , or spell) for yourself or another.
Resource/Contacts	Included	N/A	You have individuals you can contact via Courier as someone you know. They provide access to research.

Domains

When you create your character, you will have the ability to choose your character's single Domain. Your Domain represents a role in a battle. Think about a Domain as what you envision as your character's main function in a battle. Do you see yourself with a bow shooting arrows at your foes, do you see yourself as a healer moving about the battlefield saving your companions, or perhaps you see yourself as indomitable, able to take more blows than the average person and holding the line. These roles translate into Domains.

It's important to understand in Numina that a Domain does not define everything about you, as being of [Water](#) doesn't stop you from gaining Skills and [Excellencies](#) in other roles both on and off the field. A Domain only gives you advantages to a specific role. In fact, someone who chooses the [Water](#) Domain may be more effective or more powerful with archery than someone who holds the [Air](#) Domain.

Air

You have advantages for using a longbow, crossbow, Tinkering or Arcaneering device to shoot [missile](#) attacks. These skills include increasing base damage of effects, impacts to your ammunition, how the [missile](#) emitting device can be used and other enhancements to your use of [missile](#) attacks upon the field.

Skill Name	Cost	Verbal	Description
Air's Determination	0	'2 Damage '	When you take a Short Rest you gain three Archery attacks of 2 damage.
Air's Touch	4	N/A	When you take a Short Rest , your next Missile attack that costs an attribute to use is free.
Air's Grace	4	N/A	You can refresh your quiver in 30 seconds instead of a minute.
Air's Skill	2	N/A	Your quiver can hold 10 arrows instead of 5. In addition, once per Short Rest , you can refresh your quiver with a 10-second Rest .
Air's Last Stand	2	'6 Damage '	Once per event, you can shoot an archery attack of '6 damage.'
Air's Gift	2	' Refresh Quiver to self'	Once per event, you can instantly reset your quiver and gain the effect of Air's Touch at the same time without the need for Rest .
Air's Shield	2	Resist	Once per event, when you are hit by a missile or packet attack, call out ' Resist ' to negate the attack.
Empower Air	3	Thread Skill	When you make a Missile Attack which does 4 damage or greater, add 1 to the total.
Enhance Air	3	Thread Skill	When you use a skill which provides multiple Missile damage attacks, you gain 1 extra Missile Attack .

Earth

You gain enhanced skills for using beneficial effects when you plant yourself in one place and don't move while using your abilities. To gain the benefits of the Earth Domain, the user takes a [Short Rest](#) in a location (1 minute of rest). At the end of that [Short Rest](#), they gain additional benefits when using abilities to restore and enhance those around them. Should the individual with the Earth Domain move from the location where they set themselves, they lose the advantages granted by the Domain and only regain them when they take another [Short Rest](#).

You must choose a beneficial trait for your healing. Options include:

- Arcane - If you are a wizard, mage or other arcane practitioner
- Faith - If you are a priest or channeler of Divine power
- Surgery - If your healing comes from your ability to handle wounds via medical practices

Skill Name	Cost	Verbal	Description
Earth's Determination	Included	(See description)	When you complete First Aid on an Unconscious person, you can also heal them for 1 Vitality .
Earth's Touch	4	(See description)	If you are: (1) at a Place of Peace , (2) you take a Short Rest , and (3) are Centered , you gain two uses of 'heal 2,' and 'grant 2 Protection by [your Trait].'
Earth's Grace	4	N/A	Each time you center , you gain a point of Protection .
Earth's Skill	4	N/A	You gain double from any Skill which provides resources or coin.
Earth's Last Stand	2	Imbue Spirit to self	Once per event, if you are Centered , you can take Spirit form for up to one minute. (See rules on Spirit form).
Earth's Gift	2	Imbue Centered	Once per event, you may ' Imbue Centered ' to self to instantly become Centered .

Skill Name	Cost	Verbal	Description
Earth's Shield	2	Resist	Once per event, when you are hit by a packet or missile effect, you can say 'Resist' to negate the attack.
Empower Earth	3	Thread Skill	While Centered , your grant Protection or heal effects of 2 or higher are increased by 1.
Enhance Earth	3	Thread Skill	While Centered , your Skills which allow you to give two or more grant effects gain 1 additional effect.

Fire

You have advantages for methods of causing damage and inflicting effects by [packet](#). This includes not just magical effects, but those created through certain Alchemical, Tinkering, Arcaneering, and other non-beneficial [packet](#) effects. These Skills include increasing base damage of effects, increasing the number of effects per casting, and other enhancements to your use of [packet](#)-based attacks upon the field.

All base castings by the Fire Domain have the trait [Fire](#).

Skill Name	Cost	Verbal	Description
Fire's Determination	Included	'2 Damage by Fire '	When you take a Short Rest , you gain three packet attacks of 2 Damage by Fire .
Fire's Touch	4	N/A	When you take a short rest , your next Non-Beneficial Packet attack that costs an attribute to use is free.
Fire's Grace	3	N/A	Once each Short Rest , you can call 'Surge' and refresh your packet Flurry.
Fire's Skill	4	N/A	You can use packet attacks while you have a staff or Basic single-handed weapon in one hand.
Fire's Last Stand	2	'6 damage by Fire '	Once per event, you can cast an effect of '6 damage by Fire .' Twice per event you can call 'Surge' and refresh your packet Flurry.
Fire's Gift	2	'Refresh <Skill Name> to self'	Once per Long Rest , when you miss with a packet attack which is a one-time per-event Skill, you can rest for 10 seconds to regain that ability. You cannot use this Skill on Skills that have multiple effects, nor can you use this Skill if you used another Skill that is triggered by missing your target.
Fire's Shield	2	'By my gesture repel by < Trait >'	Once per event, you can point at a target and Repel them using your Trait . Twice per event you can call 'Surge' and refresh your packet Flurry.
Empower Fire	3	N/A	When you cast an offensive packet attack which does 4 damage or greater, add 1 to the total.
Enhance Fire	3	N/A	When you use a Skill which provides multiple packet damage attacks, you gain one extra packet attack.

Ice

You have advantages for skills, magic, and other methods of preventing damage to yourself. You may have strong [armor](#), the ability to heal yourself quickly, or be able to divert attacks away from yourself. These could be powered from any number of sources, be it your own acumen, some skill at battle, magical or divine protections.

Skill Name	Cost	Verbal	Description
Ice's Determination	Included	'Repair 1 Armor to self'	When you take a Short Rest , gain three uses of 'Repair 1 Armor to self'.
Ice's Touch	4	'Repair 1 Armor '	When you take a Short Rest , gain three uses of 'Repair 1 Armor '. This can stack with Ice's Determination.
Ice's Grace	4	Resist	Once per short rest, you can Resist an effect which would destroy your shield or armor .
Ice's Skill	4	N/A	You gain the ability to use Heavy Armor . Prerequisite: medium armor .

Skill Name	Cost	Verbal	Description
Ice's Last Stand	2	'Heal 5 and Repair 5 armor to self'	Once per event, heal 5 and repair 5 armor to self.
Ice's Gift	2	'Grant 2 Protection to self'	Up to three times per event, you can 'Grant 2 Protection' to yourself or another.
Ice's Shield	2	'Reduce by Ice's Shield'	Once per event, when you would have fallen due to called damage, you instead remain standing with one Vitality.
Empower Ice	3	Thread Skill	Your effects that 'heal to self' for 2 or greater are increased by 1 point. Say 'Increase' when you use this effect.
Enhance Ice	3	Thread Skill	You apply a Thread Skill to your armor that reduces attacks that do 5 or more damage by one point. This skill requires that you wear heavy armor. Say "Reduce" when you use this skill.

Lightning

You have advantages for skills, magic and other methods of causing damage by a [melee weapon](#). This includes all methods of [melee](#) attack, be it through channeling powerful arcana, calling upon divine imbuelements, strange, crafted [melee](#) armaments, or just your own claws and muscles. As with the other [Domains](#), you gain the option to purchase abilities that enhance your [melee](#) attacks or provide you with other [melee](#) attack advantages.

Skill Name	Cost	Verbal	Description
Lightning's Determination	Included	'2 Damage'	When you take a Short Rest , you gain three Melee attacks of 2 Damage .
Lightning's Touch	4	N/A	When you take a Short Rest , your next Melee attack that costs an attribute to use is free.
Lightning's Grace	4	'Resist'	Once per Short Rest you gain the ability to resist a ' Destroy weapon ' effect.
Lightning's Skill	4	N/A	You gain the ability to use your called melee weapon attacks 'by Force ' in place of the default weapon trait. Additionally, you gain the ability to fight with the following weapon styles: two one-handed weapons, spear and one-handed weapon , spear and buckler.
Lightning's Last Stand	2	N/A	Once per event, you can make a melee attack of '6 damage.'
Lightning's Gift	2	'Grant Melee attack'	Twice per event, you can grant a melee attack of 3 damage to yourself or another.
Lightning's Shield	2	'Parry'	Once per event, you can negate a melee attack by calling ' Parry .'
Empower Lightning	3	Thread Skill	When you make a melee attack which does 4 damage or greater, add 1 to the total.
Enhance Lightning	3	Thread Skill	When you use a Skill which provides multiple melee damage attacks, you gain 1 extra melee attack.

Water

You have advantages for skills, magic, and other methods of healing wounds and curing effects. This includes skills that [Increase](#) the effectiveness of individual healing effects and reduce the time that it can take to use healing skills that take a duration.

You must choose a beneficial trait for your healing, tied to a Source. Options include:

- Arcane - If you are a wizard, mage or other arcane practitioner
- Faith - If you are a priest or channeler of Divine power
- Surgery - If your healing comes from your ability to handle wounds via medical practices.

Skill Name	CP Cost	Verbal	Description
Water's Determination	Included	'Heal 1 by <Trait>'	When you take a Short Rest , you gain five 'Heal 1 by <Trait>' beneficial effects.
Water's Touch	4	N/A	When you take a Short Rest , your next beneficial effect skill that costs an attribute to use is free
Water's Grace	4	'... and heal 2...'	Once per Short Rest , when you use a skill (other than First Aid) with a Cure effect you improve the effect to 'Cure X and heal 2'
Water's Skill	4	N/A	You can use packets (beneficial or non- beneficial)while you have a staff or single- handed weapon in your off hand.
Water's Last Stand	2	'Heal All by [Your Trait]'	Once per event you can use a touch packet to heal someone else. Twice per event you can call 'Surge' and refresh your packet Flurry.
Water's Gift	2	'Cure Physical, Mental, Elemental, or Metabolic by [Your Trait]'	Once per event you can cure a single physical, mental, elemental, or metabolic effect to someone else. Twice per event you can call 'Surge' and refresh your packet Flurry.
Water's Shield	2	'Grant 4 Protection by <Your Trait>'	Once per event you can grant 4 protection to someone else. Twice per event you can call 'Surge' and refresh your packet Flurry.
Empower Water	3	Thread Skill	When you cast a healing effect which does 2 or more add 1 to the total
Enhance Water	3	Thread Skill	When you use a skill which provides multiple healing effects, you gain one extra effect.

Excellencies

Excellencies are the skills your character brings to the game world. A character can choose up to three Excellencies (this is a hard limit).

Excellencies are listed with alignment to one or more [Domains](#). This alignment is informational only and helps you understand the types of skills offered by the Excellency. You may take any Excellency regardless of your chosen Domain.

Air

Ballista

Skill Name	Cost	Verbal	Description	Attribute
Trio of Arrows	Included	'3 Damage '	Spend one Attribute to make two archery attacks of 3 damage.	1 Insight
Refresh Quiver	4	'Refresh Quiver to self'	Spend one Attribute to instantly refresh your quiver. Effects that trigger from your quiver being refreshed are activated.	1 Prowess
Extended Quiver	2	N/A	Once per Short Rest , you can refresh your quiver with a 10 second focus .	N/A
Prepare Arrow	3	N/A	Once per Short Rest , you can add +3 damage to a called damage archery attack.	Thread Skill
Rain of Arrows	3	N/A	You can add +1 damage to a called damage archery effect if this effect is targeting a different target than your last missile attack.	Thread Skill
Restraining Bow	4	'Restraining Bow'	You can now restraining your bow in 3 seconds versus 10 seconds.	N/A
Half Score of Arrows	2	'3 Damage '	Once per event, you can call upon the Air and grant yourself 10 additional missile attacks of 3 damage by bow or crossbow.	N/A

Skill Name	Cost	Verbal	Description	Attribute
Refresh Ally	4	'Refresh Quiver'	You have trained to quickly put arrows in another's quiver. Use a touch packet to refresh another person's quiver.	1 Insight

Stalker

Skill Name	Cost	Verbal	Description	Attribute
Sharpened Arrow	Included	'4 Damage '	You make a basic archery attack at your foe of 4 damage.	1 Insight
First Blood	3	See description	The first archery attack you make with a bow after refreshing your quiver is +3 damage. If your first arrow is uncalled, you can use a called '4 Damage ' attack.	Thread Skill
Target of Ire	3	' Imbue to self'	Once per short rest, you can take 10 seconds to identify a target. During that time, you cannot move, attack, use any other game skills, or take non-beneficial effects. From that point on, all called damage arrows attacks towards your chosen target are +2 damage. If you hit anyone other than your chosen target with an archery attack, your aim is lost.	Thread Skill
Hooked Arrow	4	' Agony '	You use an arrow with barbed ends to distract your foe.	1 Fortitude
Penetrating Arrow	4	'8 Damage '	Once per Long Rest , you use a specially prepared arrow to strike down your foes.	1 Insight
Watching your target	4	' Avoid '	If the individual you have set as your target attacks you, you can spend one Attribute to negate the attack.	1 Fortitude
Set your sights	2	' Imbue to self'	Twice per event, you can instantly choose a new target without taking time to study them.	N/A
Celebration of a kill	3	' Heal 2 to Self '	Your success in felling a target buoys you, returning health. If you kill your target, you can heal 2 to self.	N/A

Earth

Forge fire

Skill Name	Cost	Verbal	Description	Attribute
Serrated Blade	Included	' Grant Melee attack agony '	Grant Melee Attack 'Agony.'	1 Insight
Armor Repair	4	' Repair 1 Armor '	While Centered , use this Skill to gain 4 uses of ' Repair Armor '. If you are not Centered , gain 2 uses of ' Repair Armor '. If you use this Skill again before all previous uses of ' Repair Armor ' have been expended you lose the unused uses.	1 Fortitude
Weapon Repair	2	' Repair Weapon '	While Centered , spend 30 seconds to repair a destroyed weapon or shield . If not Centered spend 1 minute.	N/A
Sharpen Weapon	4	' Grant Melee Attack 3 Damage '	You can Grant a melee attack to your companions or yourself.	1 Insight

Strong Center	3	N/A	While Centered , when you use a skill which provides multiple healing effects, you gain one extra effect.	Thread Skill

Fire

Inferno

Skill Name	Cost	Effect / Verbal	Description	Attribute
Blast of Flame	Included	'3 Damage by Fire '	Spend an attribute to gain two packet attacks of 3 Damage by Fire to send at your foes.	1 Insight
Fuel the Fire	3	N/A	When you use a skill which provides multiple damage packet effects, you gain one extra effect..	Thread Skill
Overdraft the Flame	4	'5 Damage by Fire '	Once per Long Rest , spend one Fortitude to gain two packet attacks to burn your foes. Once per Long Rest you can use the Surge skill.	1 Fortitude
Control the Elements	3	N/A	You can convert your Packet attacks to another element. Choose one additional element. You can choose the element from the Elemental Trait Group. You can now switch between the original trait and your new element for all Beneficial and non-Beneficial packet attacks.	N/A
Channel of Fire	2	'3 Damage by Fire '	Once per event, you can call upon the flames and gain 10 packet attacks of 3 damage by Fire to rain upon your foes. Purchasing this skill also grants you, twice per event, you can call Surge and reset your packet flurry.	
Draw Heat	4	'Slow by Fire '	You draw the heat from your foes leaving them lethargic. Spend one attribute and strike them with a packet attack and call out "Slow by Fire ."	1 Insight
Choking Smoke	4	'Silence by Fire '	Spend an attribute to make a packet attack of Fire to silence your foes.	1 Fortitude

Skill Name	Cost	Effect / Verbal	Description	Attribute
Overwhelm	2	'8 Damage by Fire'	Once per event, you may make a packet attack with a great conflagration of flame.	N/A

Slayer

Skill Name	Cost	Verbal	Description	Attribute
Immolate	2	'Death by Fire'	Once per event, you may make a packet attack to burn your foes to death.	N/A
Bank the Flames	2	'Refresh Immolate to self'	Once per event, after a Long Rest , you can restore your use of Immolate.	Thread Skill
Fiery Bolt	4	'5 Damage by Fire'	Spend one Prowess to make a packet attack of 5 damage by Fire to strike down your foes.	1 Prowess
Char the Flesh	Included	'Agony by Fire'	Spend a point of Fortitude to make a packet attack of 'Agony by Fire'.	1 Fortitude
Nay to the Reaper	4	'Resist' and 'No Effect'	Once per Long Rest , if you are hit by a death effect or a death strike, call out 'Resist death.'. You remain immune to death strikes (but not other death effects) until the end of your next Short Rest .	1 Prowess
Little Death	4	'Paralyze by Fear'	Once per Short Rest , you can Paralyze your foes with the images of their pending demise. Spend two Fortitude and make a packet attack to freeze your foes in place.	2 Fortitude
Death Curse	2	'Refresh Immolate to Self'	If your use of Immolate misses or it is totally negated by any called defense including No Effect , you can refresh the skill after Long Rest . Additionally, if you enter the gate of death as a spirit of the dead and emerge from the gate, you can refresh one use of Immolate or Bank the Flames.	N/A
Death Washes Over	4	'Repel by Fear'	Spend one Prowess to make a Packet attack to keep your foes at bay.	1 Prowess

Ice

Bastion

Skill Name	Cost	Verbal	Description	Attribute
Well Fitted Armor	Included	'Grant Guard Called Damage to self'	When you spend a minute to reset your armor , you can invoke a 'Guard versus melee damage.'	1 Insight
Fully Armored*	3	N/A	Your heavy armor is now worth 5 points.	N/A
Extra Armor	3	'Grant Parry Called Damage to Self'	The skill 'Well Fitted Armor ' now provides a Parry instead of a Guard .	Thread Skill
Quick Fix	4	'Repair 3 Armor to Self'	Place your hand on your torso and roleplay for 3 seconds to repair 3 points of armor to the armor you are wearing.	1 Fortitude
Taking Time	3	N/A	Once per Long Rest , you may use the Skill 'Well Fitted Armor ' at no Attribute cost.	Thread Skill
Retake the field	2	'Repair all armor '	Once per event, you can repair all your or a companion's armor . If you use this skill on yourself, you can treat this as if you spent a minute fixing your armor for skills that impacts.	N/A

Skill Name	Cost	Verbal	Description	Attribute
Lockdown	4	'Grant 5 Protection and Slow to Self'	Once per short rest, you may 'grant 5 Protection to self and Slow to self'. When the Protection is spent the Slow ends. (The Slow counts as a physical effect and can be cured without the loss of protection.)	1 Insight
Return the blow	4	See description	When you are hit by a damage attack of 5 or less, and you take the damage or resist the damage with a called defense, you can use that exact same attack against your attacker with the same Trait as the triggering attack.	1 Fortitude

**Fully Armored does not raise the Heavy Armor maximum. It allows you to reach the normal Heavy Armor maximum through the skill, rather than relying on another effect to grant those armor points.*

Defender

Skill Name	Cost	Verbal	Description	Attribute
Guard	Included	'Grant Guard Melee to self'	You can protect yourself from swords and spears by granting yourself a Guard.	1 Fortitude
Well Guarded	3	'Grant Extra Guard Melee to self'	When you receive a Guard grant you can instead treat it as a 'Grant Extra Melee Defense, Guard.'	Thread Skill
Parry	4	'Parry'	Use this skill to 'Parry' a melee blow.	2 Fortitude
Shrug it off	2	'Reduce to 1 Damage'	Once per event, reduce the next 3 called damage effects you are reduced to '1 Damage' each. Say 'Reduce to 1 Damage' each time.	N/A
Just Tough	4	'Reduce to 2 Damage'	Once per Short Rest, reduce the first called damage effect you take to 1 damage.	1 Prowess
Riposte	4	See description	Once per Long Rest, when you completely negate a called melee damage effect, you can spend one attribute to attack with that exact attack.	1 Prowess
Used to it	2	N/A	Once per event, after you have been struck with a melee attack, you can invoke this skill to reduce the cost of your Parry skill down to 1 Fortitude for future attacks of that specific number or effect. The reduced cost continues until you Short Rest.	Thread Skill
Once more into the Fray	3	'Refresh Used to It to self'	Twice per event, after a Long Rest, you can refresh the use of the skill 'Used to it.'	N/A

Lightning

Dervish

Skill Name	Cost	Verbal	Description	Attribute
Flurry of Blows	Included	'2 Damage'	Spend one Attribute to make two melee attacks of 2 damage.	1 Fortitude
Storm of Blows	3	N/A	When you use a skill which provides multiple melee attacks, you gain one extra attack.	Thread Skill
Painful Strike	4	'Agony'	You strike a painful blow to your opponent, call 'Agony'.	1 Prowess
Follow up Blow	3	"2 Damage"	When you hit an opponent with Painful Strike, and they take the effect without a defense, you gain a '2 Damage' to use against them while they are under the effect of the agony.	Thread Skill
Strong winds	2	'N/A'	Once per event, melee attacks that cause 2 damage now cause 3 damage. This ends when you take your next Long Rest. This Thread Skill breaks the rule of 3 Thread Skills per effect.	Extra Thread Skill

Skill Name	Cost	Verbal	Description	Attribute

Channel Storm	2	'6 Damage by Wind'	Three times per event, you may make a melee attack or packet attack of 6 damage by Wind .	N/A

Grenadier (Fire / Air)

You have a tinkered device that can create different effects based on the ammunition added. Your projector can also be a crossbow and used as such. To use a projector as a crossbow you must purchase the Archery skill. Since a projector is an Archery attack, all attacks from your projector are [Missile](#) attacks.

It takes one minute of RP to change ammo types. If your projector is disarmed, you must drop it and cannot use effects while it is dropped. If your projector is destroyed you cannot use the projector again until it is repaired, which can be done for no [attributes](#) at a tinkering or arcaneering station. When you assign a given element as your ammunition you gain both skills associated with that element.

Skill Name	Cost	Verbal	Description	Attribute
Lightning Ammunition	Included	'5 Damage by Lightning ' or ' Weakness by Lightning '	Shocker - spend 1 Attribute to gain 1 packet attack of 5 damage. or Stunner - spend 1 Attribute to gain one packet attack of Weakness .	1 Insight
Fire Ammunition	4	'3 damage by Fire ' or ' Agony by Fire '	Flamethrower - spend 1 Attribute to gain 2 packet attacks of 3 damage. or Burn - spend 1 Attribute to gain one packet attack of Agony .	1 Prowess
Earth Ammunition	4	'2 damage by Earth ' or ' Maim by Earth '	Shardthrower - spend 1 Attribute to gain 4 packet attacks of 2 damage. or Shatter - spend 1 Attribute to gain one packet attack of Maim .	1 Insight
Ice Ammunition	4	' Slow by Ice ' ' Short Paralyze by Ice '	Icy Surface - spend 1 Attribute to gain a packet attack of Slow . or Shatter - spend 1 Attribute to gain one packet attack of Short Paralyze .	1 Prowess
Double Barrel	3	N/A	You may now have two ammunitions active at once. Choose which two from the ammunition types you know at the start of the event. During the event, you can switch one or both ammunitions after a minute of roleplay.	N/A
Shift Loads	2	' Imbue <Element> to self'	Attribute to instantly change one active Elemental Ammunition without the need for one minute of roleplay.	1 Prowess
Twisted Projector	2	N/A	Once per event, you can use the effects of one Elemental Ammunition you know with the Trait of another you also know. For example, you can have Ice Ammunition loaded, but do the effects by Lightning . This effect ends at the end of your next long rest.	N/A
Well-made Device	3	' No Effect ' or ' Reduce to short destroy'	Your Projector is built in a way that makes it immune to disarm or reduces destroy effects to short destroy. Additionally, twice per Long Rest , you may refresh your quiver with 10 seconds of Rest .	N/A

Naturalist (Water / Air)

Skill Name	Cost	Verbal	Description	Attribute
Thorn Arrow	Included		You gain the ability to do a '4 Damage by Thorns ' missile attack with a bow or crossbow.	1 Fortitude
Wild Fletching	3	N/A	Your called damage missile attacks (archery only) do damage by thorns . Attacks by thorns do +1 damage.	Thread Skill
Curative Bolt	3	N/A	You can use arrows to cast healing or cure effect. If you miss with a healing packet , you can spend 10 seconds to regain the effect. If you use another skill before you Rest , the missed one is lost.	N/A
Shade of the Forest	3	N/A	Your healing effects by "Salve" are +1.	Thread Skill
Healing Ointment	4	' Heal 4 by Salve'	You can create a natural salve to Heal yourself or your companions.	1 Insight
Call Forth the Forest	2	See description	Once per event, you can call upon the strength of the forest and gain 10 effects of " Heal 3 by Salve," Cure ' Slow by Salve,' or arrows of "3 Damage by Thorns ."	N/A
Living Bow	3	' Resist '	After a Long Rest , your bow is enchanted, and you can resist the first two strikes against it that would require you to restring your bow. When your bow is struck call out " Resist ." Additionally, once per Long Rest if you can touch a tree, you can refresh your quiver with 10 seconds of Rest .	N/A
Nature's Touch	4	'6 Damage by Thorns '	Once per Short Rest , touch a tree and gain a special missile attack that does '6 Damage by Thorns .'	1 Fortitude

Ordinator (Water / Earth)

Skill Name	Cost	Verbal	Description	Attribute
Continuous Healing	Included	'Heal 2 by Water'	When Centered , spend 1 Attribute for one heal 2. You can refresh the heal 2 twice with 10 sec of roleplay.	1 Insight

Lava Flows	3	N/A	When you use a packet attack which came from a Grant effect, you can apply Thread Skills to the use of the grant effect as if it was a skill. If you miss with a Grant packet attack, and you are Centered , you can expend your Center to regain the packet attack. You must use the packet attack as your next called attack or it is lost.	Thread Skill
Refocus	3	N/A	If you miss with a packet attack, and you are Centered , you can expend your Center to regain the packet attack. You must use the packet attack as your next called attack or it is lost.	N/A
Hardened Lava	3	" Root by Earth "	Spend a point of Prowess to cast a Root effect.	Prowess
Barrage of Lava	2	' Grant Packet Attack , 5 Damage by Fire '	Once per event, gain 4 uses of " Grant Packet Attacks , 5 Damage by Fire "	N/A
Split Lava Flow	3	See description	Once per long rest, when you Grant an attack to yourself, you can give the same Grant to an ally	Thread Skill

Expressions

Everyone has somewhere they express themselves. This can range from what they focus on, where they travel to or what they create. When you create your character, you may choose up to two Expressions*: Your first Expression costs 5 CP and the second costs 6 CP.

**In some cases, a player may take a 3rd Expression by giving up their 3rd Excellency slot. If you'd like to do this, please email NuminaRules@gmail.com and staff will help confirm your build.*

Aspected

You have not two, but three aspects. This breadth of Aspects allows you additional abilities.

Skill Name	Cost	Verbal	Description	Attribute
Third Aspect	Included	See Description	You may choose a 3rd aspect for your character. You also gain one of the following three abilities which can be performed by any of your three Aspect Traits: Bane - Spend an attribute to make a 5 Damage Packet , Melee , or Missile Attack Balm - Spend an attribute to make a touch packet of heal 5 Repulse - Spend an attribute to make a Packet , Melee , or Missile Attack of Repel	1 Fortitude

Greater Aspect Balm	4	"See Description"	You can " Absorb to Heal 2 ", " Cure " or " Purge " an effect by Your Chosen Aspect Trait .	1 Fortitude

Far Traveler

You are at home in more than a single place, learning skills and knowledge from each of them.

Skill Name	Cost	Verbal	Description	Attribute
Dual Citizenship	Included	See Description	Select a second culture . This grants you the trait for your second culture . You may now choose to purchase skills from that culture as well as your first. You also gain the ability to grant strength to those of any of your cultures . Spend an attribute point and use a touch packet of 'Grant (melee , missile , or packet) attack to Culture '5 Damage by Presence "	1 Fortitude
Multinational	4	See Description	Select a third culture. This grants you the trait for your third culture . You may now choose to purchase skills from that culture as well as your first two. You also gain the ability to save those of your chosen nations. You can use this skill on any who share a culture that you have: Once per event make a touch packet of " Cure Death to Culture "	N/A
Spreading Appreciation	4	'Grant < attack > 4 damage by Will '	Say a short phrase or otherwise perform an action in a manner that exemplifies your culture (something you feel meets the style and mannerisms defined in the cultural writeup) to grant an attack (melee , missile or magic) for yourself or another.	1 Insight
Hardy Traveler	3	N/A	You gain an additional point of one attribute of your choice (Prowess , Fortitude or Insight).	N/A

Fortune teller

You have learned how to read the future through a fortune telling device such as cards, bones, tea leaves or other mediums. Your fortunes have power.

Skill Name	Cost	Verbal	Description	Attribute
Prophecy	Included	See skill description	Do a reading in a Place of Peace . Based on your interpretation, choose one of these: 1. 'Grant 2 protection by Trance '. Followed by 'Grant 2 protection to self by Trance ' 2. 'Grant melee attack 2 damage.' Followed by 'Grant melee attack 2 damage to self by Trance .' 3. 'Grant heal 2 by Trance '. Followed by 'Grant heal 2 by Trance to self by Trance '	1 Insight

Skill Name	Cost	Verbal	Description	Attribute
Greater Prophecy	3	N/A	Grants from the skill prophecy are all increased by +1	Thread Skill
Healing a friend	3	'Heal 2 to 'Name''	Once per Short Rest you can heal one of those whose fortunes you told this gather as your vision predicted their time of need. Make a beneficial packet attack to heal the target.	N/A
Hear a new tale	4	N/A	Listen to a tale from a group who went on an adventure you were not on. You may send an info skill about that adventure. This counts as an additional info skill beyond your normal two. The format of this skill should describe the adventure you were told about and then a question related to what occurred during the adventure.	N/A

Heartbinder

You are a center of the community and acts which bring the community together give you strength, which you then pass on to others.

Skill Name	Cost	Verbal	Description	Attribute
Empowered Time of Rest	Included	'Grant 2 protection to self by Sleep '	You can enchant a dwelling, so that everyone who sleeps there gains 2 protection when they awaken and leave the dwelling. Put a sign on the door of the dwelling which reminds people of this effect.	N/A
Empowered Feast	4	'Grant one Vitality by inspiration '	One time per event, when you sit with someone else to eat a full meal you can "Grant one Vitality " to yourself and your companion.	N/A
Empowered Audience	2	'Refresh 1 <choose Prowess , Insight or Fortitude > by Harmony'	Once per Long Rest , when you are an audience for a performance you can imbue the performer by clapping and then speaking with the performer afterwards, complimenting their work and refreshing one Prowess , Insight , or Fortitude to them.	N/A
Empowered Game	2	'Heal All'	When, in a Place of Peace , you play or watch a game of up to 6 people, at the end of the round you can 'Heal All' to everyone in the game.	N/A

Foreseer

You can look into the future and learn from those visions, preparing for what is to come.

Skill Name	Cost	Verbal	Description	Attribute
Ward Misfortune	Included	'Grant Guard to Self by Trance '	After a Short Rest , spend an attribute for a Guard , that will block the first called melee , missile , or packet attack, thereby warding off misfortune from yourself. After a Long Rest you gain a Guard without spending the attribute .	1 Fortitude
Certainty is Strength	2	N/A	You gain an additional point of Purpose . In addition, if a vision is presented to you by plot, you can fully refresh one of Prowess , Insight , or Fortitude .	N/A
Avoid Ill fortune	3	'Stabilize to Self' or 'Reduce to 10 Damage'	You saw this moment where you might die and prepared for it. Either, If you are unstable and hit 59 seconds, you can spend an attribute and stabilize. Additionally, if you are hit by a death effect, spend 1 Prowess to reduce the effect to '10 damage'	1 Prowess
Erase the wounds of the past	4	'Heal all by trance '	If you listen to a PC's story (for more than 30 seconds) about something they have done this gather in a Place of Peace you can call upon the gravitas of their actions to remove their wounds and your own. Make a beneficial packet attack to heal them.	N/A

Oracle

You can look into the future and learn from those visions, preparing for what is to come.

Skill Name	Cost	Verbal	Description	Attribute
See the Question	Included	N/A	Write your research skill in the following way: I don't know the exact question I'm looking to ask, but I want to accomplish something plot relevant. Example: Who can I talk to about this thing? Or I'm trying to learn something impactful about <Insert Name> plot?	N/A
Speak in Tongues	3	'Gibberish'	When you are affected by the silence spell you can still use skills and spells that normally require a verbal. You must say a short phrase in gibberish before you call the effect.	N/A
Drinking away the future	4	'Grant 2 Protection'	When you are in the tavern drinking with a group of companions of no more than 6 total, you can grant 2 protection to the group.	1 Insight
Blessed of the Constallations	2	'1x / Event'	You gain the ability to start a negotiation with Shade beings. Your group takes on Spirit form and you and your entire group can approach the Shade being and say 'Negotiations' If they say ' No Effect ' you must return to your previous location and then lose your spirit effect . If they accept the Negotiation, you can continue to speak and are a spirit until negotiations end. At which point you return to your starting point as a spirit .	N/A

Performer

You enjoy performing in front of others, be it juggling, dancing or other forms of entertainment.

Skill Name	Cost	Verbal	Description	Attribute
Protective Performance	Included	'Grant 2 protection'	When in a Place of Peace , grant 2 protection to one person. Alternatively when you use this skill after giving a Performance you can grant to all performers.	1 Insight
Set the Scene	4	'Grant Defense, Guard'	When you return from an adventure you may sing a short song or tell a short tale to set the scene of what occurred. To protect yourself and your companions from the next set of perils, you gain two ' Grant Guard ' effects that can be used on yourself or your companions. You may only use this ability once per Long Rest . If you take a Long Rest after returning from an adventure and do not use this ability, it is lost.	N/A
Composition	3	'Refresh Ability X' ('to self'	Once per event refresh one Long Rest skill. Once per Long Rest , if you create a new or expand upon a existing performance art script or lyrics you can refresh this skill.	N/A
Grand performance	3	Grant 1 Prowess, Insight or Fortitude to self	Once per event, when there is a concert, show, or other grand performance and you perform in that venue, as a reward for yourself for performing, you may ' Grant One Prowess, Insight or Fortitude ' to yourself.	N/A

Prodigy

You were a young prodigy in your field and learned deeply of those skills.

Skill Name	Cost	Verbal	Description	Attribute
Complete Focus	Included	'Purge Mental'	To use this skill you must carry an item representative of your Foundation . Take 3 seconds of Role Play while touching the item and spend a single attribute to purge any mental effect. If the item is on your person and you are affected by a paralyze effect, you can still use this skill.	1 Fortitude
Complimentary Exchange	4	'Grant 4 protection by Inspiration'	You may pass along your appreciation to someone on their skill in their Foundation . This is a roleplaying choice on your part of what is appropriate. After showing your appreciation you may use a Touch Packet on them for the effect.	1 Insight
Well Founded	4	N/A	You gain an additional use per event of each of your per event Foundation Skills.	N/A

Skill Name	Cost	Verbal	Description	Attribute
Tricks of the Trade	4	See description	Once per Long Rest , if you hold an item of your Foundation while taking a Short Rest , you can use the skill "Fire's Touch, Air's Touch, Water's Touch, Ice's Touch, or Lightning's Touch" without having to spend Void.	N/A

Remembrancer

You are tied to [Death](#) and help the living remember the dead through their Memento Mori.

Skill Name	Cost	Verbal	Description	Attribute
Tongue of the Moth	Included	' Speak to Dead'	As with the powers of the moths to hear the voices of the dead, you too can speak and learn from them. You gain the ability to " Speak to Dead" and " Speak to Spirit of the Dead. This allows you to speak to someone lying dead in front of you, or someone who has turned to spirit after they died.	1x / Short Rest
Carry Token	3	Unique skill based on chosen Memento Mori	You may carry one of three tokens on you at any time. You can switch your token after a long rest in a place of Peace . 1. Token of Joy - 1x / Long Rest - if you fall unstable and your deathcount reaches 59 seconds you stabilize. 2. Token of Sorrow - 1x / Long rest you can increase a melee , missile , or packet attack to be "and Agony by Fear ". This is a thread skill. 3. Token of Wonder - 1x / Long rest, spend two Prowess and " Grant Melee attack Five Damage and Grant Extra Melee attack Five Damage ".	N/A
Friend of Death	4	N/A	Should you die, you are known to Death as a Remembrancer and may gain additional concessions from Death (or not at their discretion) while you are within death's realm. Invoke within Death 's realm upon meeting Death while you are a spirit of the dead, by saying the phrase "I carry the memories of the dead".	N/A
Sooth Memory	4	' Cure Mental by Memory'	You can sooth those whose minds are disrupted and disturbed. You can spend one point of Insight to " Cure Mental by Memory"	1 Insight

Savant

You dabbled in many skills and learned bits and pieces from all of them.

(note, if you have multiple foundations any 1x / event skill you purchase can be used in any of the situations appropriate to all of your foundations)

Skill Name	Cost	Verbal	Description	Attribute
Skilled Learner	Included		Select a second Foundation . You can choose to purchase skills from that Foundation as well as your first. This grants you the trait for that foundation. The maximum number of Foundation skills you can take increases by 1. You may choose one of the following Open Skills and gain it at no additional cost: Buckler, Disarm Trap, Pick Locks, Cornucopia, Merchant, Platform, Resourceful, Two Weapons.	N/A See description
Fast Learner	4		Once per Long Rest , you may use any crafting skill or skill with an attribute cost you know the rules for. You do not need to have that skill as a skill you have purchased with CP. If that skill has an attribute cost, you must spend the cost.	
Multi-talented	4		Select a third Foundation . You can choose to purchase skills from that Foundation as well as your first two. The maximum number of Foundation skills you can take increases by 1. You may choose one of the following Open Skills and gain it at no additional cost: Buckler, Disarm Trap, Pick Locks, Cornucopia, Merchant, Platform, Resourceful, Two Weapons.	N/A
Hard at Work	4	N/A	You gain an additional point of Vitality . This point can allow you to go above the maximum.	N/A

Songsmith

You have the gift of song within you and you let it flow into the world.

Skill Name	Cost	Verbal	Description	Attribute
Revel in yourself	Included	'2 Damage by Force ' or 'Heal 2 by Harmony'	You gain a pool of two effects either two beneficial packets of 'Heal 2 by Harmony' effects or two packet attacks of '2 Damage by Force .' This pool starts the game empty. Once per Short Rest , When you sing a song of no less than a minute, just because, with no audience or acclaim required, you can choose to refresh this pool. (You may use this ability while taking a Long or Short Rest)	N/A
The Song Game	4	'Purge Mental to self'	When you play a song game or sing a childish tune you can purge a mental effect upon completion of the song.	1 Insight
Answer with a song	4	'Heal 3 to Self'	When someone speaks to you or sings at you and you answer them back with a song or verse, heal 3 to self. This is not a spell so you do not need your hands free, and you can be in combat while using this ability.	1 Prowess
Choral	4	N/A	When you get a group of people to join you in a song of no less than 30 seconds, your next called damage or healing effect is increased by 3.	Thread Skill

Strategist

Skill Name	Cost	Verbal	Description	Attribute
Better a Forfeit than a Loss	Included	'Resist'	You keep a chess board, deck of cards or other game in a state of half play in your cabin or a public area that occupies no more than one foot on a side. You may 'Resist' an effect, but in so doing you forfeit the game. To refresh this ability you must reset the game and replay it to the half-played state.	N/A
Enjoying the game	3	'Imbue Short Rest '	Once per event, you can 'Imbue Short Rest ' to another person. Once per Long Rest , while in a Place of Peace , you can renew this ability by playing a game of strategy, insight or luck with one or more opponents.	N/A
The joy of victory	4	'Grant 2 protection '	You have a pool of 3 Grant 2 protection effects. This pool starts game full. You can refresh by spending an attribute when, within a Place of Peace , you win a game you play with another person or persons.	1 Fortitude
Breaking the rules	3	'By Luck..'	Four times per event you can call upon luck and use a skill that requires Fortitude , Insight or Prowess without spending the attribute . When you use the skill start by saying 'By Luck..'	N/A

Virtuoso

You not only preform, but you create new works of performance art.

Skill Name	Cost	Verbal	Description	Attribute
Performance of battle	Included	'Grant Melee attack 2 Damage '	In a Place of Peace , you can grant a melee attack of 2 damage. If you have just completed a Performance, you can use this skill on up to 4 people.	1 Fortitude
Climactic Moment	3	N/A	When you are in a Place of Peace , skills that allow you to provide multiple beneficial effects, gain an additional effect.	Thread Skill
Performance of recovery	4	'Heal 5 by Water '	If you are in a Place of Peace , upon completing a Short Rest , you can heal 5 by Water to one person. If instead of a Short Rest you have just completed a performance, you can use this skill on up to 4 people.	N/A

Skill Name	Cost	Verbal	Description	Attribute
Find the Stage	4	N/A	Once per Long Rest , You may take a Short Rest and upon completion, treat your current location as a Place of Peace for the purpose of one skill from this Expression. Additionally, this ability allows you to perform while you are taking a Short Rest . If you have this skill, you can perform while you are taking your Short Rest .	N/A

Open Skills

Open skills are available for any player to purchase.

Skill Name	Cost	Verbal	Description	Attribute
Agility	4	N/A	You get the benefit of wearing light armor without having to wear armor . This includes the ability to use skills or items which affect armor by applying them to your costuming instead. <i>Agility only replaces the need for a Light Armor phys rep. If you want the benefits of Medium or Heavy armor, you must wear the appropriate phys rep for that armor type.</i>	N/A
Archery	3	N/A	You can use a bow or crossbow in combat. You may block with your bow, but not wield a weapon in your other hand. You get 5 shots, to prepare 5 more shots you must Short Rest . Called missile effects do not count against the number of shots in your quiver. If you block an attack with your bow or crossbow, your bow cannot be used for any missile attacks, either called or uncalled, until you take a 10 second Rest . Note: Core rules specifically say if you miss with a missile attack, or it is blocked you do not use up the attributes . (You do use one of your arrows from your quiver)	N/A
Buckler	3	N/A	Use a buckler in combat. You can wield in combat any one handed weapon you are skilled with.	N/A
True Sight	2	N/A	Between events you can send a Yes/ No question about something you learned in-game that is related to cosmological events. You will receive a reply that will confirm or refute the information in a 100% certain answer. An example might be 'I learned at this event there are 5 Genesori, is this true?' The answer you would get to this question is yes or no. You can send two of these per event.	N/A
Cornucopia	2	'Heal All'	When you sell an OOG item for in-game coin while in a Place of Peace , you can use a touch packet on the person who purchased the item to 'heal all'.	N/A
Courier	4	N/A	You can send a physical message across the Lattice to a recipient that you have met and been formally or informally introduced to or for whom you have a skill or plot effect granting you the ability to reach out to that person. For example, if you saw the Monarch of your country from the other side of a building, that is not an introduction. However, if you went before them and your name given to them, then you have been introduced. This is a physical letter, while it travels the magics of the Lattice and therefore can arrive in a short time, letters cannot be sent to great beings of the Shade or spirits of the dead or similar beings who don't get mail. <i>As this is a letter and there is no guarantee they will respond, but cultural expectations say they will.</i>	N/A
Disarm Traps	1	N/A	You can use tools or your hands to disable traps you find in-game. You cannot destroy any item or prop in-game without an NPC's permission. That means, unless told so, you cannot cut lines, break boxes, or otherwise damage the props. You will be given clear guidance if you can do such things as part of disarming a trap .	N/A
Effortless Armor Repair	3	N/A	You may also take a Short Rest while spending time to repair armor . If you have a skill which reduces the time required for either your Short Rest or your armor repair , this skill does not reduce the time for the second activity.	N/A
Hafted Weapons	2	N/A	You gain the ability to use hafted weapons (72').	N/A
Healing Circle	2	'Heal All'	When you take a Long Rest in a Place of Peace with a group of people no larger than 6 including yourself, to use a touch packet to 'heal all' to everyone in the circle.	N/A
Healing Touch	4	'Heal 2 by Magic'	You can wield magic to heal a minor wound	1 Fortitude

Skill Name	Cost	Verbal	Description	Attribute
Magical Strike	4	'3 Damage by Force'	You can wield magical forces to conjure a packet attack of 3 damage by force .	1 Insight
Medium Armor	3	N/A	You may wear up to 3 points of armor .	N/A
Merchant	2	N/A	When you check in you gain 3 coins. Additionally, you can sell out of game items for in-game coin.	N/A
Pick Locks	1	N/A	Certain challenges will be identified as a "lock". You cannot engage on solving that puzzle (which may be picking an actual lock) if you do not have this skill.	N/A
Platform	2	N/A	You can bring a stone / platform with you that is no larger than 30 inches on any side. You can lay this platform down and pick it up at will. Once laid on the ground it acts as safe ground on any terrain effect.	N/A
Quick Reflexes	1	'Avoid'	1x / Short Rest , if you would take an effect from a terrain effect such as Lava or a Pit on the floor, you can avoid the effect. <i>You can purchase this skill up to 3 times.</i>	N/A
Research	4	N/A	From your foundation and culture you can gain research topics. If you have access to a research topic you can submit a research request on a given topic. This skill does not provide topics by default. Topics can be earned in game through role play or purchased from your Culture or Foundation. When you submit a question, plot will reply with details on the topic. If the question is too broad or very deep, then plot may reply with some information and say, "There is more information here, but I don't have time to include it now". That means if you want the additional information, you should submit a continuation of research request the next event. <i>You will be able to gain additional research topics through the game.</i>	
Resourceful	2	N/A	When you check in for the event you gain 2 random components.	N/A
Shield	3	N/A	Use a shield in combat. You can wield in combat any basic one handed weapon you are skilled with.	N/A
Summon Light	1	N/A	You can turn on a non-candle light prop for yourself. You can hand it out, but if you do so, you can't create a new one for yourself till you get it back or the next night. The prop should not be brighter than a glow stick. <i>Note: You should not wear this around your neck, as that is reserved for people with medical conditions for visibility.</i> <i>Note: As a courtesy rule, if someone asks you to turn off or cover the light due to its brightness, please do.</i>	N/A
Summon Music	1	N/A	In your cabin or another not majorly public area, or during a special event in the tavern, you can set up background music. Note: As a courtesy rule, if someone asks you to turn off the music, please do.	N/A
Thrown Weapons	3	N/A	You may carry and use throwing weapons. When you pick up a weapon off the ground, you must take 10 seconds of activity to clean and prepare the weapon before it may be thrown again. Note, that all your collected weapons can be prepared simultaneously. You must take a Short Rest between uses of Thrown Weapons .	N/A
Two Weapon fighting	3	N/A	Use two weapons up to 46' each.	N/A
Weapon Strike	4	'3 Damage'	You can wield a weapon to make a melee attack for 3 damage.	1 Prowess

Attributes

Numina has five attributes, Prowess, Insight, Fortitude, Void, and Purpose. Prowess, Insight and Fortitude are spent when you utilize a skill. For example, a skill to perform a [melee](#) attack of '5 damage' might cost 1 Prowess. Another skill, say to allow you to make a [packet](#) attack for 'Paralyze by Force' might cost 2 Insight to use. When you spend a point of Prowess, Insight or Fortitude they are gone until they are restored by any effect which says 'Refresh' to the specific attribute. The number associated with the [Refresh](#) effect will determine how many points are restored. You start with 2 points each of Prowess, Insight and Fortitude.

Void

You start with two points of Void. You can spend a point of Void to refresh up to three points of attributes while taking a short rest. You may use these refreshed points on any of the three attributes, Fortitude, Insight, or Prowess.

Purpose

You start with five points of Purpose. You may spend a point of Purpose to refresh up to ten point of attributes while taking a long rest. You may use these refreshed points on any of the three attributes, Fortitude, Insight, or Prowess. When you spend a point of Purpose, all of your Void is refreshed as well.

The cost to increase any of your five Attributes is shown in the chart below. Some [Domains](#), [Excellencies](#), and [Aspects](#) may give a character an additional point (or more!) of an Attribute. These extra Attributes are not counted when checking the Cost to Increase an Attribute on the chart below. For example if you have an Insight of 6 where 4 are from Attribute purchases and your base, and 2 were purchased via Skills, the next increase would cost the same as increasing from 4 to 5, not from 6 to 7. Regardless of source, you cannot purchase more than 10 points of any of the three attributes of Prowess, Insight or Fortitude. The value of an Attribute can exceed the maximum based on in-game effects. For example, if you have a 10 Prowess and gain a 'Grant 1 Prowess' effect, your Prowess for that game would be an 11.

Attribute	Starting Value	Cost to Increase	Max
Prowess	2	Cost of next attribute	10
Insight	2	Cost of next attribute	10
Fortitude	2	Cost of next attribute	10
Void*	2	N/A	10
Purpose	5	4	10

**Void cannot currently be purchased. This is part of the rework tied to [Purpose/Void](#) changes.*

Vitality

Characters in Numina start with 2 [Vitality](#). You increase [Vitality](#) by purchasing additional points directly or through skills. Calculating CP costs for purchasing [Vitality](#) follows the same costs and restrictions as other attributes. A character has a maximum of 7 [Vitality](#). Just like the other Attributes effects in-game can increase your [Vitality](#) above the maximum. You start each event at with your [Vitality](#) full.

Attribute	Starting Value	Cost to Increase	Max
Vitality	2	Cost of next Vitality	7

Alchemy Formulas

Alchemy is the creation of potions, poisons, and other draughts and drafts. Alchemy can be broken up into three common paths, Elixirs, Venoms, and Volatiles. Elixirs are imbibed healing and curative mixtures. Blade venoms are poisons put on weapons. Volatiles are substances that are thrown at opponents for effects. There is said to be at least one other known path of Alchemy, Mutagens which change the user, but this must be found in-game. To create alchemical substances of a given type, you must have the specific skill for that path of alchemy.

When you create an alchemical substance, you store it on your person in a flask, vial or similar device you carry on your person. These bottles should be durable and unlikely to shatter and are referred to as Flasks. If you creature multiple types of substance, you should have a vessel that represents each type of alchemy you create. In the case of volatiles, you may choose to carry a pouch instead of a vessel. This pouch must be used only for your representation of reaching for a volatile.

By default, you cannot pass any alchemical substance off to another player. You can only use the substance on another player.

Elixirs

A character who wishes to use elixirs should carry one or more prop bottles of some kind where they store their Elixirs. All Elixirs are in bottled form in your Elixir flask until you use them. Using an Elixir requires a motion drinking or pouring from the Elixir Flask, which should take no less than 3 seconds. You may carry up to 5 elixirs total in your flasks at any time, regardless of how many flasks you carry. Unless otherwise noted, the effect of an Elixir takes effect immediately after they are imbibed.

Name	Effect	Common Component	Rare Component	Attribute
Purgative	Cure Physical, Mental, Metabolic or Elemental by Poison (choose one trait group at time of creation)	Cure Physical, Mental, Metabolic or Elemental by Poison (choose two trait groups at time of creation)	Cure Physical, Mental, Metabolic or Elemental by Poison (choose trait group at time of use)	1 Fortitude
Throat Coat	Cure Silence by Poison	Two uses of Cure Silence by Poison	Three uses of Cure Silence by Poison	1 Insight
Calcifying Draught	Cure Maim by Poison	Two uses of Cure Maim by Poison	Three uses of Cure Maim by Poison	1 Fortitude
Coagulant Powder	Two uses of Heal 2	Four uses of Heal 2	Six uses of Heal 2	1 Fortitude
Rhino Hide Potion	Grant Melee Defense: Shield	Grant Physical Defense: Shield	Grant Physical Defense: Resist	1 Prowess
Antivenom	Grant Metabolic Defense: Shield	Grant Metabolic Defense: Resist	Grant Extra Metabolic Defense: Resist	1 Prowess
Light Step	After ingesting this Elixir, if the user's next step triggers a trap or effect card, the user may call "resist". This does not work for hazard effects that apply to the entire ground area (i.e. the entire floor in a jumpy stone area)	The effect of this Elixir does not trigger on the next step, but may be activated when needed. If not used, this effect fades when the user takes a Long Rest	This Elixir may be used on hazard effects that apply to the entire ground area (i.e. the entire floor in a jumpy stone area)	1 Insight
Potion of Speed	Grant Slow Defense: Resist	Grant Slow/Root Defense: Resist	Grant Slow/Root/Paralyze Defense: Resist	1 Prowess

Name	Effect	Common Component	Rare Component	Attribute
Stabilizer	This Elixir item may be added to any other Elixir. The target Elixir may be bottled and given to others to be used at a later time. It is the responsibility of the alchemist to make sure any character they give their Elixirs to knows how to use the Elixir. A bottled Elixir does not count against your limit of 5 carried Elixirs in your flask. This Elixir does not count as a Magic Item for any rules or limitations.	There is no common enhanced Stabilizer	This Elixir may be added to any Elixir, Volatile, or Venom. In addition, the target Alchemical item does not expire at the end of the event and may be kept up to one year or until used. <i>The cost of Stabilizer when you use a rare component is 1 Ketch</i>	1 Insight

Some other elixirs rumored to exist include ones that can refresh [attributes](#) and increase [Vitality](#).

Venoms

All Venom effects are by [Poison](#) unless otherwise noted.

A character who wishes to use Venoms should carry one or more prop vials of some kind where they store their venoms. *All Venoms remain in your Venom vials until applied. Applying a Venom requires a motion pouring or rubbing the Venom on a [weapon](#), which should take no more than 3 seconds.*

You may carry up to 5 unapplied venoms at any time. Venoms may be used on your own [weapons](#) or on the [weapons](#) of others.

Name	Effect	Common Component	Rare Component	Attribute
Snakebite	Grant melee attack: 3 Damage	Grant melee attack: 5 Damage	Grant melee attack: Double 4 Damage	1 Prowess
Jellyfish Tentacle	Grant 2 Melee Attacks: 2 Damage	Grant 4 Melee attacks: 2 damage	Grant 6 Melee attacks: 2 Damage	1 Insight

Create a treatment for one rare Volatile so that it may be used twice without the need to prepare it a second time.	1 Insight

Some other volatiles rumored to exist include ones that can **stun the target** and ones that **kill**.

Tinkering Formulas

A Tinker crafts various implements at a lab and carries the resultant devices in a toolkit. A character who wishes to use tinkered devices should carry a kit or pouch where they store their various tools and devices. If a pouch is used, then this pouch may not be used to carry other items, but the toolkit itself may be stored inside another bag if desired. It is not required to carry a separate prop for each device you have prepared.

*Once crafted, Devices remain in your toolkit until readied. Readyng a Device requires a motion drawing the Device from your toolkit, which should take no less than 3 seconds. Some tinkered devices are applied directly to **weapons**, **armor**, or **players**. These devices do not require a Phys Rep as their effects are immediate after being crafted and are not carried in a Toolkit.*

Armaments

Armaments are devices a tinker crafts to aid them directly in battle. Armaments can only be used by characters with the Craft Armament skill. A tinker can carry up to 5 armaments at any time.

Name	Effect	Common Component	Rare Component	Attribute
Static Generator	Make a Packet attack of 4 Damage by Lightning	Make a Packet attack of 6 Damage by Lightning	Make a packet attack of Triple 3 Damage by Lightning	1 Prowess
Dissassembler	Make a melee attack of 5 Damage to Construct	Make a melee attack of Double 4 Damage to Construct	Make a melee attack of 10 Damage to Construct	1 Insight
Electrical Discharge	Make a Packet attack of Agony By Lightning	Make a Packet attack of Short Weakness by Lightning	Make a Packet attack of Short Paralyze by Lightning	1 Fortitude
Electrocution	Make a Packet attack of Short Destroy by Lightning	Make a Packet attack of Destroy by Lightning	Make a Packet attack of Destroy and 3 Damage by Lightning	1 Prowess
Repulsion Field	You may use either a combat-safe device or a weapon to call Disengage	Your Repulsion Field has 2 Uses	N/A	1 Fortitude

Utility Apparatus

Utility Apparatus are devices designed for specific non-combat purposes. These items can only be used by a character with the skill Craft Utility Apparatus.

Name	Effect	Common Component	Rare Component	Attribute
Lock Breaker	Expend this Device to open a lock. (Note: Do not physically destroy the lock.)	Your Lock Breaker has 2 uses before being expended.	Your Lock Breaker has 3 uses before being expended.	1 Insight
Trap Breaker	Expend this Device to Disable a Trap. This does not set off the trap while removing the Trap prop. (Note: Do not physically destroy the trap.)	Your Trap Breaker has 2 uses before being expended.	Your Trap Breaker has 3 uses before being expended.	1 Insight
Portal Generator 0 Coin	Expend this device to place a protection on a cabin. Everyone who sleeps there gains 2 protection when they awaken and leave the dwelling. Put a sign on the door of the dwelling which reminds people of this effect. Cost.	4 Protection	6 Protection	1 Fortitude
Safety Line	A Safety Line allows you to call Avoid to any one environmental effect written on an Effect card or explained as a module effect. This does not have to be Readied ahead of time.	You can use the Safety Line to pull you into a protected position for a limited time. Use the device to gain the Spirit Defense for 10 seconds.	By using the Safety line as a Grapnel you may safely travel short distances across dangerous terrain. You must carry a yellow colored prop that meets all requirements for a thrown weapon. Throw this grapnel and immediately become a spirit and walk directly to where it lands. You have the Spirit defense the entire time you are traveling to your Grapnel prop. If you are unable to find your Grapnel or are prevented from reaching it by a Gate, magical barrier, or similar impediment after 30 seconds, you lose the spirit defense and fall unstable.	1 Prowess
Lubricant Pack	You can activate the Lubricant Pack to escape from bonds. Roleplay for 30 seconds and then remove any shackle or rope props. This requires no verbal.			1 Prowess

Enhancements

Enhancements are Tinkered devices that are placed on [weapons](#) or other objects. These devices may be used by characters other than the Tinker that created them, but the effect must be fully explained or presented in written form to the user.

Name	Effect	Common Component	Rare Component	Attribute
Magical Channel	This enhancement is placed on a weapon or buckler. The wielder of that object may cast while holding the weapon or buckler in their off hand. This object may not be given to another once it is attuned to the magics of one user. This effect fades when the user takes a Long Rest . <i>Note, you may tuck a weapon under your arm that has the other weapon or buckler and still cast.</i>	The Magical Channel Enhancement does not fade when the user takes a Long Rest .	N/A	1 Fortitude
Crank Mechanism	Expend this device to instantly re-string a bow.	The Crank Mechanism has 2 uses	The Crank Mechanism has 3 uses	1 Insight
Universal Weapon Kit	This Enhancement is placed on a weapon , pair of weapons , or a shield . These weapons can be picked up and used by someone without the skills to use them. Once a user picks up these weapons, the Enhancement only works for that character. This effect fades when the user takes a long rest	The Weapon Attachment effect does not fade when the user takes a Long Rest .	N/A	1 Prowess
Portable Forge	You modify one of the pieces of your forge to allow it to carry its effectiveness when in the field. When you have traveled away from town, place the enhanced item on the ground or other flat surface. Until it is moved, all abilities that repair weapons may be done in half time	N/A	N/A	1 Fortitude

Defensive Implements

Defensive implements are designed to protect their users. These devices are activated on a target when they are crafted and are not carried in a Toolkit.

Name	Effect	Common Component	Rare Component	Attribute
Patch Kit	Grant touch attack Repair 2 armor to self	2 uses	Repair 3 armor , 3 uses	1 Fortitude
Ablative Plating	Grant Weapon Defense, Guard .	Grant Weapon Defense Resist	Grant Physical Defense Resist	1 Fortitude
Hardening	Grant 3 protection	Imbue 1 armor . This effect fades when the user takes a Long Rest . This imbue does not stack with Grant Armor effects.	Grant 1 armor	1 Prowess
Fiber Latticework	Grant Defense, Resist Destroy	Imbue by Device: The user may call No Effect to any destroy effects against the targeted weapon . This Implement lasts until the user takes a Long Rest .	The user may call No Effect to any destroy effects against the targeted weapon	1 Insight

Arcaneering Formulas

Arcaneering is the science of harnessing the elements into fabricated objects. These objects fortify and enhance aspects a Domain or some small aspect of a domain to others. Arcaneering can create two types of object: Machina and Hestia.

Machina are elementally attuned devices using crystals or other small foci to channel the elemental forces into effects. These can be carried by the [Arcaneer](#) and used on themselves or others. When using Machina which allow you to reuse an attack (e.g. Automated Quiver), additional Thread skills may not be applied to the reused attack.

Hestia are large emplacements that can be used by anyone to draw out elemental power.

A Hestia must:

- Stand a minimum of 24 inches tall
- Be constructed with a counter of some kind for players to interact with

A Hestia has a set number of uses before it runs out of power. Each time a character uses the Hestia, they must reduce the counter by 1. Hestia may have more charges added to them, and the individual Hestia will describe how to do so.

It takes an [Arcaneer](#) 1 minute to place a Hestia, and if it is picked up the [Arcaneer](#) must spend 5 minutes recalibrating the Elements of the Hestia before it can be placed again.

Hestia are Red Tag items, so may not be moved or interacted with except by the [Arcaneer](#) who created it or by those to whom the [Arcaneer](#) has explained the Hestia.

Air

Air Arcaneering harnesses the element of [Air](#) to enhance ranged projectile attacks.

Name	Effect	Common Component	Rare Component	Attribute
Target Marker	Your projectile and thrown attacks do +1 damage against a single target you choose. This is a Thread Skill.	Your projectile and thrown attacks do +1 damage against a single target you choose. You may switch targets once if your first target is killed. This is a Thread Skill.	Your projectile and thrown attacks do +1 damage against a single target you choose. You may switch targets once if your first target is killed. You may use this Machina twice before it is expended. This is a Thread Skill.	1 Insight
Tensioner	You may touch a packet to a bow that has been de-strung by blocking a melee strike . You may instantly re-string your bow.	You may use the Tensioner twice before it is expended.	N/A	1 Prowess
Automated Quiver	When making a missile or thrown called damage attack you may expend this Machina to make the same attack twice, but subtract 1 damage from each attack.	You may use the Automated Quiver twice before it is expended.	When making a projectile or thrown attack you may expend this Machina to make the same attack twice, and add 1 damage to each attack.	1 Insight

Hestia: Arrow Dispenser

This Hestia can be used to draw arrows into a quiver. When created it carries 10 arrows. More arrows can be added by spending 1 additional [insight](#) for 10 arrows or 1 Drakar for 5 arrows. This Hestia may not hold more than 30 arrows at any time.

Cost: 1 common component and 3 Drakar

Hestia: Windwalking pylon

Set up two terminus points following the normal Hestia rules. When this Hestia is activated, the user gains the [Spirit](#) defense and travels immediately to the other pylon. This Hestia has 5 charges when created. You may spend 1 [insight](#) to increase this by 5 charges. This Hestia cannot have more than 10 total charges. If you are

unable to find your pylon or are prevented from reaching it by a Gate, magical barrier, or similar impediment after 30 seconds, you lose the spirit defense and fall unstable. Cost: 1 Common Component and 3 Drakar

Earth

Earth Arcaneering harnesses the element of [Earth](#) to enhance the [Earth](#) domain.

Name	Effect	Common Component	Rare Component	Attribute
Focusing Crystal	Exhaust this Machina, touch a player and call 'Imbue Centered '	You may use this Machina 3 times before it is expended.	You may use this Machina once each time you take a Long Rest .	1 Insight
Earth Channel		While Centered if you use a Heal or Grant Protection effect you heal 1 to self or grant 1 protection. This is a Thread Skill	Earth Channel is now an Extra Thread Skill .	1 Prowess
Earthen Magnet	When you Center , Expend this Machina to gain a Guard Elemental defense. This Machina has 2 uses	When you Center , Expend this Machina to gain a Resist Elemental defense. This Machina has 2 uses	When you Center , Expend this Machina to gain a Resist Elemental or Resist Mental defense. This Machina has 3 uses	1 Prowess

Hestia: Emplaced Repair Armor Device

This Hestia can be used to instantly repair [armor](#). Each charge can repair 1 [armor](#). This Hestia begins with 10 charges and can be further enhanced by spending 1 [Prowess](#) for 10 more charges or 1 Drakar for 5 additional charges. This Hestia may have a maximum of 20 charges.

Cost: 1 Common Component and 5 Drakar

Fire

Fire Arcaneering harnesses the element of [Fire](#) to enhance the offensive magic.

Name	Effect	Common Component	Rare Component	Attribute
Everburning Flame	Expend this Machina to reuse any attack or ability that uses an elemental trait. This second use costs no additional attributes .	You may use this Machina twice before it is expended.	You may use this Machina three times before it is expended.	1 Fortitude
Scorching Focus	When this Machina is expended, the user may change the trait of all their offensive packet attacks to 'By Fire '. Additionally, if the user has damaged a target with a "By Fire " effect, they may increase all their Fire damage to that specific target by 1. This effect lasts until the user takes a Short Rest. * This is a thread skill.**	This Machina may be used twice before it is expended.	This Machina may be used once per Long Rest .	1 Insight
Heatwave	Expend this Machina and throw a packet of 'repel by fire '.	This Machina may be used twice before it is expended.	The effect changes to '3 damage and repel by Fire '. You may use this 2 times before this Machina is expended.	1 Fortitude

Hestia: Dominus' Torch

This Hestia can be used to [grant packet](#) attacks of '2 damage by [fire](#)'. When a charge is expended, call 'Grant Extra [packet](#) attack, 2 damage by [fire](#)'. A character may only have 1 charge from this Hestia active at any time. A

base Hestia has 10 charges. You can create a Hestia with 20 charges by either spending an additional 1 [Insight](#) or 2 Drakkar.

Cost: 1 Common Component and 3 Drakar

Water

Water Arcaneering harnesses the element of [Water](#) to enhance healing and curing abilities.

Name	Effect	Common Component	Rare Component	Attribute
Tidal Focus	Expend this Machina to immediately re-use a cure effect with no attribute cost. This second use may not be saved and must be used immediately after the first cure effect. This Machina may not be used on a 'Cure Death' Effect.	You may use this Machina 2 times before it is expended	You may use this Machina once each time you take a Long Rest .	1 Prowess
Flow Regulator	Expend this Machina. You may divide your heal effects into multiple uses. I.e. instead of 'Heal 5' you may instead call out 'heal 2' and 'heal 3'. You may use this Machina twice before it is expended. This Machina does not change any traits. This is a Thread Skill.	When activated you may use the effect of this Machina until your next Long Rest	This Machina may be activated Four times before it is expended.	1 Fortitude
Focusing Nozzle	Expend this Machina to remove the delay time between uses of beneficial effects. This effect lasts until your next Short Rest	This Machina may be used twice before it is expended.	This Machina may be used once per Long Rest .	1 Insight

Hestia: Stabilizing Field

Each charge of this Hestia allows a user to call out 'Stabilize by [Water](#)'. To use a charge of this Hestia you must be within arm's reach of both the Hestia and the Target of the [Stabilize](#) effect. This Hestia does not have a limit of charges, but must be activated and placed prior to use. Once this Hestia is moved after activation, it is immediately expended and cannot be used again.

Cost: 1 Common Component and 2 Drakar

Lightning

Lightning Arcaneering harnesses the element of [Lightning](#) to enhance the [melee](#) attackers.

Name	Effect	Common Component	Rare Component	Attribute
Electrical Focus	Expend this Machina when a Melee attack is negated with a called defense. That melee attack may be used again at no attribute cost.	This Machina may be used 3 times before it is expended	This Machina may be used once per Long Rest	1 Insight
Tazing Current	Expend this Machina to add 'And Agony ' to any called melee strike. This Machina also changes the trait of the attack to 'By Lightning ' This is a Thread Skill .	This Machina may be used 3 times before it is expended	This Machina may be used once per Long Rest	1 Prowess
Reanimating Jolt	Expend this Machina and call out 'Grant Extra Maim Defense: Guard '	Expend this Machina and make a packet attack of 'Cure Maim by Lightning '	Expend this Machina and make a packet attack of 'Cure All Maim by Lightning '	1 Fortitude

Hestia: Grounding Rod

This Hestia can be used to [grant packet](#) attacks of '2 damage by [Lightning](#)'. When a charge is expended, call 'Grant Extra [melee](#) attack, 2 damage by [Lightning](#)'. A character may only have 1 charge from this Hestia active at any time. A base Hestia has 10 charges. You can create a Hestia with 20 charges by either spending an additional 1 [Insight](#) or 2 Drakkar.

Cost: 1 Common Component and 3 Drakar

Ice

Ice Arcaneering harnesses the element of [Ice](#) to enhance Defense.

Name	Effect	Common Component	Rare Component	Attribute
Icy Protector	Expend this Machina to modify a shield to be usable by someone without the shield skill. This lasts until the character using the shield takes a long rest. The call to use this is Imbue by Arcaneering.	The effect of this Machina lasts until the end of the event.	The effect of this Machina lasts until the end of the event. Additionally, the shield arm does not count as occupied for the purpose of delivering beneficial packet effects.	1 Fortitude
Ablative Ice Coating	Expend this Machina and call out 'Grant extra Melee defense: Guard '.	This Machina may be used twice before it is expended.	Change the effect of this Machina to 'Parry' instead of 'Guard'.	1 Fortitude
Instant Freeze	Expend this Machina. Until the user takes a Long Rest they may convert any 'Heal' effects they receive into 'Repair Armor' effects of the same numeric value.	The effect of this Machina may be split. I.e. a 'heal 5' effect may be converted into 'repair 2 armor and heal 3'. This Machina lasts until the user takes a Long Rest .		1 Prowess
Ice Wall	When taking a rest of any kind, you may place this Machina within reach. You may call 'Guard by Ice ' to negate the first non-beneficial effect which hits you, without interrupting your rest. This Machina ceases to function when used.	When taking a rest of any kind, you may place this Machina within reach. You may call 'resist by Earth ' to negate a single non-beneficial effect which hits you, without interrupting your rest. This Machina ceases to function when used.	This Machina uses the common effect and may be used a total of twice. This machina may be picked up and moved until its second use has been expended.	1 Prowess

Hestia: Crystalline Chamber

This Hestia can be used to [grant 2 protection](#). When a charge is expended, call 'Grant 2 [protection](#) by [Ice](#)'. A base Hestia has 10 charges. You can create a Hestia with 20 charges by either spending an additional 1 [Insight](#) or 2 Drakkar. Cost: 1 Common Component and 2 Drakar

Holdings in Numina:

A Holding represents a resource, position, or sphere of influence your character can draw upon between events to shape the game world. These are not just flavor or background details-they are actionable assets tied to the game's mechanics.

Holdings allow you to submit [Info Skills](#) that leverage these resources to affect the game world. For example, "I use my ship to deliver rice to the Isles of Light for the Midsummer Festival." The staff will treat this as a meaningful interaction through your Holding, and it will count as one of your two [Info Skills](#) submissions for the event cycle.

You may only use one Holding skill per between event submission. You may not use a Holding twice even though you can submit Two [Info Skills](#).

Holdings can be almost anything tangible or intangible that provides in-game leverage: a merchant ship, an inn, a vineyard, a minor position in a royal court, or even a mystical grove occupied by an Arcanii. A Holding represents your character's ability to mobilize this asset in meaningful ways, assuming you have paid to maintain it.

While characters may own ships, estates, or businesses or be a member of a guild, convocation or noble house in their backstory or through in-game roleplay, this does *not* automatically grant them a Holding. A Holding is more than a possession-it's a resource with mechanical impact. If your character owns a ship, the ship must participate in trade or fishing or the like to stay funded. It's assumed to break even financially and requires no attention. But if you wish to use that ship to smuggle, trade, explore, or influence world events, it must be a registered Holding and you must actively pay for its operation.

You may roleplay any background you'd like (like being a farmer) without needing a Holding. For example, you

can say you “grew up on a farm” or “run a small family farm” as part of your character’s story. A farm holding is only required if you want your farm to provide between-game actions, resources, or ongoing world impact. Without a Holding, staff may acknowledge these details in roleplay, but they do not grant between event actions.

Holdings come in three levels, from small operations to vast, multi-regional enterprises. Level 1 Holdings may represent a single ship or shop; Level 2 could mean a small group of ships, a chain of shops, or regional influence; Level 3 reflects wide-reaching operations or elite status, such as being on a Convocation or leading a transnational shopping chain.

Importantly, Holdings must be approved by Plot. You cannot declare ownership of something like a national circus or influence in a court unless Plot agrees that it fits the world. In general, creative and immersive ideas are welcome, but some concepts are explicitly off-limits for balance and story reasons (e.g., a personal army or a private research library). To obtain approval, submit your Holding idea to NuminaHistory@gmail.com.

Holdings evolve in play. You may gain one through a [Foundation](#) skill, purchase one with in-game coin, or earn one through roleplay. They can grow in power, but only through substantial in-game influence not by spending coin or CP alone. Plot will watch how you use your Holding, and if you create meaningful change in the world, your Holding may increase in level. Conversely, if you misuse or neglect your Holding, it may degrade over time.

Holdings are tools of narrative agency, economy, and world-building. Used well, they give your character reach beyond Fortunes Bend-into politics, trade, shadowy networks, and mystical connections. They reward planning, creativity, and investment-and help you tell a bigger story.

Holdings: Game Mechanics and Rules Summary

What Is a Holding?

A Holding is a defined, plot-approved asset that you can use to influence the game world between events. It must be paid for (via CP or IG coin) to function and is used through the [Info Skill](#) system.

How to Obtain a Holding (Level 1):

You may only have one Holding.

Method	Cost
1. Foundation Skill	4 CP for the Holding skill
2. Purchased with Coin	Base cost is 1 Reel, specialized holdings may cost more
3. Earned via Plot	This is a plot reward and the cost will be determined in that plotline

Levels of Holdings:

Level	Description	Use Cost
1	One meaningful resource (a ship, shop, minor influence)	1 Ketch (or no cost if skill purchased)
2	Larger or multiple assets (fleet of five ships, regional network, minor organization)	5 Ketch (or 4 Ketch with the skill)
3	Major scale (multi-kingdom operation, Convocation seat, etc.)	2 Reel

- Level 2 and 3 Holdings must be earned through in-game actions.
- You may use a higher-level Holding as a lower-level one (e.g., Level 3 as a Level 1) for reduced cost.
- Level 3 Holdings must be used every event at least at Level 1, or they risk degrading over time.

Using Your Holding:

- Submit an [Info Skill](#) titled 'Holding' with a clear description of what your resource is doing.
- This counts as one of your two [Info Skills](#).
- You must pay at the event before you intend to use your Holding (e.g., pay at Summer 2025 to use post-event).
- If you haven't paid (or invested CP), you may not use your Holding.

Restrictions:

- All Holdings must be approved by Plot.
- Not Allowed as Holdings:
 - Libraries, laboratories and workshops (use Research skill instead)
 - Courier networks (use Courier skill instead)
 - Military Holdings Exception: Owning an offensive military force removes you from the Pact and is grounds for character retirement. Defensive mercenaries or peaceful scouts will be considered, but require additional information and plot oversight.
 - Evil Holdings (e.g., slave markets, torture pits, etc) will not be approved. Try again with something less grim.

Risks and Consequences:

- Holdings used for aggressive or risky actions (e.g., smuggling during a blockade, interfering with nobles) may suffer negative consequences:
 - Lose a level
 - Become unusable temporarily
 - Require additional costs to repair or recover
- You may not use your Holding to do the impossible (e.g., mining gold from an iron mine).

Growing a Holding:

- Holdings do not level up from coin or CP.
- You must cause in-game change or influence using your Holding to grow it.
- For example: using your circus to recruit new acts during a major event may result in a Level 2 upgrade.
- [Info Skills](#) like 'How do I grow my Holding?' will not work. You must drive the growth through gameplay.

Numina Magic Items:

1. Purchasing Items

- Magic items are available for purchase from in-game merchants.
- The cost is listed directly on the item.
- When you purchase an item, it becomes bound to you - you cannot give it away or transfer ownership.

2. Finding Magic Items:

- You may find magic items in-game. They will have the same tag format as purchased magic items.
- The first person to use the item is now bound to it.
- There is no cost to bound a found item

3. Purchase / Binding Limits

- One Item Per Event Limit: You may only bind one item from each unique series at a time. So if you find an item from the Dawn series, you cannot bind a second item from that series.
- You may only bind a total of three items, each from a different series.

4. Renewing Items

- The first event you find or buy an item, that item is good for the remainder of that event and the full event of the next event you attend.

- In the second event you attend, you must renew the item at the Merchants if you want it to remain for the third event you attend.
- Merchants will take both coin and bank script.
- The cost of renewing an item doubles each time it is renewed. For example:
 - Initial cost: 1 Drakkar
 - 1st Renewal: 2 Drakkar
 - 2nd Renewal: 4 Drakkar
 - 3rd Renewal: 8 Drakkar
 - ...and so on.
- Any item not renewed during an event, after the first event you purchase the item, stops functioning at the end of that event.
- If you do not attend an event, the cost does not increase and the renewal is still in effect.
- You may renew an item as many times as you like.

5. Back Room Access

- Characters with the **What's in Back** skill may purchase items that are specifically labeled as Back Room items.
- These items are not available to characters who do not have this skill.
- These items count toward the one-item-per-event limit.

Hidden Excellencies and Expressions:

The list of [Excellencies](#) contained in this rulebook only contain those that anyone can find and learn. There are more in the world which can be found through roleplay and adventure. There are also some [Excellencies](#) and Skills that are out in the world beyond this. If they are not listed here that means they are not planned for PC Introduction in the next 1-2 years.

The description of the Hidden [Excellencies](#) and [Expressions](#) are the name, For [Excellencies](#) it will include the alignment to an element or elements so you know the style of interaction. The signature skill so you know the main thing this skill set is known for.

Name	Alignment	Primary Skill
Cursebreaker	Expression	Ritual Curse Removal
Deadeye	Air	Take ten seconds without moving to increase the damage of your archery attack
Fletcher	Air / Earth	You can quickly refresh the quiver of another
Fortress	Earth	Grant Protection to another
Guardian	Water	Your healing towards the person you designate as your Ward is increased
Guildsman	Expression	Gain additional resources or special resources each event
Lightfoot	Air/Ice	Gain additional damage and defenses by moving while you shoot
Mindblade	Lightning	Melee strikes using mental and an increasing arsenal of traits
Monsoon	Lightning/Water	Single Sword healer who can both attack and heal
Order Adherent	Expression	Specific to each unique Convocation
Poison arrow	Air/Water	Create curative potions and venoms that can be affixed to your arrows
Preserver	Ice	Once you are hit by a specific trait you become better at resisting that trait
Reconstructor	Ice/Water	You can heal yourself and benefit from healing more than the norm
Reservoir*	Earth/Water	You know how to create a place of healing that you and your companions can return to for beneficial effects.
Scorpion, who mixes poisons at the point of centering to harm others while using the scorpion's chiton to protect themselves.	Fire / Ice	You mix poisons to strike your enemy and elixirs to protect yourself. You benefit from your own mixtures.

Name	Alignment	Primary Skill
Shadewalker	Expression	Gain knowledge of the shade and be better able to travel there
Steelforge	Earth / Lighting	Without your five foot circle your defenses are greatly enhanced
Transgressor	Fire	Can cast detrimental effects against their foes
Trick Shot	Fire/Air	Switch between spells and missile attacks.
Vampire	Lightning / Water	When you strike your foes you heal
War Dancer	Lightning/Air	An individual who gains strength in alternating between melee and missile attacks
Whisperer	Ice / Fire	They combine protections and packet attacks equally.

**Reservoir: The only [Thread Skill](#) that directly affects a Healing Reservoir is Deepen Reservoir. Skills or items that increase "healing received" will increase the healing a character receives when they use healing from the Reservoir, but do not affect the amount of healing stored in the Reservoir itself.*

Numina Weapon Construction Guidelines

First things first, let's cover the sizes for [weapons](#) we use in Numina:

Numina Weapon Construction Reference Table

Weapon Type	Min Length	Max Length	1H 2H	Core Type	% Blade Padding	Additional Requirements
Sword	25"	46"	1H	A1- A2	66%	Crossguard required
Axe	25"	46"	1H	A1- A2	50%	8" striking head
Mace / Hammer	25"	46"	1H	A1- A2	50%	6" striking head
Club	25"	46"	1H	A1- A2	50%	May not have crossguard
Claw	25"	46"	1H	A1- A2	66%	May not have crossguard
Two-Handed Sword*	50"	64"	2H	B	66%	Crossguard required
Two-Handed Blunt*	50"	64"	2H	B	50%	May not have crossguard May have striking head
Staff*	48"	64"	2H*	C	66%	Two striking ends; both ends padded
Spear*	48"	64"	2H*	C	50%	Reinforced tip recommended
Glaive**	48"	64"	2H*	B	33%/33%/33%	Dual Striking weapons Requires head on both ends
Great Glaive**	60"	72"	2H	D	33%/33%/33%	Dual Striking weapons Requires head on both ends
Polearm**	60"	72"	2H	D	50%	12" striking head
Thrown Weapon***	≥6"	-	N/A	None	N/A	No rigid core; must pass eye-socket test

Notes:

- *These [weapons](#) are 2 handed [weapons](#) in Numina. There may be skills that will allow certain uses of these [weapons](#) in one hand.

- **These [weapons](#) require special skills to use in Numina.
- ***[Thrown weapons](#) conform to entirely different rules, discussed below

Construction Requirements

Next, let's go over some materials requirements for Standard Construction weapons. Requirements for Non-Standard [weapons](#) will come along afterward:

Padding requirements:

- Padding on striking edges of [weapons](#) must be a minimum of 5/8' thick Closed Cell foam (polyethylene foam pipe insulation or EVA/XLPE foam with a 2lb density rating) .
- Padding on thrusting tips must be 2' thick on 1 handed [weapons](#) and 3' on 2 handed weapons. This padding must be open cell foam (furniture cushion foam)
- Padding on 'additional Head' [weapons](#) may be made of either Open or Closed cell foam.

Core Categories :

A: .414 or .505 Filament Wound Epoxy Tube

- A1: 1/2' CPVC
- A2: 3/4' CPVC
- 1/2' Sched 20 PVC

B: .602 or .75 Filament Wound Epoxy Tube

- 1' CPVC
- 3/4' Sched 20 or 40 PVC

C: .602 or .75 Filament Wound Epoxy Tube

- 3/4' CPVC
- 1/2' Sched 20 or 40 PVC

D: .75 Filament Wound Epoxy Tube

Discuss with staff if you want to build a [weapon](#) of this size with a PVC or CPVC core. The weight/flex of a [weapon](#) of this size creates specific difficulties.

Tip requirements :

All [weapons](#) must be able to pass an 'eye test'. This essentially means that the [weapon](#) can safely be pressed against an eye socket without poking the eye directly. Rounded off tips are acceptable but Numina does not allow [weapons](#) that come to a sharp point. Numina requires padding on the Pommel end of weapons, but does not require a thrusting tip on pommels.

Crossguards :

Any [weapon](#) designed with a crossguard may not have any core inside the crossguard. There are no minimum or maximum requirements on crossguard size.

Finding Materials :

Filament Wound Epoxy Tube and Pipe insulation foam of the necessary sizes are not commonly available in physical stores in our area. We will provide a link for the needed materials for reference, but do not require materials be purchased from the provided links. View them as reference to ensure you are finding the correct materials. If in doubt, do not hesitate to reach out to our staff with questions.

- Filament Wound Epoxy Tube: <https://goodwinds.com/product-category/carbonfiberglass/fiberglass/filament-wound-epoxy-tubing/>
- Polyethylene Foam Pipe Insulation: <https://www.mcmaster.com/products/pipe-insulation/pipeinsulation-1~/economical-flexible-polyethylene-foam-pipe-insulation/>

Thrown Weapons

A thrown [weapon](#) should have at least one dimension greater than 6'. Thrown [weapons](#) also pose the same risks

as [packets](#), and must therefore conform to the same 'Eye Socket' test (it should be safe to press the [weapon](#) into an eye socket without hurting the eye). Thrown [weapons](#) should be made of the same foam used for striking weapons, but notably thrown [weapons](#) cannot contain any core or solid objects. This creates a fairly light [weapon](#), so it is best to use closed cell foams instead of open cell foams unless the [weapon](#) is greater than minimum size. It is difficult to give a maximum size for thrown [weapons](#) because of the variety of shapes possible. While a long thin javelin may be a safe thrown [weapon](#), a full size tombstone may be shorter but still be too large for safe use.

These rules mean that a great many purchased throwing [weapons](#) are not safe for Numina use. If you are unsure about your design for a thrown [weapon](#), please do not hesitate to reach out to staff.

Non-Standard Weapons

Non-standard [weapons](#) covers a broad group of [weapons](#) from Home made 'flat bladed' [weapons](#) all the way up to Latex weapons. Numina allows the use of these [weapons](#) on a case by case basis, but we do have an elevated standard for these weapons. A cardinal rule of these [weapons](#) is that they must be inspected and approved prior to use. It is a good idea to know the materials used for the [weapon](#), even if you commission the [weapon](#) and did not make it yourself. Understand that these [weapons](#) are subject to a higher level of scrutiny both at the initial construction and throughout their life. We really do not enjoy telling someone that they can't use a [weapon](#) that they spend quite a sum of money on, but we have to consider the safety and comfort of our players first.

Please do not hesitate to work with our staff if you have a desire to build or purchase one of these weapons.

Some [weapon](#) construction rules are different for these weapons:

- Stabbing tips are not required. However if your [weapon](#) does not include a stabbing tip, then thrust maneuvers are not permitted. Sharply pointed tips are still not permitted.
- Non-striking edges can be less than 5/8' thick. These edges should still be at least 3/8' thick.

Home Made:

For home made blades, we encourage our players to make their own [weapons](#) and to experiment with new techniques and designs. However certain things remain:

- Striking edges must have at least 5/8' of a closed cell foam with a 2lb Density rating.
- Thrusting tips (if present) must still meet thickness requirements)

Additionally, we recommend that striking edges have a greater than 5/8' thickness of foam, due to the narrower impact width.

Purchased Latex Weapons:

Numina allows commercially purchased latex [weapons](#) with restrictions.

First, we cannot provide an approved list of [weapons](#) or vendors at this time. Without knowing the [weapon](#), we don't know if it has enough padding, or if the padding is soft enough. We will work to keep a list of any [weapons](#) we have seen and approved for use as time progresses.

Second, understand that using a Latex [weapon](#) requires a very different fighting style than using a 'standard' boffer [weapon](#). Even the finest latex [weapons](#) hit harder than pipe insulation, weigh more, and get harder in extreme cold. A Light Touch combat system like Numina encourages speed more than power, and attempting to fight in the same style with Latex [weapons](#) will result in sharp hits that will simply hurt more.

No commercially available latex [weapons](#) have thrusting tips. Thus, you cannot thrust while using a latex [weapon](#).

We cannot stress enough that we can't approve Latex [weapons](#) for use at Numina without seeing them physically first. We don't want players to be spending tons of money and then being told no, but this is a safety concern we cannot back down from.

Bows:

Rules on Bow Construction will be added later.

Buckler:

Rules on Bow Construction will be added later.

Shield:

Rules on Bow Construction will be added later.

Packets:

Two things govern safe [packets](#): Cloth choice and fill choice.

Fabric

Numina requires [packets](#) be made of a fabric with stretch. Usually fabrics with a higher lycra or spandex content meet this requirement, and the cheapest broadcloths do not (sorry!).

Fill

Our two event sites have different packet fill requirements:

For Events at Camp Horizons we use bird seed that contains no large seeds. Safflower/Sunflower seeds are too large, so either purchase seed that does not contain these seeds or sift them out.

For events at Prince William Forest Park we require the use of Airsoft pellets. We recommend (but do not specifically require) use of biodegradable pellets. For reference:

<https://www.amazon.com/biodegradable-airsoft-bbs-SportsOutdoors/s?k=biodegradable+airsoft+bbs&rh=n%3A3375251>

Construction

We recommend [packets](#) be held together with rubber bands rather than sewn or tied with yarn.

Constructed [packets](#) should be slightly larger than an eye socket, usually a heaping tablespoon of birdseed. [Packets](#) smaller than that can be an eye hazard and [packets](#) significantly larger can hit with too much force. A properly constructed [packet](#) would stretch enough that you should be able to pinch your fingers together through the center of the [packet](#).
